Museo di storia della scienza Istituto e museo di storia della scienza (Italy), Mara Miniati, 1991 Material recogido en el Museo de la Ciencia de Florencia *General Catalogue of Printed Books* British Museum. Department of Printed Books, 1969 Annali dell'Istituto e museo di storia della scienza di Firenze Istituto e museo di storia della scienza (Italy), 1982 **The Italian Genius on Display** Francesco Barreca, 2022-07-04 Held in Florence in 1929 the First National Exhibition of History of Science was a pivotal event in the shaping of Italian cultural panorama With more than 8000 items on display coming from public and private lenders it showed the general public how rich the Italian scientific heritage was and how it could be regarded as part of a general nation claiming narrative thus laying the foundation for today's protection policy and scholarly research Moreover it is also a telling case study that offers precious insights into the complex relationships between cultural enterprises and political power during the fascist era helping us understand how today's geography of Italian cultural institutions have been shaped and reshaped through time **Catalogue of Sun-dials, Nocturnals and Related Instruments** Anthony John Turner, 2007 The earliest sundials known from the archaeological record are the obelisks c 3500 BCE and shadow clocks c 1500 BCE In c 700 BCE the Old Testament describes a sundial as does Roman writer Vitruvius around 15 BCE Italian astronomer Giovanni Padovani published a treatise on the sundial in 1570 which included instructions for its manufacture This engrossing catalogue concentrates on the half millennium from the 14th to the 19th century and presents a wealth of instruments that will both fascinate and educate the collector Originally published in 2007 *Irish National Inventory of Historic Scientific Instruments* Charles Mollan, 1995-11-15 Carried out over a period of ten years this is a listing of scientific instruments dating before 1920 preserved in many collections throughout the island of Ireland It gives location date and description for each of the more than 5 000 entries together where appropriate with relevant accompanying detail It demonstrates clearly that Ireland has an important resource which hitherto had not been appreciated It also preserves information about collections which have since been lost sold or otherwise dispersed Scientific Instruments on Display, 2014-08-14 During their active lives scientific instruments generally inhabit the laboratory observatory classroom or the field But instruments have also lived in a wider set of venues as objects on display As such they acquire new levels of meaning their cultural functions expand This book offers selected studies of instruments on display in museums national fairs universal exhibitions patent offices book frontispieces theatrical stages movie sets and on line collections The authors argue that these displays as they have changed with time reflect changing social attitudes towards the objects themselves and toward science and its heritage By bringing display to the center of analysis the collection offers a new and ambitious framework for the study of scientific instruments and the material culture of science Contributors are Amy Ackenberg Hastings Silke Ackermann Marco Beretta Laurence Bobis Alison Boyle Fausto Casi Ileana Chinnici Suzanne D barbat Richard Dunn Inga Elmqvist S derlund Ingrid Jendrzewski Peggy A Kidwell Richard Kremer

Mara Miniati Richard A Paselk Donata Randazzo Steven Turner **Renaissance Astrolabes and their Makers** Gerard L'E. Turner, 2024-10-28 This book is about the archaeology of science or what can be learnt from the systematic examination of the artefacts made by precision craftsmen for the study of the natural world An international authority on historical scientific instruments Gerard Turner has collected here his essays on European astrolabes and related topics By 1600 the astrolabe had nearly ceased to be made and used in the West and before that date there was little of the source material for the study of instruments that exists for more modern times It is necessary to read the instruments themselves and astrolabes in particular are rich in all sorts of information mathematical astronomical metallurgical in addition to what they can reveal about craftsmanship the existence of workshops and economic and social conditions There is a strong forensic element in instrument research and Gerard Turner's achievements include the identification of three astrolabes made by Gerard Mercator all of whose instruments were thought to have been destroyed Other essays deal with the discovery of an important late 16th century Florentine workshop and of a group of mid 15th century German astrolabes linked to Regiomontanus

Scientific Instruments, 1500-1900 Gerard L'Estrange Turner, 1998 The impulse to collect is universal Collections containing natural curiosities date from the 16th century and it was this type of collection in which scientific instruments found a home This book traces the historical origins and development of instruments as they spread across the globe explaining their manufacture use and adaptations 91 color and 20 b w plates *The Cambridge History of Science: Volume 4, Eighteenth-Century Science* David C. Lindberg, Roy Porter, Ronald L. Numbers, 2003-03-17 The fullest and most complete survey of the development of science in the eighteenth century *Instruments in Art and Science* Helmar Schramm, Ludger Schwarte, Jan Lazardzig, 2014-08-29 This volume presents a collection of original papers at the intersection of philosophy the history of science cultural and theatrical studies Based on a series of case studies on the 17th century it contributes to an understanding of the role played by instruments at the interface of science and art The papers pursue the hypothesis that the development and construction of instruments make a substantive contribution to the opening of new fields of knowledge the development of new cultural practices but also to the delineation of particular genres methods and disciplines This perspective leads the authors to reflect anew on what actually defines an instrument and to develop a series of basic questions to determine what an instrument is which actions does the instrument incorporate which actions does the instrument make possible when do the objects of examination themselves become instruments what skills are required to use an instrument which skills does it produce With its combination of new theoretical models and historical case studies its detailed demonstration of the mutual influence of art and science with the instrument as the point of intersection this volume enters new territory It is of great value for all those interested in the history of our perception of instruments Besides the editors the authors of the papers are J rg Jochen Berns Olaf Breidbach Georges Didi Huberman Peter Galison Sybille Kr mer Dieter Mersch Hans J rg Rheinberger Wilhelm Schmidt Biggemann and Otto Sibum **Making Marvels** Wolfram

Koeppel, Noam Andrews, Florian Thaddäus Bayer, Jens Ludwig Burk, Wolfram Dolz, Ana Matisse Donefer-Hickie, Karsten Gaulke, Michael Korey, Lothar Lambacher, Peter Plassmeyer, Paulus Rainer, Antje Scherner, Konrad Schlegel, Pamela H. Smith, Dirk Syndram, 2019-11-25 Featuring more than 150 treasures from several of the world's most prestigious collections *Making Marvels* explores the vital intersection of art, technology and political power at the courts of early modern Europe. It was there from the sixteenth through eighteenth centuries that a remarkable outpouring of creativity and learning gave rise to exquisite objects that were at once beautiful works of art and technological wonders. By amassing vast glittering collections of these ingeniously crafted objects, princes flaunted their wealth and competed for mastery over the known world. More than mere status symbols, however, many of these marvels ushered in significant advancements that have had a lasting influence on astronomy, engineering and even international politics. Incisive texts by leading scholars situate these works within the rich, complex symbolism of life at court where science and splendor were pursued with equal vigor and together contributed to a culture of magnificence.

Encyclopedia of the Scientific Revolution Wilbur Applebaum, 2003-12-16 With unprecedented current coverage of the profound changes in the nature and practice of science in sixteenth and seventeenth century Europe, this comprehensive reference work addresses the individuals, ideas and institutions that defined culture in the age when the modern perception of nature of the universe and of our place in it is said to have emerged. Covering the historiography of the period, discussions of the Scientific Revolution's impact on its contemporaneous disciplines and in-depth analyses of the importance of historical context to major developments in the sciences. The *Encyclopedia of the Scientific Revolution* is an indispensable resource for students and researchers in the history and philosophy of science.

Astrolabes from Medieval Europe David A. King, 2024-10-28 This is the fourth set of studies in the *Variorum* series by David King, a leading authority on the history of astronomy in Islamic civilization and on medieval astronomical instruments, European as well as Islamic. The first of the eleven studies collected here deals with medieval instruments in general as precious historical sources. The following papers focus on individual astrolabes from the European Middle Ages and early Renaissance that are of singular historical importance. Two look at the origins of the simple universal horary quadrant and the complicated universal horary dial, the *navicula*. The collection concludes with a list of all known medieval European astrolabes ordered chronologically by region. Three landmark astrolabes are discussed: 1. the earliest known European astrolabe from 10th century Catalonia, the milieu in which the astrolabe first became known to Europeans; 2. an astrolabe from 14th century Picardy bearing numerals written in monastic ciphers as well as a later dedication mentioning two friends of Erasmus; 3. the splendid astrolabe presented in 1462 by the German astronomer Regiomontanus to his patron Cardinal Bessarion with its enigmatic angel and Latin dedication, here presented in the context of other astrolabes of similar design from 15th century Vienna.
