Lucifers Hammer 1:

Lucifer's Hammer Larry Niven, Jerry Pournelle, 1985-05-12 The first satisfying end of the world novel in years an ultimate one massively entertaining Cleveland Plain Dealer The gigantic comet had slammed into Earth forging earthquakes a thousand times too powerful to measure on the Richter scale tidal waves thousands of feet high Cities were turned into oceans oceans turned into steam It was the beginning of a new Ice Age and the end of civilization But for the terrified men and women chance had saved it was also the dawn of a new struggle for survival a struggle more dangerous and challenging than any they had ever known Take your earthquakes waterlogged condominiums swarms of bugs colliding airplanes and flaming what nots wrap them up and they wouldn't match one page of Lucifer's Hammer for sweaty palmed suspense Chicago Daily News

Lucifer's Hammer Jerry Pournelle, 1981-04 Captain Rick Galloway and his men had been talked into volunteering for a dangerous mission only to be ruthlessly abandoned when faceless CIA higher ups pulled the plug on the operation They were cut off in hostile territory with local troops and their Cuban advisors rapidly closing in And then the alien spaceship landed Copyright Libri GmbH All rights reserved

Cosmic Impact Andrew May,2019-02-07 As end of the world scenarios go an apocalyptic collision with an asteroid or comet is the new kid on the block gaining respectability only in the last decade of the 20th century with the realisation that the dinosaurs had been wiped out by just such an impact Now the science community is making up for lost time with worldwide efforts to track the thousands of potentially hazardous near Earth objects and plans for high tech hardware that could deflect an incoming object from a collision course a procedure depicted with little regard for scientific accuracy in several Hollywood movies Astrophysicist and science writer Andrew May disentangles fact from fiction in this fast moving and entertaining account covering the nature and history of comets and asteroids the reason why some orbits are more hazardous than others the devastating local and global effects that an impact event would produce and more optimistically the way future space missions could avert a catastrophe

Database Modeling Step by Step Gavin Powell,2020-01-06 With the aim of simplifying relational database modeling Database Modeling Step by Step presents the standard approach to database normalization and then adds its own approach which is a more simplistic intuitive way to building relational database models Going from basics to contemporary topics the book opens with relational data modeling and ends with BigData database modeling following a road map of the evolution in relational modeling and including brief introductions to data warehousing and BigData modeling A break down of the elements of a model explains what makes up a relational data model This is followed by a comparison between standard normalization and a more simplistic intuitive approach to data modeling that a beginner can follow and understand A brief chapter explains how to use the database programming language SQL Structured Query Language which reads from and writes to a relational database SQL is fundamental to data modeling because it helps in understanding how the model is used In addition to the relational model the last three chapters cover important modern world topics including denormalization that leads into data warehouses and BigData database modeling The book explains how there is not much to logical data modeling in BigData databases because as they are often schema less which means that BigData databases do not have schemas embedded into the database itself they have no metadata and thus not much of a logical data model Online bonus chapters include a case study that covers relational data modeling and are available at the author s web site www.oracletroubleshooter.com/datamodeling.html

Postapocalyptic Fiction and the Social Contract

Claire P. Curtis, 2010-07-17 *Postapocalyptic Fiction and the Social Contract We'll Not Go Home Again* provides a framework for our fascination with the apocalyptic events. The popular appeal of the end of the world genre is clear in movies, novels, and television shows. Even our political debates over global warming, nuclear threats, and pandemic disease reflect a concern about the possibility of such events. This popular fascination is really a fascination with survival: how can we come out alive? And what would we do next? The end of the world is not about species death but about beginning again. This book uses postapocalyptic fiction as a terrain for thinking about the state of nature, the hypothetical fiction that is the driving force behind the social contract. The first half of the book examines novels that tell the story of the move from the state of nature to civil society through a Hobbesian, a Lockean, or a Rousseauian lens, including *Lucifer's Hammer* by Larry Niven and Jerry Pournelle, *Alas Babylon* by Pat Frank, *Malevil* by Robert Merle, and *Into the Forest* by Jean Hegland. The latter half of the book examines Octavia Butler's postapocalyptic *Parable* series, in which a new kind of social contract emerges, one built on the fact of human dependence and vulnerability.

Beyond 2012: Catastrophe or Awakening? Geoff Stray, 2009-05-21. An illustrated encyclopedic overview of the prophecies, calendars, and theories that indicate the year 2012 is a threshold of great change for humanity. Looks at the scientific and anthropological evidence for the rare galactic alignment due to occur in December 2012. Sifts through the catastrophic theories to show what we might really expect in 2012. In December of 2012, the Mayan Calendar's Great Cycle will come to an end. Opinion remains divided as to whether apocalyptic scenarios of worldwide destruction or utopian visions of a spiritually renewed humanity will prevail after this key date has passed. What is certain, however, is that a rare galactic alignment will occur, one so unique that it is found at the core of many wisdom traditions from around the globe. Geoff Stray has been collecting the vast amounts of data relating to the 2012 phenomena since 1982. Far from confining his research to the Maya, who provide the most prominent predictions indicating this date will herald significant changes for humanity, he has studied the prophetic traditions of other cultures, including the Tibetan, Chinese, Jewish, Ethiopian, and tribal cultures from around the globe, to show the kind of convergence of cosmic purposes happening along a number of parallel tracks. This book offers an extensive study of many modern theories, including Terence McKenna's timewave zero and Maurice Cotterell's sunspot research, as well as anomalous phenomena such as near-death experiences and crop circles. Sifting through all the scientific research and speculation that the year 2012 has inspired, Geoff Stray provides an encyclopedic look at what we might really expect on this pivotal date.

[Rumors of War and Infernal Machines](#) Charles E. Gannon, 2005-08-11. This provocative and unique work reveals the remarkably influential role of futuristic literature on contemporary political power in America. Tracing this phenomenon from its roots in Victorian Britain, *Rumors of War and*

Infernal Machines offers a fascinating exploration of how fictional speculations on emergent or imaginary military technologies profoundly influence the political agendas and actions of modern superpower states Gannon convincingly demonstrates that military fiction anticipated and even influenced the evolution of the tank the development of the airplane and also the bitter political battles within Britain's War Office and the Admiralty In the United States future fictions and Cold War thrillers were an officially acknowledged factor in the Pentagon's research and development agendas and often gave rise and shape to the nation's strategic development of technologies as diverse as automation atomic weaponry aerospace vehicles and the Strategic Defense Initiative Star Wars His book reveals a striking relationship between the increasing political influence of speculative military fiction and the parallel rise of superpower states and their technocentric ideologies With its detailed political historical and literary analysis of U S and British fascination with hi tech warfare this lively and revealing study will appeal to students literary and cultural scholars military and history enthusiasts and general readers

An Informal History of the Hugos Jo Walton, 2018-08-07 Engaged passionate and consistently entertaining An Informal History of the Hugos is a book about the renowned science fiction award for the many who enjoyed Jo Walton's previous collection of writing from Tor.com the Locus Award winning What Makes This Book So Great The Hugo Awards named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society have been presented since 1953 They are widely considered the most prestigious awards in science fiction Between 2010 and 2013 Jo Walton wrote a series of posts for Tor.com surveying the Hugo finalists and winners from the award's inception up to the year 2000 Her contention was that each year's full set of finalists generally tells a meaningful story about the state of science fiction at that time Walton's cheerfully opinionated and vastly well informed posts provoked valuable conversation among the field's historians Now these posts lightly revised have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton Gardner Dozois and David G Hartwell A remarkable guided tour through the field a kind of nonfiction companion to Among Others It's very good It's great New York Times bestselling author Cory Doctorow Boing Boing on What Makes This Book So Great Ecology of Fear Mike Davis, 2022-02-15 A witty and engrossing look at Los Angeles urban ecology and the city's place in America's cultural fantasies Earthquakes Wildfires Floods Drought Tornadoes Snakes in the sea mountain lions and a plague of bees In this controversial tour de force of scholarship unsparing vision and inspired writing Mike Davis the author of City of Quartz revisits Los Angeles as a Book of the Apocalypse theme park By brilliantly juxtaposing L.A.'s fragile natural ecology with its disastrous environmental and social history he compellingly shows a city deliberately put in harm's way by land developers builders and politicians even as the incalculable toll of inevitable future catastrophe continues to accumulate Counterpointing L.A.'s central role in America's fantasy life the city has been destroyed no less than 138 times in novels and films since 1909 with its wanton denial of its own real history Davis creates a revelatory kaleidoscope of American fact imagery and sensibility Drawing upon a vast array of

sources Ecology of Fear meticulously captures the nation's violent malaise and desperate social unease at the millennial end of the American century With savagely entertaining wit and compassionate rage this book conducts a devastating reconnaissance of our all too likely urban future **A Novel Approach to Politics** Douglas A. Pickover, 2009 From the mysterious cult of Pythagoras to the awesome mechanics of Stonehenge to the gargoyles and fractals on today's computers mathematics has always been a powerful even divine force in the world In a lively intelligent synthesis of math mysticism and science fiction Clifford Pickover explains the eternal magic of numbers Taking a uniquely humorous approach he appoints readers Chief Historian of an intergalactic museum and sends them along with a quirky cast of characters hurtling through the ages to explore how individuals used numbers for such purposes as predicting the end of the world finding love and winning wars Bestsellers (Routledge Revivals) John Sutherland, 2010-10-04 First published in 1981 this book offers a study of British and American popular fiction in the 1970s a decade in which the quest for the superseller came to dominate the lives of publishers on both sides of the Atlantic Illustrated by examples of the lurid incidents that catapult so many books into the bestseller charts this comprehensive study covers the work of Robbins Hailey and Maclean the bodice rippers the disaster craze horror war stories and media tie ins such as The Godfather Jaws and Star Wars *Incoming Asteroid!* Duncan Lunan, 2013-10-17 Incoming Asteroid is based on a project within ASTRA the Association in Scotland to Research into Astronautics to provide scientific answers to the question what would we do if we knew there was going to be an asteroid impact in ten years time or less Clearly there are many things humanity can do nothing about for example an unseen object traveling towards us so fast that we have no time to prepare or an object so large it may be unstoppable A realistic hazard

model was decided upon and the scenario developed from that an incoming object about 1 kilometer in diameter in an orbit ranging from the outer rim of the Asteroid Belt to within that of Earth's. Three basic possibilities are considered in this book. The first is the deflection of the asteroid using remote probes along with a number of possible technologies to change the asteroid's course. Second is the attempt of a manned mission in order to plant a propulsion system on the asteroid to push it into a different orbit. Third is the nuclear option, a last ditch attempt to break up and then disperse the asteroid using nuclear weapons. A rather impractical combination of these second and third options were used as the plot of the popular 1998 Bruce Willis feature film *Armageddon*. Although the cost of developing the technology needed to protect the Earth would be substantial, there would certainly be spin off benefits. These could eventually result in practical small scale atomic energy sources, new propulsion systems that could make extraterrestrial mining within the solar system a possibility and other as yet unforeseen benefits. And finally, *Incoming Asteroid* considers the political implications, how governments across the world should best react to the threat with a view to minimizing loss of life and in the weeks running up to the possible impact, preventing panic in the population.
