## **Sex And The Origins Of Death:**

*Sex and the Origins of Death* William R. Clark, In *Sex and the Origins of Death* Professor William Clark looks at life and death at a cellular level as he addresses questions such as why we age why death exists and why sex and death go hand in hand

**Sex and the Origins of Death** William R. Clark, 1998-06-11 Death for bacteria is not inevitable Protect a bacterium from predators and provide it with adequate food and space to grow and it would continue living and reproducing asexually forever But a paramecium a slightly more advanced single cell organism under the same ideal conditions would stop dividing after about 200 generations and die Death for paramecia and their offspring is inevitable Unless they have sex If at any point during that 200 or so generations two of the progeny of our paramecium have sex their clock will be reset to zero They and their progeny are granted another 200 generations Those who fail to have sex eventually die Immortality for bacteria is automatic for all other living beings including humans immortality depends on having sex But why is this so Why must death be inevitable And what is the connection between death and sexual reproduction In *Sex and the Origins of Death* William R Clark looks at life and death at the level of the cell as he addresses such profound questions as why we age why death exists and why death and sex go hand in hand Clark reveals that there are in fact two kinds of cell death accidental death caused by extreme cold or heat starvation or physical destruction and programmed cell death initiated by codes embedded in our DNA Bacteria have no such codes We learn that every cell in our body has a self destruct program embedded into it and that cell suicide is in fact a fairly commonplace event We also discover that virtually every aspect of a cell s life is regulated by its DNA including its own death that the span of life is genetically determined identical twins on average die 36 months apart randomly selected siblings 106 months apart that human tissue in culture will divide some 50 times and then die an important exception being tumor cells which divide indefinitely But why do our cells have such programs Why must we die To shed light on this question Clark reaches far back in evolutionary history to the moment when inevitable death death from aging first appeared For cells during the first billion years death when it occurred was accidental there was nothing programmed into them that said they must die But fierce competition gradually led to multicellular animals size being an advantage against predators and with this change came cell specialization and most important germ cells in which reproductive DNA was segregated When sexual reproduction evolved it became the dominant form of reproduction on the planet in part because mixing DNA from two individuals corrects errors that have crept into the code But this improved DNA made DNA in the other somatic cells not only superfluous but dangerous because somatic DNA might harbor mutations Nature s solution to this danger Clark concludes was programmed death the somatic cells must die Unfortunately we are the somatic cells Death is necessary to exploit to the fullest the advantages of sexual reproduction In *Sex and the Origins of Death* William Clark ranges far and wide over fascinating terrain Whether describing a 62 year old man having a major heart attack and how his myocardial cells rupture and die or discussing curious life forms that defy any

definition of life including bacterial spores which can regenerate after decades of inactivity and viruses which are nothing more than DNA or RNA wrapped in protein this brilliant profound volume illuminates the miraculous workings of life at its most elemental level and finds in these tiny spaces the answers to some of our largest questions     Leading Causes of Death by Age, Sex, Race, and Hispanic Origins Paula Gardner, Harry M. Rosenberg, Ronald W. Wilson, 1997-09 Presents leading cause of death data using alternative age classifications Rankings are shown separately for white black and Hispanic males and females Ranking procedures include effects of age aggregation on ranking and effects of alternative age aggregations Tables cover deaths and death rates for the 10 leading causes of death list of 72 selected causes of death ranking of diseases of heart by alternative age groupings AAG ranking of HIV infection by AAG and the effect of different age aggregations on ranking of malignant neoplasms accidents cerebrovascular diseases diabetes suicide homicide and more     Ian McEwan: Sex, Death, and History Eluned Summers-Bremner, 2014-05-28 Ian McEwan's works have always shown an interest in the question of how fiction operates This interest does not usually manifest on the formal level A few of the early stories aside his fictions are not formally experimental McEwan tends to opt for those reliable patternings of space time and narrative progression that enable readers to trust the authorial environment sufficiently to identify with characters and become invested to some extent in what happens to them Despite McEwan's commitment by and large to naturalistic means of telling a story his later novels also demonstrate a concern with opacity as characters often pursue courses of action for reasons that are unclear to them Equally often these actions bear some relation to the intrinsic opacity or enigma of one's sexual desires one's relation to one's mortality or one's relation to the actions of those human beings who have gone before one as this book will show It is this focus on enigma in McEwan's work whether sexual mortal or historical that lends it to a psychoanalytic reading such as the kind pursued in this book because for psychoanalysis there is no such thing as full access to one's self or to one's feelings or motivations Given that one's relation to history is also opaque in the sense that one grasps fully or imagines one grasps fully only those historical events which predate or otherwise excludes one this study seeks historical reasons for why McEwan sometimes blocks readerly identification with characters in the early fiction For these characters are also products of their environments environments which the characters relative opacity and unlikeability seems to offset and exaggerate or present in a manner showcased for one's judgment And in this way the characters environment is denaturalized to say the least This book reveals how all of these works explore to some extent the human tendency to act and feel in particular situations in profound contradistinction to how one might prefer to think one would This failure to coincide with one's image of how one would have expected or preferred to behave The Innocent's Leonard Marnham is not the cool experienced lover of his imaginings any more than Solar's Michael Beard is going to revamp his lifestyle or career produces instances of affective or imaginative excess troubling images or feelings that can often only be allayed or dealt with by a further failure to coincide with one's desires In this book author Eluned Summers Bremner shows that McEwan's interests in

opacity not only become clear in significance and import but that his interests in human failure to coincide with one's views about the past and hopes for the future also appear as what they are an ongoing concern with how one relates to the complex operation of human history

**Death & Sex** Tyler Volk, Dorion Sagan, 2009-10-13 On DEATH What is shared by spawning Pacific salmon towering trees and suicidal bacteria In his lucid and concise exploration of how and why things die Tyler Volk explains the intriguing ways creatures including ourselves use death to actually enhance life Death is not simply the end of the living though even in that aspect the Grim Reaper has long been essential to natural selection Indeed the exquisite schemes and styles of death that have emerged from evolution have been essential to the great story from life's beginnings in tiny bacteria nearly four thousand million years ago to ancient human rituals surrounding death and continuing to the existential concerns of human culture and consciousness today Volk weaves together autobiography biology Earth history and results of fascinating studies that show how thoughts of our own mortality affect our everyday lives to prove how an understanding of what some have called the ultimate taboo can enrich the celebration of life and SEX In Sex Dorion Sagan takes a delightful irreverent and informative romp through the science philosophy and literature of humanity's most obsessive subject Have you ever wondered what the anatomy and promiscuous behaviors of chimpanzees and the sexual bullying of gorillas tell us about ourselves Why we lost our hair What amoebas have to do with desire Linking evolutionary biology to salacious readings of the lives and thoughts of such notables as the Marquis de Sade and Simone de Beauvoir and discussing works as varied as *The Story of O* and *Silence of the Lambs* Sex touches on a potpourri of interrelated topics ranging from animal genitalia to sperm competition the difference between nakedness and nudity jealousy's status as an aphrodisiac and the origins of language Casanova and music ovulation and clothes mother in law jokes and alpha females love and loneliness A brief wonderfully entertaining highly literate foray into the origins and evolution of sex Two books in one cover Death Sex unravel and answer some of life's most fundamental questions

*Sex and Death in Eighteenth-Century Literature* Jolene Zigarovich, 2013-05-02 This book discusses sex and death in the eighteenth century an era that among other forms produced the Gothic novel commencing the prolific examination of the century's shifting attitudes toward death and uncovering literary moments in which sexuality and death often conjoined By bringing together various viewpoints and historical relations the volume contributes to an emerging field of study and provides new perspectives on the ways in which the century approached an increasingly modern sense of sexuality and mortality It not only provides part of the needed discussion of the relationship between sex death history and eighteenth century culture but is a forum in which the ideas of several well respected critics converge producing a breadth of knowledge and a diversity of perspectives and methodologies previously unseen As the contributors demonstrate eighteenth century anxieties over mortality the body the soul and the

corpse inspired many writers of the time to both implicitly and explicitly embed mortality and sexuality within their works By depicting the necrophilic tendencies of libertines and rapacious villains the fetishizing of death and mourning by virtuous heroines or the fantasy of preserving the body these authors demonstrate not only the tragic results of sexual play but the persistent fantasy of necro erotica This book shows that within the eighteenth century culture of profound modern change underworkings of death and mourning are often eroticized that sex is often equated with death as punishment or loss of the self and that the sex death dialectic lies at the discursive center of normative conceptions of gender desire and social power

**Sex** Joann Ellison Rodgers,2003-02-11 How much do you really know about sex In *Sex A Natural History* Joann Ellison Rodgers unearths both the roots of our sexual nature and the expression of our primal urges explaining what it is that makes us male and female and providing fascinating insights into the biology and physiology of flirtation love courtship intercourse fidelity parenting and nurturing She describes scientists discoveries about how the hormone that triggers labor contractions keeps prairie voles faithful to one mate how the brain waves of female mice change when a male comes within smell range and how Harlequin paperback romances and fantasies can be arousing and what these findings tell us about our own sexuality *Sex A Natural History* illuminates one of the most powerful and often misunderstood aspects of human and animal existence
