National Space Transportation Policy DIANE Publishing Company,1995-10 A broad assessment of the health and future prospects of the U S space transportation technology and industrial base Examines the Clinton administration policy in light of the implementation plans prepared by NASA DOD and the Transportation and Commerce Dept s Extensive discussion of foreign launch systems and components Identifies 2 additional issues the preservation of long range ballistic missile capabilities after final production in 2005 and the perspective of lower industrial tier firms toward national space transportation policy Charts and tables

The National Space Transportation Policy ,1995 *The national space transportation policy : issues for Congress.* ,1995 In responding to the political and military challenges of the Cold War and the urge to explore and exploit outer space the United States developed a capable fleet of space transportation systems for carrying cargo and people into space and for ensuring a credible strategic nuclear deterrent These systems are owned and managed by the National Aeronautics and Space Administration the Department of Defense and private industry In recent years increasing federal budget constraints commercial competition from foreign launch firms and a desire to continue an ambitious space program have created pressures within the United States to reduce the costs of access to space Significantly lower space transportation costs would make the U S space industry more commercially competitive foster the expansion and creation of new space markets and ensure access to space for government payloads and manned missions This report prepared for the House Committee on Science is the first in a broad assessment of the health and future prospects of the U S space transportation technology and industrial base The report focuses on the Clinton Administration s National Space Transportation Policy which was released last fall It examines administration policy in light of the implementation plans prepared by NASA DOD and the Transportation

and Commerce Departments As the report notes the new policy brings a welcome measure of order to the sometimes chaotic structure of U S space transportation activities The policy also emphasizes the important contribution private industry can make to the direction and development of U S space transportation capabilities However an analysis of the policy and implementation plans also raises some issues that might be of interest to Congress as it debates space transportation legislation oversight and funding
