Eye hEar The Visual in Music Simon Shaw-Miller,2017-07-05 Eye hEar The Visual in Music employs the concept of the visual in proximate relation to music producing a tension is it not the case that there is a gulf between painting and music between the visible and the audible One is full of colour and light yet silent one is invisible and marvellously noisy Such a belief this book argues betrays an ideological constraint on music desiccating it to sound and art to vision The starting point of this study is more hybrid and hydrating that music is never employed without numerous and complex intersections with the visual By involving the concept of synaesthesia the book evokes music's multi sensory nature stops it from sounding alone and offers music as a subject for art historians Music bleeds into art and visuality in its graphic depiction in notation in the theatre of performance its sights and sites This book looks at music in its absolute guise as a model for art at notation and the conductor as the silent visual fulcrum around which music circulates at the music and image of Erik Satie at the concert hall as white cube at the symphonic film 2001 A Space Odyssey and at the liminality of John Cage and Andy Warhol
