Music The Twentieth Century Media:

20th Century Media and the American Psyche Charisse L'Pree Corsbie-Massay, 2020-10-13 This innovative text bridges media theory psychology and interpersonal communication by describing how our relationships with media emulate the relationships we develop with friends and romantic partners through their ability to replicate intimacy regularity and reciprocity In research rich conversational chapters the author applies psychological principles to understand how nine influential media technologies theatrical film recorded music consumer market cameras radio network and cable television tape cassettes video gaming and dial up internet service providers irreversibly changed the communication environment culture and psychological expectations that we then apply to future media technologies With special attention to mediums absent from the traditional literature including recorded music cable television and magnetic tape this book encourages readers to critically reflect on their own past relationships with media and consider the present environment and the future of media given their own personal habits 20th Century Media and the American Psyche is ideal for media studies communication and psychology students scholars and industry professionals as well as anyone interested in a greater understanding of the psychological significance of media technology usage and adoption across the past 150 years *Music and the twentieth century media* Jack Bornoff, 1972 *Twentieth Century Media* Steve Parker, 2002 Takes a close look at the technical triumph of satellite communication and highlights pop art as well as the raw images captured by photojournalists around the world *Berlioz and His World* Francesca Brittan, Sarah Hibberd, 2024-08-05 A collection of essays and short object lessons on the composer Hector Berlioz published in collaboration with the Bard Music Festival Hector Berlioz 1803 1869 has long been a difficult figure to place and interpret Famously in Richard Wagner's estimation he hovered as a transient marvelous exception a composer woefully and willfully isolated In the assessment of German composer Ferdinand Hiller he was a fleeting comet who does not belong in our musical solar system the likes of whom would never be seen again For his contemporaries as for later critics Berlioz was simply too strange and too noisy too loud too German too literary too cavalier with genre and form and too difficult to analyze He was in many ways a composer without a world Berlioz and His World takes a deep dive into the composer's complex legacy tracing lines between his musical and literary output and the scientific sociological technological and political influences that shaped him Comprising nine essays covering key facets of Berlioz's contribution and six short object lessons meant as conversation starters the book reveals Berlioz as a richly intersectional figure His very difficulty his tendency to straddle the worlds of composer conductor and critic is revealed as a strength inviting new lines of cross disciplinary inquiry and a fresh look at his European and American reception

Baudelaire in Song Helen Abbott, 2017-11-03 Why do we find it hard to explain what happens when words are set to music This study looks at the kind of language we use to describe word music relations both in the academic literature and in manuals for singers or programme notes prepared by professional musicians Helen Abbott's critique of word music relations

interrogates overlaps emerging from a range of academic disciplines including translation theory adaptation theory word music theory as well as critical musicology music theory and cognitive neuroscience It also draws on other resources whether science or financial modelling to inform a new approach to analysing song in a model proposed here as the assemblage model The assemblage model has two key stages of analysis The first stage examines the bonds formed between the multiple layers that make up a song setting including metre prosody form structure sound repetition semantics and live performance options The second stage considers the overall outcome of each song in terms of the intensity or stability of the words and music present in a song accretion dilution Taking the work of the major nineteenth century French poet Charles Baudelaire 1821-67 as its main impetus the volume examines how Baudelaire's poetry has inspired composers of all genres across the globe from the 1860s to the present day The case studies focus on Baudelaire song sets by European composers between 1880 and 1930 specifically Maurice Rollinat Gustave Charpentier Alexander Gretchaninov Louis Vierne and Alban Berg Using this corpus it tests out the assemblage model to uncover what happens to Baudelaire's poetry when it is set to music It factors in the realities of song as a live performance genre and reveals which parameters of song emerge as standard for French text setting and where composers diverge in their approach

Speechsong Richard Cavell, 2020 Speechsong is a work of imaginative musicology that addresses the enigmas of Schoenberg and Gould of singing and speaking of Moses and Aron of technology and being Its point of departure is Gould's last public performance given at the Wilshire Ebell Theatre in Los Angeles where a number of Schoenberg's works were performed during his California exile It is here after that last performance that Gould encounters a spectral Schoenberg in a staged conversation that explores Schoenberg's travails in

rethinking the fundamentals of Western music This first part of *Speechsong* recalls Schoenberg's operatic masterpiece *Moses und Aron* in which the divinely inspired Moses seeks the help of his brother to relate his vision Moses speaks and Aron sings Written as a twelve tone composition the opera produces an involution of harmonics that was Schoenberg's response to Richard Wagner's diatribes about synagogue noise For Gould Schoenberg's is a formalist revolution Schoenberg's life however suggests that it was a search for personal and political freedom The second half of *Speechsong* is a critical essay in twelve moments that re-articulates the staged conversation as an inquiry into the intersections of music and mediation Gould's turn to the recording studio emerges as a post-humanist inquiry into recorded music as a repudiation of the virtuoso tradition and a liberation from unitary notions of selfhood Schoenberg's exodus from musical tradition likewise takes his twelve tone invention beyond musical performance where it emerges along with Gould's soundscapes as a prototype of acoustic installations by artists such as Stephen Prina and Cory Arcangel In these works music abandons the concert hall and the exigencies of harmony for an acoustic space that embraces at once the recordings of Gould and the performances of Schoenberg that have found their home on the internet Richard Cavell has written extensively on Marshall McLuhan and on media theory generally He is the co-founder of the Media Studies program at the University of British Columbia and the curator of the website *Spectres of McLuhan* *Speechsong* his second critical performance piece was preceded by *Marinetti Dines with the High Command* 2014

The Last Mixtape Seth Long, 2025-07-16 A reflection on the evolution of physical media into metaphor through the history of music curation Obsolescence makes the heart grow fonder at least in the case of the mixtape Not all technologies are so lucky Some say wax cylinders fade almost completely from cultural memory A lucky few pass into metaphor we still hang up our smartphones cut film and patch computer code As digital streaming completes the obsolescence of physical media what will become of the humble cassette In *The Last Mixtape* Seth Long offers a microhistory of music curation anchored by the cassette from which he explores the meanings of obsolescence ownership nostalgia and the speed of cultural change A moving meditation on our relationship with music memory and curation in the digital century Long ultimately calls for a return to the media ecology represented by the mixtape a world in which media is cheap and abundant but tactile and meaningfully engaged

[An Eye for Music](#) John Richardson, 2011-11-14 The music we hear is always inhabited by voices of previous performances Because listening is now so often accompanied by moving images this process is more complex than ever Music videos television and

film music interactive video games and social media are now part of the contemporary listening experience In *An Eye for Music* author John Richardson navigates key areas of current thought from music theory to film theory to cultural theory to explore what it means that the experience of music is now cinematic spatial and visual as much as it is auditory Richardson maps out the terrain of recent audiovisual production over a wide array of styles and practices and sketches out a set of common structures that inform how we experience sound and vision Whether examining Philip Glass or The Gorillaz Richard Linklater's *Waking Life* or Michel Gondry's *Be Kind Rewind* Richardson's arguments are both fascinating and provocative

Soundtracked Books from the Acoustic Era to the Digital Age Justin St. Clair, 2022-06-15 Offering both a short history and a theoretical framework this book is the first extended study of the soundtracked book as a media form A soundtracked book is a print or digital publication for which a recorded musical complement has been produced Early examples were primarily developed for the children's market but by the middle of the twentieth century ethnographers had begun producing book and record combinations that used print to contextualize musical artifacts The last half century has witnessed the rapid expansion of the adult market including soundtracked novels from celebrated writers such as Ursula K Le Guin Kathy Acker and Mark Z Danielewski While often dismissed as gimmicks this volume argues that soundtracked books represent an interesting case study in media consumption Unlike synchronous multimedia forms the vast majority of soundtracked books require that audience activity be split between reading and listening thus defining the user experience and often shaping the content of singing books as well Mapping the form's material evolution this book charts a previously unconsidered pathway through more than a century of recording formats and packaging strategies emphasizing the synergies and symbioses that characterize the marriage of sound and print As such it will be of value to scholars and postgraduate students working in
