The Machines of Sex Research Donna J. Drucker, 2013-07-04 The Machines of Sex Research describes how researchers worldwide integrated technology into studies of human sexuality in the postwar era The machines they invented made new ways of seeing bodies possible Some researchers who studied men used machines like penile strain gauges to police deviant male sexuality others used less painful devices like penis cameras to study women s sexual responses and map the physiology of their arousal and orgasm While researchers used the findings from their technological innovations to propose their own views of how people should view their bodies and should manage their sexual lives their readers interpreted their findings to enact their own visions of sexuality Drucker shows how the use of machines in sex research provided some of the intellectual underpinnings of the sexual revolution and the women s and gay rights movements and in turn how the sex research community developed new machines for investigations that would enhance sexual happiness rather than constrict it The Machines of Sex Research is a key read for those interested in the intersections between human sexuality technology and twentieth century social movements Describes the little known history of the machines of human sex research in the postwar era Shows how researchers worldwide invented and used machines to study human sexuality and the body in new ways and how they used and improved each other s designs Relates the relationship between the machines of sex research to Cold War sexualities and gender and sexual liberation movements

Responsibility and Resistance Tobias Eberwein, Matthias Karmasin, Friedrich Krotz, Matthias Rath, 2019-08-05 The volume deals with the normative challenges and the ethical questions imposed by and through the developments and changes in everyday life culture and society in the context of media change It is thus concerned with the questions of whether and how the central concept of enlightened ethics must evolve under these premises or in other words what form do ethics take in mediatized societies In order to address this question and to stimulate and initiate a debate the authors focus on two concepts responsibility and resistance Their contributions try to shed light not only on the empirical shreds of evidence of change in mediatized societies but also on the normative challenges and ethical possibilities of these developments Do Androids Sleep with Electric Sheep? Johannes Grenzfurthner, 2009 As the official artists collective representing Vienna at the S o Paulo Art Biennial in 2002 the monochrom group Johannes Grenzfurthner G nther Friesinger and Daniel Fabry invented an artist called Georg Paul Thomann and carried off the exhibition as a very elaborate prank The trio aided by philosopher Thomas Ballhausen brings that same sense of the cutting edge and the carnivalesque to this collection exploring erotica science fiction and technology A bracing mix of literary forms the book shows why the fantasy genre is especially suited to the investigation of the transgressive realms of sexuality and pornography Here questions of science research and technologization are examined along with the complex surrounding urbanism artificiality and control or the loss of control Provocative and penetrating *Do Androids Sleep with Electric Sheep* reveals a wealth of depictions of the future and shows the many ways in which they also address the present *Contraception* Donna J.
