**Get Goodness** Mike Hickey, 2011-06-16 From the preface This book looks at virtue as the power to do good from the theological philosophical and poetic perspective From a theological perspective Long ago Anselm defined theology as faith seeking understanding f 1 a definition which has endured to the present day It would be difficult if not impossible for anyone to try to understand virtue or goodness without looking through some lens of faith Get Goodness was written in part because my own faith was seeking understanding Second this book will look at virtue and goodness from a philosophical perspective because the word philosophy from the Greek philos sophia means love of wisdom f 2 As we will find in this book the virtue of

love has been understood by most theologians and philosophers before me to be the essence of each and every virtue Therefore we must first love wisdom before we are able to practically discern distinguish deliberate and decide prudently in any effort to understand how virtue is the power to do good Third this book will be suffused with poetry because poetry is a language that goes beyond logic thought and reason It is a language of the spirit and a language of human life love observation and experience Any poem is an attempt to try to understand the experience of the world and the universe around us in spiritual terms None of us should be seeking virtuous perfection in orienting ourselves to the good in this life we should only be seeking change The journey is the goal      *Free Will* Alfred R. Paradoxes of Gambling Behaviour Willem A. Wagenaar,2016-10-14 Why does a large proportion of the population engage

in some form of gambling although they know they are most likely to lose and that the gambling industry makes huge profits Do gamblers simply accept their losses as fate or do they believe that they will be able to overcome the negative odds in some miraculous way The paradox is complicated by the fact that those habitual gamblers who are most aware that systematic losses cannot be avoided are the least likely to stop gambling Detailed analyses of actual gambling behaviour have shown gamblers to be victims of a variety of cognitive illusions which lead them to believe that the general statistical rules of determining the probability of loss do not apply to them as individuals The designers of gambling games cleverly exploit these illusions in order to promote a false perception of the situation Much of the earlier interest in gambling behaviour has been centred on the traditional theories of human decision making where decisions are portrayed as choices among bets This led to a tradition of studying decision making in experiments on betting In this title originally published in 1988 the author argues that betting behaviour should not be used as a typical example of human decision making upon which a general psychological theory could be founded and that these traditional views can in no way account for the gambling behaviour reported in this book

**Campaigns** Nurit Guttman,2014-06-05 This book discusses the use of communication campaigns to promote road safety arguing that they need to elicit public discourse on issues pertaining to culture equity gender workplace norms environmental issues and social solidarity Increasingly new media channels and formats are employed in the dissemination

process making road safety related messages ubiquitous and often controversial Policy makers educators researchers and the public continue to debate the utility and morality of some of the influence tactics employed in these messages such as the use of graphic images of injury or death stigmatization or blame and shame and the use of black humor Guttman argues that influencing road safety requires making changes in normative and cultural conceptions of broader issues in society yet the typical discourse on road safety tends to focus on individual attitudes and practices The book highlights the importance of social and behavioral theory in communication campaigns on road safety and critiques the tendency to focus on individual cognition affect and risk conceptions rather than on normative structural and cultural factors The volume positions the discourse on road safety as a social issue and treats road safety behavior as a social activity that directly relates to other public issues social values and social policy while discussing potential uses of social media and participatory approaches The discussion turns to the role of road safety communication campaigns as part of a democratic process of eliciting public discourse including how contemporary society could address broader issues of risk and safety
