*The Psychology of Love and Hate in Intimate Relationships* Katherine Aumer, 2016-06-23 Social psychology has made great advancements in understanding how our romantic relationships function and to some extent dissolve. However, the social and behavioral sciences in much of western scholarship often focus exclusively on the more positive aspects of intimate relationships and less so on more controversial or unconventional aspects. The goal of this volume is to explore and illuminate some of these underrepresented aspects such as non monogamy, female orgasm, sadism and hate that often function alongside love in intimate relationships. Ultimately, by looking at intimate relationships in this way, the volume contributes to and advocates for a more holistic and comprehensive view of intimate relationships. Throughout the volume, contributors from social, clinical and evolutionary psychology cover love and hate from a variety of sometimes opposing perspectives. The first section covers love and the changing landscape of intimate relationships. Its chapters review the current literature and research of understudied topics like non monogamy, female orgasm, sexual fantasies and the viewpoint of love as something other than positive. The second section explores hate and how hate can operate in intimate relationships, for example, the appearance of sadistic behavior and debates the nature of hate as either a motivation or emotion. The volume concludes by looking at ways in which the appearance of hate in relationships can be dealt with and overcome successfully. Taken together, these two sections reflect the full variety of experiences within intimate relationships. With the aim of exploring how love and hate can and frequently do work together, *The Psychology of Love and Hate in Intimate Relationships* is a fascinating psychological exploration of intimate relationships in modern times. It is an invaluable resource to academics and students specializing in psychology, gender and sociology, including clinicians and therapists and all those interested in increasing our knowledge of intimate relationships.

**The Sexual Century** Ethel Spector Person, 1999-01-01 Over the course of the past century, sexual liberation has transformed the way in which most of us regard our bodies and live our sexual lives. Now a preeminent psychoanalytic theoretician on sex and gender discusses what has gone into this unquiet revolution, the roles played by sexologists and psychoanalysts, antibiotics and birth control, the liberation movements and Freud's insight that sex has as much to do with the mind as with the genitals. In this collection of new and previously published papers, Ethel Person writes of the centrality of sexuality to our identity. She describes the role of fantasy in desire, its different expression in the sexes and the way in which desire is inevitably intertwined with power. Her classic papers on transvestism, transsexualism and cross dressing homosexuals, written with Lionel Ovesey, help us to understand how gender and sex develop in all of us. The public acceptance of the transsexual says Person is emblematic of the profound scientific and intellectual shifts that have taken place in the past hundred years. The way that sex and gender develop and are experienced and expressed is the result not only of nature and nurture but also of the cultural zeitgeist. Its
