Perfect Unions Rebecca L. Davis,2010-07-31 The American fixation with marriage so prevalent in today s debates over marriage for same sex couples owes much of its intensity to a small group of reformers who introduced Americans to marriage counseling in the 1930s Today millions of couples seek help to save their marriages each year Over the intervening decades marriage counseling has powerfully promoted the idea that successful marriages are essential to both individuals and the nation s well being Rebecca Davis reveals how couples and counselors transformed the ideal of the perfect marriage as they debated sexuality childcare mobility wage earning and autonomy exposing both the fissures and aspirations of American society From the economic dislocations of the Great Depression to more recent debates over government funded Healthy Marriage programs counselors have responded to the shifting needs and goals of American couples Tensions among personal fulfillment career aims religious identity and socioeconomic status have coursed through the history of marriage and explain why the stakes in the institution are so fraught for the couples involved and for the communities to which they belong Americans care deeply about marriages their own and other people s because they have made enormous investments of time money and emotion to improve their own relationships and because they believe that their personal decisions about whom to marry or whether to divorce extend far beyond themselves This intriguing book tells the uniquely American story of a culture gripped with the hope that with enough effort and the right guidance more perfect marital unions are within our reach **The Future of Post-Human Sexuality** Peter Baofu,2009-12-14 What precisely resides in sexuality which

warrants the popular discourse on sexuality as part of our world freedom or something as an inspiring source for our own creation of new forms of relationships or new forms of love never before possible in human history This popular treatment of

sexual freedom has become so politically correct in this day and age of ours that it fast degenerates into a seductive ideology which has impoverished our understanding of sexuality by blinding us from its dark sides. Contrary to this intoxicating conventional wisdom the dark sides of this seductive ideology have yet to be systematically understood and that its very creative freedom is neither possible nor desirable to the extent that its advocates would like us to believe. Of course this is not to suggest that sexuality should not be about freedom nor creativity or that the literature in sexual studies and other related fields like gender studies, queer studies and cultural studies for example should be ignored because of their scholarly nonsense. Needless to say neither of these two extreme views is reasonable either. Instead the purpose of this book is to provide an alternative better way to understand the nature of sexuality in special relation to the sexual body and spirit in conjunction with the mind while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other. This seminal project if successful will fundamentally change the way that we think about the nature of sexuality from the combined perspectives of the mind, nature, society and culture with enormous implications for the human future and what I originally called its post human fate.

Altering Consciousness Etzel Cardeña, Michael J. Winkelman, 2011-05-18. This authoritative multidisciplinary overview of altered states of consciousness (ASC) shows how their study is necessary to gain a fundamental understanding of human culture, history and biology. Altered consciousness is one of humanity's most mystical and life altering aspects. These remarkable changes in mental state have understandably been a topic of general interest and scientific inquiry across time. Beyond simply satisfying our curiosity, however, studies focused upon altered consciousness can also bring valuable insights into our experience, biology and culture. This unprecedented two volume set will intrigue anyone interested in psychology, biology and neurology, science, history, arts and the humanities and literature, from general readers to scholars and researchers. An impressive collection of international contributors address altered states of consciousness from the perspectives of history, evolution, psychology, culture, literature, human biology, contemporary science and society, seeking to illuminate the causes, effects and meanings of altered consciousness. The first volume provides an introduction and centers on the importance of altered states in history, culture and the humanities, while the second volume presents biological and psychological perspectives on altered consciousness and examines their potential for healing and pathology. **Leonard and Reva Brooks** John Virtue, 2001. In 1947 Leonard and Reva Brooks left for Mexico where Leonard planned to study painting for a year. In Mexico they discovered a vibrant, sometimes even dangerous society and a dynamic artistic community unlike the mundane world they had left behind in Canada with its stale and unwelcoming artistic scene. Invigorated by their new environment, Leonard and Reva ended up staying for over half a century, playing a key role in establishing San Miguel de Allende as a world famous art colony. In this new biography John Virtue chronicles the lives of these two important artists and offers an intimate look at these complex and creative people. Virtue describes how they were caught up in the McCarthy era.

of Communist witch hunts and blacklisted in the United States He details their close friendships with luminary figures such as Marshall McLuhan Earle Birney and the Mexican art icon David Alfaro Siqueiros as well as a host of others As Leonard became a fixture in the Mexican art scene Reva s photography quickly garnered international recognition applauded by photographers Ansel Adams and Edward Weston In 1975 the San Francisco Museum of Art selected her as one of the top fifty female photographers of all time With tales of deportations shootouts murder attempts failures and triumphs Leonard and Reva Brooks is a biography of two creative people caught up in interesting times *How To Develop Supersensory Powers* Ann Davies,2020-12-20 This book contains 53 lessons for developing supersensory powers based on Tarot as taught to BOTA Builders of the Adytum students God bless you **Tradition,Tension and Translation in Turkey** Şehnaz Tahir Gürçaglar,Saliha Paker,John Milton,2015-07-15 The articles in this volume examine historical cultural literary and political facets of translation in Turkey a society in tortuous transformation since the 19th century from empire to nation state Some draw attention to tradition in Ottoman practices and agents of translation and interpreting while others explore the republican period starting in 1923 with the revolutionary change in script from Arabic to Roman coming in 1928 making a powerful impact on publication and translation practices Areas covered include the German Jewish academic involvement in translation traditional and current practices of translating from Kurdish into Turkish censorship of translated literature intralingual translations from Ottoman into modern Turkish pseudotranslation ideological manipulation and resistance in translation imitativeness vs originality and metonymics of literary reviewing Marriages and Families in the 21st Century Tasha R. Howe,2011-09-15 *Marriages and Families in the 21st Century* provides an in depth exploration of a traditional field of study using a new and engaging approach The text covers all the important issues including parenting divorce aging families balancing work and family family violence and gender issues using a bioecological framework that takes into account our status as both biological and social beings Using this lens which emphasizes the individual s interactions with a series of larger systemic influences from family peers neighbors and teachers to schools media institutions and culture the book creates a cohesive overview of modern family life and helps students visualize the complex influences affecting all people in families It also examines the state of modern families using a strengths based approach which allows students to evaluate the health and functioning of a family considering the biological and cultural milieu in which it exists rather than on its observable structure or appearance alone Individual chapters cover historical and cultural trends and also explore the biological personal and social forces that shape individuals and families Each chapter investigates the wide diversity of human relationships and integrates discussions of ethnicity culture sexual orientation and gender seamlessly into the main narrative In addition the book explores recent research in neuroscience medicine and biopsychology to examine how family relationships are shaped by and also influence individuals biological functioning An accessible writing style coupled with numerous student friendly pedagogical features help readers come to a multi layered understanding of what makes families

Nostrums and Quackery Arthur Joseph Cramp, 1912 **Nostrums and Quackery** American Medical Association, 1912
Nostrums and Quackery and Pseudo-medicine American Medical Association, 1912 The Long Sexual Revolution Hera Cook, 2004-02-05 In this book Hera Cook traces the path of sexuality in England and shows how its route was determined by the gradual exertion of control over fertility. Most sexual activity had major economic and social costs, the most fundamental of which was the physical cost of children upon women's bodies. Around 1800 birth rates reached historical heights. Using a combination of demographic and qualitative sources, Dr Cook examines the connection between the struggle to lower fertility and the increasing repression of sexuality throughout the nineteenth century. Contraception became a viable option in the early twentieth century. The book charts the resulting slow relaxation of attitudes to sexuality and the remaking of heterosexual physical behaviour culminating in the sexual revolution of the 1960s.

Nature, Man and Woman Alan Watts, 2012-07-11 From perhaps the foremost interpreter of Eastern disciplines for the contemporary West and an author who had the rare gift of writing beautifully, the *unwritable* Los Angeles Times a guide that draws on Chinese Taoism to reexamine humanity's place in the natural world and the relation between body and spirit. Western thought and culture have coalesced around a series of constructed ideas that human beings stand separate from a nature that must be controlled; that the mind is somehow superior to the body; that all sexuality entails a seduction that in some way underlies our exploitation of the earth; our distrust of emotion and our loneliness and reluctance to love. Here Watts fundamentally challenges these assumptions, drawing on the precepts of Taoism to present an alternative vision of man and the universe, one in which the distinctions between self and other, spirit and matter give way to a more holistic way of seeing.
