RGN. KHALID SAEED ALI ALQAHTANI, LPN. SAAD AYED AWDHAH, RGN. ABDULRAHEM SALMAN HAMDAN ALMALKI, Nursing is not just a profession its a calling and that calling is made of threads of compassion care and courage Compassion Care and Courage A Nurse's Journey is a document of individual experience and a testament from the rest of us to those who roam hospital and home hallways professing our profession with confident hands tender hearts and unwavering nerves From the prenatal beginning sparks of excitement in childhood to silent will ushering genius called for in the most critical moments the nursing career is paved in profound experience some bright and shining others painful but all fundamentally human We encounter others at some of the most vulnerable points in their lives as nurses We hear their fears their hopes and sometimes their last words This privilege is sacred Within these pages are tales woven from sweat and sacrifice chapters buoyed by clinical expertise and moments developed out of compassion and perseverance In this episode we look at the history of the profession from the wards lit by the lantern of Florence Nightingale to the telehealth platforms of the 21st century We salute nursing educators researchers frontline responders and the many who are characteristically practicing change agents in boardrooms and policy circles The many chapters in here contribute to different aspects of nursing life be it the ethical dilemmas burnout leading through a crisis or in finding joy through patients and reflection What I'd really like to accomplish

is not just documenting the journey of one nurse but a message that all nurses out there for what we are and why it goes beyond you or me I invite the different readers nurses students patients and those who just have to be curious to walk this pathway with me I hope you walk away with a greater respect for the quiet strength of nurses the emotional labor that they carry and the bravery of caring deeply in a world that often hurries Let this book be a mirror and a map a mirror for reflection on where we have been and a map for where the heart of nursing needs to go

The Nurse in Popular Media Marcus K. Harmes, Barbara Harmes, Meredith A. Harmes, 2021-10-28 The image of the nurse is ubiquitous both in life and in popular media One of the earliest instances of nursing and media intersecting is the Edison phonographic recording of Florence Nightingale's voice in 1890 Since then a parade of nurses good bad or otherwise has appeared on both cinema and television screens How do we interpret the many different types of nurses real and fictional lifelike and distorted sexual and forbidding who are so visible in the public consciousness This book is a comprehensive collection of unique insights from scholars across the Western world Essays explore a diversity of nursing types that traverse popular characterizations of nurses from various time periods The shifting roles of nurses are explored across media including picture postcards film television journalism and the collection and preservation of uniforms and memorabilia

Organisation and Management of Intensive Care D. Reis Miranda, D.W. Ryan, Wilmar Schaufeli, V. Fidler, 2012-12-06 From the viewpoint of a health economist the intensive care unit (ICU) is a particularly fascinating phenomenon It is the epitome of high tech medicine and frequently portrayed as the place where life saving miracles are routinely wrought But the popular imagination is also caught up in the darker side when agonizing decisions have to be made to avoid futile and inhuman continuation of expensive treatments My analytical interests led me to approach these issues by asking what the evidence tells us about which ICU activities are very beneficial in relationship to their costs and which are not This quickly translates into a slightly different question namely which patients are most appropriately treated in an ICU and which not Unfortunately it is very hard to answer these questions because it has proved very difficult to investigate these issues in the manner which is now regarded as the gold standard namely by conducting randomized clinical trials or alternative courses of action I think this is a pity and I am not at all convinced that it would be unethical to do so in many cases because there is wide variation in practice and genuine doubt as to which practices are best the two conditions that need to be fulfilled before such a trial is justifiable
