Sex, Drugs, And Hiv/aids In Brazil James Inciardi, Hilary Surratt, Paulo R. Telles, 2018-05-15 At the beginning of the twenty first century Brazil ranked second only to the United States in the number of reported cases of AIDS Because Brazil's extensive poverty and inequality its fragile economic situation and its limited network of health services the scarce prevention intervention resources targeted only the most visible at risk populations gay men sailors prostitutes and street children Virtually forgotten were Brazil's hidden drug users as well as the tens of millions of individuals living in the country's thousands of favelas or shantytowns which are a characteristic part of almost every Brazilian city In *Sex Drugs and HIV AIDS in Brazil* the authors examine the emergence of AIDS in Brazil its linkages to drug use and the sexual culture and its epidemiology in such populations as cocaine users street children and male transvestite prostitutes Special attention is focused on an HIV AIDS community outreach program established in Rio de Janeiro which represented the first such prevention intervention program in all of Brazil targeting indigent cocaine users This 6 year initiative was funded by the U S National Institute on Drug Abuse and carried out by the authors of this book The research combines anthropological sociological and biological perspectives all data were gathered through empirical and ethnographic techniques **The**

Global HIV Epidemics among Sex Workers Deanna Kerrigan, Andrea Wirtz, Stefan Baral, N'Della N'Jie, Anderson Stanciole, Jenny Butler, Robert Oelrichs, Chris Beyer, 2012-12-01 A global economic analysis of HIV infection amongst sex workers finding that evidence based and rights affirming interventions are not implemented to the level that their efficacy warrants and that doing so at scale would be cost effective and deliver significant returns on investment *The Politics of Sexuality in Latin America* Javier Corrales, Mario Pecheny, 2010-05-24 The city of Buenos Aires has guaranteed all couples regardless of gender the right to register civil unions Mexico City has approved the Cohabitation Law which grants same sex couples marital rights identical to those of common law relationships between men and women Yet a gay man was murdered every two days in Latin America in 2005 and Brazil recently led the world in homophobic murders These facts illustrate the wide disparity in the treatment and rights of lesbian gay bisexual and transgender LGBT populations across the region *The Politics of Sexuality in Latin America* presents the first English language reader on LGBT politics in Latin America Representing a range of contemporary works by scholars activists analysts and politicians the chapters address LGBT issues in nations from Cuba to Argentina In their many findings two main themes emerge the struggle for LGBT rights has made significant inroads in the first decade of the twenty first century though not in every domain or every region and the advances made were slow in coming compared to other social movements The articles uncover the many obstacles that LGBT activists face in establishing new laws and breaking down societal barriers They identify perhaps the greatest roadblock in Latin American culture as an omnipresent system of heteronormativity wherein heterosexuality patriarchy gender hierarchies and economic structures are deeply rooted in nearly every level of society Along these lines the texts explore

specific impediments including family dependence lack of public spaces job opportunities religious dictums personal security the complicated relationship between leftist political parties and LGBT movements in the region and the ever present closets which keep LGBT issues out of the public eye The volume also looks to the future of LGBT activism in Latin America in areas such as globalization changing demographics the role of NGOs and the rise of economic levels and education across societies which may aid in a greater awareness of LGBT politics and issues As the editors posit to be democratic in the truest sense of the word nations must recognize and address all segments of their populations
