Psychologically

Informed Physiotherapy E-Book Stuart Porter, 2016-11-18 Psychologically Informed Physiotherapy is a key new textbook for those who need a trusted and comprehensive resource to guide them in applying psychosocial perspectives to their physiotherapy practice. The first of its kind, this textbook brings together an international and interdisciplinary team of leading experts in the field. Together they present an evidence-based range of ideas and concepts around the psychologically informed practice framework, bringing psychosocial aspects of physiotherapy to the fore alongside the established biomedical model. By applying these aspects to screening, exploration, and triaging, physiotherapists are better able to identify the origins of pain and barriers to rehabilitation and so are more likely to achieve consistently good clinical outcomes for their patients. Throughout, clinical case studies ensure that the theory is then grounded in a variety of practical scenarios, after which some reflective exercises and clinically relevant scenarios reinforce learning and understanding. Chapters on Psychology of professional identity in health care, The biopsychosocial model, Screening for red flags, Adapting interactions with others to form empowering relationships and influence behavioural change, Neuro-immune-endocrine interactions and clinical practice in stress, pain and recovery, Care of the anxious patient through cognitive and person-centred strategies, Alternative and evolving models of practice including the clinical flag system, The psychology of the athlete from the physiotherapist's perspective, Using counselling and psychological strategies within physiotherapy, Making evidence-based decisions and measuring effectiveness in practice, Using psychological interventions as a student or new graduate. First textbook of its kind for physiotherapists. Ideal confidence booster for both students and practitioners new to the subject. Illustrates the role social factors have on thoughts, emotions, and behaviour in patients as well as the neurobiological manifestations of social stressors. Presents key evidence-based concepts from leading international academics, clinicians, and researchers in the field and across a range of health professions including counselling and psychology. *Architectures of Care* Brittany Utting, 2023-12-05 Drawing from a diverse range of interdisciplinary voices, this book explores how spaces of care shape our affective, material, and social forms from the most intimate scale of the body to our planetary commons. Typical definitions of care center around the maintenance of a livable life encompassing everything from shelter and welfare to health and safety. Architecture plays a fundamental role in these definitions inscribed in institutional archetypes such as the home, the hospital, the school, and the nursery. However, these spaces often structure modes of care that prescribe gender roles, bodily norms, and labor practices. How can architecture instead engage with an expanded definition of care that questions such roles and norms, producing more hybrid entanglements between our bodies, our collective lives, and our environments? Chapters in this book explore issues ranging from disabled domesticities and nursing unbuilding whiteness in the built environment, practices and pedagogies of environmental care, and the solidarity networks within The Cloud. Case studies include Floating University Berlin, commoning initiatives by the Black Panther party, and hospitals for the United Mine Workers of America among many other sites and scales of care. Exploring architecture through the lenses of gender studies, labor theory, environmental justice.

and the medical humanities this book will engage students and academics from a wide range of disciplines LPN to RN Transitions Nicki Harrington, Cynthia Lee Terry, 2008-01-01 Now in its Third Edition this book meets the needs of practical vocational nurses and nursing faculty as they work together to smooth the transition from the LPN to the RN role The text provides interactive student exercises and strategies to socialize the LPN nurse student into an RN program taking into consideration its philosophy and curricular framework This Third Edition includes an expanded chapter on communication and a new chapter on the NCLEX **Surveillance Practices and Mental Health** Suki Desai, 2021-12-30 This book examines how CCTV cameras expose the patient body inside the mental health ward especially the relationship between staff and patients as surveillance subjects A key aspect of the book is that existing surveillance literature and mental health literature have largely ignored the influence of CCTV cameras on patient and staff experiences inside mental health wards Research findings for this book suggest that camera use inside mental health wards is based on a perception of the violent nature of the mental health patient This perception not only influences ethical mental health practice inside the ward but also impacts how patients experience the ward It is not known how and why CCTV camera use has expanded to its uses inside mental health wards These include not only communal areas of the ward but also patient bedrooms The research therefore examines how and why camera technology was introduced inside three Psychiatric Intensive Care Mental Health Units located in England UK Aimed at both undergraduate and postgraduate students this book will appeal to sociology mental health and surveillance studies students as well as practitioners in mental health nursing caseworkers and social caregivers
