employment gap and improve women s equal participation in the labour force

**Theorizing Feminist Policy** Amy G. Mazur, 2002-02-07 Theorizing Feminist Policy avoids the usual clash between feminist analysis and non feminist social science in mapping out the new field of feminist comparative policy Instead it intersects empirical feminist policy analysis with non feminist policy studies to define and contribute to this new and emerging field of study Consulting a wide sweep of empirical and theoretical work the book first defines Feminist Comparative Policy showing how it dialogs with the adjacent non feminist areas of Comparative Public Policy Comparative Politics and Public Policy Studies Theorizing Feminist Policy seeks then to strengthen one of the weakest links of this new area the study of explicitly feminist government action In the remaining chapters the books defines feminist policy as a separate sector with eight sub sectors blueprint political representation equal employment reconciliation family law reproductive rights sexuality and violence and public service delivery It develops a qualitative and comparative framework for analysing the profiles and styles of feminist policy in post industrial democracies and uses the framework to examine twenty seven different cases of feminist policy formation across thirteen different countries The initial empirical study makes a case for feminist policy as a new sector of state action concluding tentatively that successful feminist policy formation is a subtle combination of feminist strategic partnerships non feminist support institutions culture and international influences These tentative findings also shed new light on the perennial questions of comparative politics and policy do politics institutions national policy style sector institutions or culture matter the most in determining policy processes and outcomes The books finishes by suggesting the next steps in developing comparative theories of feminist policy formation Theorising Feminist Policy therefore goes beyond just describing the dimensions of feminist policy from existing literature it seeks to systematically contribute to comparative theories of how the contemporary post industrial state has taken on social change at the beginning of the 21st century

**Public Policy to Reduce Inequalities Across Europe** Paul Cairney, Michael Keating, Sean Kippin, Emily St Denny, 2022

This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. There is a broad consensus across European states and the EU that social and economic inequality is a problem that needs to be addressed. Yet inequality policy is notoriously complex and contested. This book approaches the issue from two linked perspectives. First, a focus on functional requirements highlights what policymakers think they need to deliver policy successfully and the gap between their requirements and reality. We identify this gap in relation to the theory and practice of policy learning and to multiple sectors to show how it manifests in health, education and gender equity policies. Second, a focus on territorial politics highlights how the problem is interpreted at different scales, subject to competing demands to take responsibility. This contestation and spread of responsibilities contributes to different policy approaches across spatial scales. We conclude that governments promote many separate equity initiatives across territories and sectors without knowing if they are complementary or contradictory. This outcome could reflect the fact that ambiguous policy problems and complex policymaking processes are beyond the full knowledge or control of governments. It could also be part of a strategy to make a rhetorically radical case while knowing that they will translate into safer policies. It allows them to replace debates on values regarding whose definition of equity matters and which inequalities to tolerate with more technical discussions of policy processes. Governments may be offering new perspectives on spatial justice or new ways to reduce political attention to inequalities.

**Europe** Sheila Quinn, 2016-08-19. This paper surveys European gender budgeting efforts which have enjoyed sustained support for more than a decade and a half. In a number of countries, gender budgeting led to significant changes in budget legislation and administrative practices. In some countries, it is also possible to tie gender budgeting efforts to expenditure and revenue policy reforms. At a time of continued fiscal austerity in Europe, gender budgeting can help inform fiscal policies to ensure gender-related goals are met. Civil society has played an active role in advocating for effective gender budgeting.

**Gender and Justice** Sally Jane Kenney, 2013. Intended for use in courses on law and society as well as courses in women's and gender studies, women and politics, and women and the law, this book explores different questions in different North American and European geographical jurisdictions and courts, demonstrating the value of a gender analysis of courts, judges, law institutions, organizations, and ultimately politics. Gender and Justice argues empirically for both more women and more feminists on the bench while demonstrating that achieving these two aims are independent projects.

**The Survival of the European Welfare State** Stein Kuhnle, 2003-09-02. Crisis, Breakdown, Dismantlement. Since the 1970s, these have become the catchphrases used to describe the condition of the welfare states in Europe in academic and media analyses alike. This book provides an alternative, more optimistic interpretation. It aims to increase both theoretical understanding and empirical knowledge of recent welfare reforms in areas including Spain, Denmark, the UK, Germany, and the EU as a whole. An essential resource for students, researchers, and practitioners with an interest in the welfare state.

*EU Non-Discrimination*

*Law in the Courts* Jule Mulder, 2017-01-12 Since the year 2000 the material and personal scope of EU non discrimination law has been significantly broadened and has challenged national courts to introduce a comprehensive equality framework into their national law to correspond with the European standard The book provides a multi layered culturally informed comparison of juridical approaches to EU in direct sex and sexualities discrimination and its implementation in Germany and the Netherlands It examines how and why national courts apply national non discrimination law with a European origin differently although the legislation derives from the same set of EU law and the national courts have to respect the interpretive competence of the CJEU The book provides valuable insights into the national and European context which shape the dialogue and influences of the courts inter se the national application of EU law and the harmonisation process within the area of gender equality law and beyond A Dutch and German comparison is of special interest here because both countries approaches towards non discrimination law are quite different despite the similarities in the respective legal systems they are founding members of the EU they are neighbours they are civil law countries and their legal systems are relatively similar at least compared to Scandinavian and common law jurisdictions Therefore the different reception EU non discrimination law cannot simply be explained by obvious differences between the legal systems Their comparison thus provides an interesting case study to uncover legal and non legal cultural and historic factors which influence the application of EU non discrimination law in both countries The book is of interest for EU comparative and equality lawyers European States and their Muslim Citizens John R. Bowen, Christophe Bertossi, Jan Willem Duyvendak, Mona Lena Krook, 2014 This book responds to debates about the place of Muslims in Western Europe by considering the way people draw on practical schemas

**Quotas for Women in Politics : Gender and Candidate Selection Reform Worldwide** Gender and Sexuality Studies Washington University in St. Louis Mona Lena Krook Assistant Professor of Political Science and Women, 2009-03-02 In recent years political parties and national legislatures in more than one hundred countries have adopted quotas for the selection of female candidates to political office Despite the rapid international diffusion of these measures most research has focused on single countries or at most the presence of quotas within one world region Consequently explanations for the adoption and impact of gender quotas derived from one study often contradict with findings from other cases Quotas for Women in Politics is the first book to address quotas as a global phenomenon to explain their spread and impact in diverse contexts around the world It is organized around two sets of questions First why are quotas adopted Which actors are involved in quota campaigns and why do they support or oppose quota measures Second what effects do quotas have on existing patterns of political representation Are these provisions sufficient for bringing more women into politics Or does their impact depend on other features of the broader political context Synthesizing literature on quota policies this book develops a framework for analyzing the spread of quota provisions and the reasons for variations in their effects It then applies this framework to examine and compare campaigns for reserved seats in Pakistan and India party quotas in Sweden and the United Kingdom and legislative quotas in Argentina and France
