Lucrative Targets United States Air Force In The Kuwaiti Theater Of Operations:

Lucrative Targets: The U.S. Air Force in the Kuwaiti Theater of Operations, 2001 During the late 1970s the United States began revitalizing its Air Force and other military services By the close of the 1980s America had built a force structure that stood ready for a test that very fortunately it never had to meet a major war in Europe The United States faced this dangerous possibility for more than 40 years until in 1989 the Soviet Union abruptly collapsed Americans were still sorting out the implications of this sudden change in world affairs in August 1990 when Iraq invaded Kuwait and precipitated a crisis that led to the military conflict in the Persian Gulf The U S Air Force found itself at war although not the one it had prepared for against the Warsaw Pact powers but one against Saddam Hussein s heavily armed regime This monograph is one in a series of five works dealing with various aspects of the Air Force s participation in Desert Shield and Desert Storm In two other volumes William T Y Blood details the Air Force s deployment to the Gulf in a third Diane T Putney analyzes the planning of the air campaign and in a fourth Richard G Davis discusses the air operations against targets in Iraq As this monograph goes to press during the spring of 2001 the Air Force is passing through a dynamic period of reorganization and change The era when a large U S Air Force defended the United States against a single preeminent threat Soviet aggression has ended During the years ahead a smaller Air Force will support the interests of the nation under diverse circumstances around the globe While the U S Air Force continues to ensure that the United States has a global reach and can project global power the service will greatly benefit from the lessons it learned during Desert Shield and Desert Storm

Beede,2012-08-06 The Small Wars of the United States 1899 2009 is the complete bibliography of works on US military intervention and irregular warfare around the world as well as efforts to quell insurgencies on behalf of American allies The text covers conflicts from 1898 to present with detailed annotations of selected sources In this second edition Benjamin R Beede revises his seminal work bringing it completely up to date including entries on the current conflicts in Iraq and Afghanistan An invaluable research tool The Small Wars of the United States 1899 2009

is a critical resource for students and scholars studying US military history Air Force Magazine ,2002 *Airpower Applied* John Andreas Olsen,2017-05-15 *Airpower Applied* reviews the evolution of airpower and its impact on the history of warfare Through a critical examination of twenty nine case studies in which various U S coalitions and Israel played significant roles this book offers perspectives on the political purpose strategic meaning and military importance of airpower By comparing and contrasting more than seventy five years of airpower experience in very different circumstances readers can gain insight into present day thinking on the use of airpower and on warfare The authors all experts in their fields demystify some of airpower s strategic history by extracting the most useful teachings to help military professionals and political leaders understand what airpower has to offer as a continuation of politics by other means The case studies emphasize the importance of connecting policy and airpower operational effectiveness cannot substitute for poor statecraft As the United States its allies and Israel have seen in their most recent applications of airpower even the most robust and capable air weapon can never be more effective than the strategy and policy it is intended to support Strategic Terror Beau Grosscup,2013-07-18 Presenting a global history of aerial bombardment this book shows how certain European powers initiated aerial bombardment of civilians after World War I and how it was an instrument of choice in World War II Beau Grosscup shows that such methods used initially as a means of terrorizing native populations in Africa and the Middle East have become the primary form of terrorism in more recent decades While such strategic terror is not classed as terrorism in the West this reflects an unwillingness to confront the human costs and immorality of aerial bombardment Grosscup argues that if terrorism is to be diminished the role of aerial bombing in sustaining global violence must be recognized *Fighting from Above* Brian D. Laslie,2024-03-19 The story of the United States Air Force USAF stretches back to aerial operations prior to the First World War well before the USAF became a separate service and looks forward to a new era of airpower in space *Fighting from Above* presents a concise account of this expansive history offering a new perspective on how the air forces of the United States created an independent way of warfare over time From the earliest battles of the USAF s predecessor organizations to its modern incarnation Brian D Laslie identifies four distinct and observable ways of war that developed over four distinct epochs Beginning with the development of early air power 1906 1941 he highlights the creation of roles and missions with bombardment theory and practice ascendant An era of strategic dominance 1942 1975 followed in which the ideas of strategic bombardment ruled the air force when such notions were unceremoniously proven false during the Vietnam era conflicts a period of tactical ascendancy 1975 2019 began Finally Laslie considers the current environment where much of the story of the USAF remains unwritten as it grapples with the prospects and challenges posed by drones and the U S Space Force While detailing combat operations *Fighting from Above* also pays close attention to technology politics rivalries logistics policy organization equipping and training Thorough concise and innovative in its approach it is an authoritative exceptionally readable history of the development of American airpower Global Air Power John Andreas

Olsen,2011-02 Presents a regional national and global overview of air power Written by a cadre of military specialists who offer global perspectives Assesses its cultural as well as military influences *John Warden and the Renaissance of American Air Power* John Andreas Olsen,2007-06-30 Included on the Chief of Staff of the United States Air Force s reading list for 2008 and the Royal Air Force s Centre for Air Power Studies 2008 Reading List Dr John Andreas Olsen has written an insightful compelling biography of retired U S Air Force colonel John A Warden III the brilliant but controversial air warfare theorist and architect of Operation Desert Storm s air campaign Warden s radical ideas about air power s purposes and applications promulgated at the expense of his own career sparked the ongoing revolution in military affairs Legendary in defense circles Warden is also the author of *The Air Campaign Planning for Combat* republished by Brassey s Inc in 1989 Presenting both the positives and negatives of Warden s personality and impact in this objective portrait Olsen offers a trenchant analysis of his revolutionary ideas and great accomplishments **Reconsidering a Century of Flight** Roger D. Launius,Janet R. Daly Bednarek,2015-12-01 On December 17 1903 Orville and Wilbur Wright soared into history during a twelve second flight on a secluded North Carolina beach Commemorating the 100th anniversary of the first flight these essays chart the central role that aviation played in twentieth century history and capture the spirit of innovation and adventure that has characterized the history of flight The contributors all leading aerospace historians consider four broad themes relating to the development of flight technology innovation and the technology of flight civil aeronautics and government policy aerial warfare and aviation in the American imagination Through their attention to the political economic military and cultural history of flight the authors establish that the Wrights invention and all that followed in both air and space was one of the most significant technologies of the twentieth century fundamentally reshaping our world Supported by the First Flight Centennial Commission The contributors are Janet R Daly Bednarek Tami Davis Biddle Roger E Bilstein Hans Joachim Braun David T Courtwright Anne Collins Goodyear Roger D Launius William M Leary David D Lee W David Lewis John H Morrow Dominick A Pisano and A Timothy Warnock
