Sex Ratios and Age Ratios in North American Ducks Frank Chapman Bellrose,1961 *Ecology and Conservation of North American Sea Ducks* Jean-Pierre L. Savard,Dirk V. Derksen,Dan Esler,John M. Eadie,2015-04-13 The past decade has seen a huge increase in the interest and attention directed toward sea ducks the Mergini tribe This has been inspired in large part by the conservation concerns associated with numerical declines in several sea duck species and populations as well as a growing appreciation for their interesting ecological attributes Reflec **North American Fauna** ,1968 **Resource Publication** ,1965 **Population Ecology of the Mallard** David Raymond Anderson,1972 Simple experiments and observations reveal the physical properties of light Population Ecology of the Mallard United States Department of the Interior. U.S. Fish and Wildlife Service. Bureau of Sport Fisheries and Wildlife, author,1975 *Wild Mammals of North America* George A. Feldhamer,Bruce C. Thompson,Joseph A. Chapman,2003-11-19 Table of contents **Population and Development in North East India** Bimal J. Deb,2010 *Wildlife Review* ,1961 *Current Ornithology* D.M. Power,2013-06-29 This edited series has three principal goals The first is to provide information in a relatively concise way for researchers needing an over view of specific disciplines The second is to provide an update on specific schools of thought bringing together ideas from colleagues whose works often appear in a variety of journals And the third is to stimulate and suggest directions for new research Volume 6 continues the tradition established by the previous editor and editorial board in providing new information updating our understanding of specific disciplines and stimulating new research In the first chapter Randall Breitwisch examines mortality patterns and sex ratios in monogamous birds He argues that there are many more components to measuring parental investment than are often realized our knowledge is weak in several areas Understanding the evolution of mating systems depends on better distinguishing the different intensities of natural selection that operate on males and females Gregory Butcher and Sievert Rohwer develop a framework for assessing the role of colorfulness in birds They propose several hypotheses to test and advocate evaluating more than one hypothesis at a time Future work on the evolution of distinctive coloration and of sexual and age dimorphism must take these ideas into account *Ecology and Management of Black-tailed and Mule Deer of North America* James R. Heffelfinger,Paul R. Krausman,2023-04-27 Black tailed and mule deer represent one of the largest distributions of mammals in North America and are symbols of the wide open American West Each chapter in this book was authored by the world's leading experts on that topic Both editors James R Heffelfinger and Paul R Krausman are widely published in the popular and scientific press and recipients of the O C Wallmo Award given every two years to a leading black tailed and mule deer expert who has made significant contributions to the conservation of this species In addition Heffelfinger has chaired the Mule Deer Working Group sponsored by the Western Association of Fish and Wildlife Agencies for more than 15 years This working group consists of the leading black tailed and mule deer experts from each of 24 states provinces and territories in western North

America putting them at the forefront of all conservation and much of the research on this species The book represents all current knowledge available on these deer including how changing conditions such as fires habitat alteration and loss disease climate change socio economic forces energy development and other aspects are influencing their distribution and abundance now and into the future It takes a completely fresh look at all chapter topics The revisions of distribution taxonomy evolution behavior and new and exciting work being done in deer nutrition migration and movements diseases predation and human dimensions are all assembled in this volume This book will instantly become the foundation for the latest information and management strategies to be implemented on the ground by practitioners and to inform the public Although this book is about deer the topics discussed influence most terrestrial wildlife worldwide and the basic concepts in many of the chapters are applicable to other species

Hathaway, Joseph Allan Beegle, Wilfrid Keith Bryant, 1968 **Perspectives in Human Geography** Punyatoya Patra, Rajesh Kumar Abhay, Roshani Devi, Gaurav Sikka, Sneha Gangwar, 2021-01-01 The text book entitled Perspectives in Human Geography is designed to cover the requirements of the various undergraduate level syllabuses of Human Geography in India in general and that of CBCS syllabus of University of Delhi in particular The book is divided into five parts The first part covers the concept major themes of Human Geography and its contemporary relevance The second part covers world cultural realms and characteristics and global distribution of race religion and language The third part covers population growth distribution composition migration and along with population theories Part four focuses on settlement which covers distinction between rural and urban settlement determinants of rural settlement classification of urban settlement and world urbanization pattern The fifth part focuses on population resource region with the concepts of under population over population optimum population and carrying capacity of regions This book provides many basic and other useful materials for optional subjects such as Population Geography Cultural Geography Urban Geography and Resource Geography The book would be of an immense help to both students and teachers of Geography and other related social sciences *Management of Amphibians, Reptiles, and Small Mammals in North America* Robert C. Szaro, Kieth E. Severson, David R. Patton, 1988 Historically the management of public lands from a multiple use perspective has led to a system that emphasizes those habitat components or faunal elements that primarily resulted in some sort of definable economic value While this often benefitted other species that were not even considered in the original prescriptions it also negatively impacted others We no longer can afford to take this simplistic view of ecosystem management We need to use a more holistic approach where ecological landscapes are considered as units and land management practices incorporate all elements into an integrated policy This includes examining the impacts of proposed land uses on amphibian reptile and small mammal populations
