One Hundred Years of Masochism Michael C. Finke, Carl Niekerk, 2000 Just over a century has passed since the sexologist Richard von Krafft Ebing coined the term masochism in a revised edition of his *Psychopathia Sexualis* 1890 Put into circulation as part of the fin de siècle process through which sexuality and sexual practices considered deviant became medicalized this suspicious concept grew in significance and explanatory power in the expanding new context of psychoanalytic discourse Today the study of masochism shows signs of becoming a discipline in its own right the political social and cultural ramifications of which exceed and indeed render problematic traditional psychoanalytic perspectives on the phenomenon The essays in this volume demonstrate however that the concept of masochism still offers a point of entry into psychoanalytic theory that while revealing a number of its most vexing insufficiencies and problematic constructions evokes also a sometimes surprising illuminative potential and capacity to adapt to changing social realities And as the volume's title is meant to suggest the authors represented here tend to agree that the continued rich viability of psychoanalytic theory in cultural analysis is best appreciated and ensured through engaging the theory's own social historical and cultural contexts The volume includes clinical perspectives on masochism and articles on medieval romance Goethe Sacher Masoch Krafft Ebing's *Psychopathia Sexualis* Turgenev Tolstoy Multatuli Fassbinder and masochism and postmodernism

Qualitative-Quantitative Analyses of Dutch and Afrikaans Grammar and Lexicon Robert S. Kirsner, 2014-02-15 Sharing certain assumptions but differing in theory and practice both Columbia School linguistics CS and Cognitive Grammar CG have increasingly supported their analyses with quantitative evidence Citation of individual sentences in isolation or in context has been supplemented with counts of linguistic forms in texts informant questionnaires and perception tests The present volume continuing a dialogue between CS and CG offers six such qualitative quantitative studies one on Afrikaans and five on Dutch Topics include a demonstratives b pragmatic particles and imperatives c a puzzling dismissive idiom d progressive aspect and e indirect objects While CS is better suited for analyzing relatively closed

systems e.g. tense pronouns CG provides more insight into the vagaries of the amorphous lexicon The author also offers personal remarks on linguistics as a path and discusses how in one case a wrong prediction reflects his dual role as both linguist and student of Dutch as a foreign language
