**Small Book of Essays on Peacemaking Criminology** Louis J. Gesualdi,2024-10-14 In this concise and valuable collection of essays Louis J Gesualdi provides readers with an understanding of peacemaking criminology Peacemaking criminology is a humane nonviolent and scientific approach in its treatment of crime and the offender It looks at crime as just one of the many types of suffering that exemplify human life Efforts to put a stop to such suffering according to peacemaking criminologists should take into account a main rebuilding of America s social institutions such as the economic system the criminal justice system and the health care system so that they no longer create suffering The United States as a society pays no notice to prevention but rather adheres to the belief of imprisonment and punishment The twelve essays in this book focus on how peacemaking criminology aids in the prevention of crime the rehabilitation of offenders and involves the core principles of social justice and human rights     *Democracy's Little Self-Help Book* Peter Michaelson,2006 A blank page in front of a writer possesses the chance to create a masterpiece The truth that it may or may not exist is what makes it so unique While inspiration comes at any moment it s the rush of passion from a novice love that excites our entire demeanor This same fiery passion if left unattended will diminish in time until its embers are the only remembrance of its existence Unknown to some this is all a part of the revolution of life Idealistically life revolves around four seasons summer autumn winter and spring Our reaction to these inevitable changes is what defines who we are You must first identify what you want out of a situation and then take the necessary steps to achieve it Whether it s the courage to tell someone how you feel the heart to express your desires if they are not being met or the strength to let go of someone that is holding you back you are the master of your fate Don t limit yourself to what you can and cannot do In the back of our minds we are all searching for the same thing the opportunity to love and be loved Expressing that for some is a difficult thing The question remaining is it possible to be inspired by an experience that isn t yours Universality tells us yes and Barely Breathing is an example of such an instance

*Peacemaking Approach to Criminology* Louis J. Gesualdi,2013-10-30 A peacemaking approach to criminology is a humane

nonviolent and scientific approach to the treatment of crime and the offender. It looks at crime as just one of the many types of suffering that exemplify human life. According to peacemaking criminologists, efforts to put a stop to such suffering need to take into account a main rebuilding of America's social institutions such as the economic system and the criminal justice system so that they no longer create suffering. In short, the U.S. as a society pays no notice to prevention but rather embraces the tenets of imprisonment and punishment. A peacemaking approach to criminology deals with prevention of crime and rehabilitation of offenders and involves principles of social justice and human rights. This collection of twenty-two essays provides a comprehensive introduction to a peacemaking approach to criminology.

**The Spirit of Vatican II** Gerd-Rainer Horn, 2015. Vatican II profoundly changed the outlook and the message of the Catholic Church. After decades if not centuries in which Catholic public opinion appeared to be primarily oriented towards the distant past and bygone societal models, suddenly the Catholic Church embraced the world as it was and it joined in the struggle to create a radiant future. The Sixties were a time of great socio-cultural and political ferment in Europe as a whole. Especially the second half of the 1960s and the first half of the 1970s witnessed an astounding range of new and old social movements reaching for the sky. Catholic activists provided fuel to the fire in more ways than one. Catholics had embarked on the quest for new horizons for some years prior to the sudden growth of secular activism in and around the magic year of 1968. When secular radicals joined up with Catholic activists, a seemingly unstoppable dynamic was unleashed. This book covers five crucial contributions by Catholic communities to the burgeoning atmosphere of those turbulent years: a) the theological innovations of Vatican II which made such an unprecedented engagement of Catholics possible in the first place but also post-conciliar theological developments; b) the resurgence of the worker priest experiment and the first ever creation of autonomous organisations of radical parish priests; c) the simultaneous creation of grassroots organisations, base communities by mostly lay activists across the continent; d) the crucial roles of Catholic students in the multiform student movements shaping Europe in these years; e) the indispensable contributions of Catholic workers who helped shape and often initiated the wave of militant contestations shaking up labour relations after 1968.

**Democracy's Lot** Candice Rai, 2016-04-15. Traces the communication strategies of various constituencies in a Chicago neighborhood offering insights into the challenges that beset diverse urban populations and demonstrating persuasively rhetoric's power to illuminate and resolve charged conflicts. Candice Rai's *Democracy's Lot* is an incisive exploration of the limitations and possibilities of democratic discourse for resolving conflicts in urban communities. Rai roots her study of democratic politics and publics in a range of urban case studies focused on public art, community policing and urban development. These studies examine the issues that erupted within an ethnically and economically diverse Chicago neighborhood over conflicting visions for a vacant lot called Wilson Yard. Tracing how residents with disparate agendas organized factions and deployed language, symbols and other rhetorical devices in the struggle over Wilson Yard's redevelopment and other contested public spaces, Rai demonstrates that rhetoric is not solely a tool of elite

communicators but rather a framework for understanding the agile communication strategies that are improvised in the rough and tumble work of democratic life

Wilson Yard a lot eight blocks north of Wrigley Field in Chicago's gentrifying Uptown neighborhood is a diverse enclave of residents enlivened by recent immigrants from Guatemala Mexico Vietnam Ethiopia and elsewhere The neighborhood's North Broadway Street witnesses a daily multilingual hubbub of people from a wide spectrum of income levels religions sexual identifications and interest groups When a fire left the lot vacant this divided community projected on Wilson Yard disparate and conflicting aspirations the resolution of which not only determined the fate of this particular urban space but also revealed the lot of democracy itself as a process of complex problem solving

Rai's detailed study of one block in an iconic American city brings into vivid focus the remarkable challenges that beset democratic urban populations anywhere on the globe and how rhetoric supplies a framework to understand and resolve those challenges Based on exhaustive field work Rai uses rhetorical ethnography to study competing publics citizenship and rhetoric in action exploring rhetorical invention the discovery or development by individuals of the resources or methods of engaging with and persuading others She builds a case for democratic processes and behaviors based not on reflexive idealism but rather on the hard work and practice of democracy which must address apathy passion conflict and ambivalence

The Political Economy of Narcotics Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies faces entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America's

strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition

The Politics of Drug Violence Angelica Duran-Martinez,2017-12-13 Over the last few decades drug trafficking organizations in Latin America became infamous for their shocking public crimes from narcoterrorist assaults on the Colombian political system in the 1980s to the more recent wave of beheadings in Mexico However while these highly visible forms of public violence dominate headlines they are neither the most common form of drug violence nor simply the result of brutality Rather they stem from structural conditions that vary from country to country and from era to era In The Politics of Drug Violence Angelica Dur n Mart nez shows how variation in drug violence results from the complex relationship between state power and criminal competition Drawing on remarkably extensive fieldwork this book compares five cities that have been home to major trafficking organizations for the past four decades Cali and Medell n in Colombia and Ciudad Ju rez Culiac n and Tijuana in Mexico She shows that violence escalates when trafficking organizations compete and the state security apparatus is fragmented However when the criminal market is monopolized and the state security apparatus cohesive violence tends to be more hidden and less frequent The size of drug profits does not determine violence levels and neither does the degree of state weakness Rather the forms and scale of violent crime derive primarily from the interplay between marketplace competition and state cohesiveness An unprecedentedly rich empirical account of one of the worst problems of our era the book will reshape our understanding of the forces driving organized criminal violence in Latin America and elsewhere
