European Aviation Law Paul Stephen Dempsey, 2004-01-01 Once a byword for the economic power of national government with competition strictly regulated European commercial aviation has now virtually become a market without state imposed anticompetitive restrictions Although intended to enhance competition this situation has in fact driven airlines to form massive global alliances cartels that offer ever shrinking benefits to the consumer In this extraordinarily thorough blow by blow analysis of how this happened or was allowed to happen one of the world's most eminent aviation law authorities explores the subject with a lucid insight fully informed by historical breadth and a keen appreciation of current pressures Commercial aviation emerges as the crucible par excellence of the convergence of prevailing global ideology economics and international law Among the numerous interrelated topics investigated in depth by Professor Dempsey the following may be mentioned the principal actors including scores of airlines the European Union and a number of air transport associations the labyrinth of bilateral air transport agreements the relevance of the Treaty of Rome's competition rules and the EU merger regulations to air transport the important Court of Justice cases that circumscribed the zone of application in which the competition rules can regulate air transport French Seamen's Case Transport Policy Decision Olympic Airway Nouvelles Frontières Ahmed Saeed and the 2002 Open Skies Decision the 1991 U.S. EC agreement regarding the application of competition laws the sequence of EU aviation regulatory packages regulation of non economic issues air traffic congestion noise limitations air carrier liability civil aviation accident incident investigations denied boarding compensation the effect of the U.S. government's increasing invocation of antitrust immunity computer reservation systems especially code sharing procedures jointly owned web sites for ticket sales and other e-commerce joint ventures frequent flyer program alliances and the emergence of global megacarriers The author's presentation emphasizes the regulatory constructs that currently affect the European air transport market pricing and tariffs pooling of revenue market access licensing capacity limits traffic rights slot allocation ground handlings cargo services state aid and the power of the EU to act on the commercial aviation world stage for Member

States Each of these areas of analysis begins with an overview of the general regulatory environment for that area followed by a detailed chronological delineation of relevant packages proposals resolutions and regulations Because of the enormous role played by international air transport with respect to gross national product employment and energy consumption European Aviation Law is of great importance not only to European lawyers but to officials policymakers practitioners and academics in a number of relevant fields worldwide Unusual Footnotes to the Korean War Paul Edwards,2013-02-20 A forgotten war in modern history the Korean War is rarely given much recognition or studied in detail In fact it was one of the bloodiest conflicts of the 20th century a deadly clash of world views as the UN allied itself with South Korea against the massed ranks of North Korean armies backed by Communist China In this new book Paul Edwards presents a fresh look at the Korean War focusing on a number of unusual events that happened during the conflict Beginning with a look at the war itself Edwards goes on to tell the stories of the Salvation Army band that disappeared UFO sightings the Pulitzer Prize winning journalist Maggie Higgins and her battle to report in Korea as an equal with her male counterparts and an operation to rescue orphan children It also provides a fascinating look at the propaganda materials dropped over Korea by both sides This miscellany of the war allows readers to dip in and out of this e book only title a perfect e book for the daily commute
