Poland Economic Management For A New Era

Manfred Kremer, Marion Weber

Poland Economic Management For A New Era:

Poland ,1990 **Transforming Economic Systems: The Case of Poland** Manfred Kremer, Marion Weber, 2013-04-17
This book deals with the transformation of the Polish centrally planned system to a western type market system Poland represents the most interesting case to study as it runs an unprecedentedly radical and fast course of reform The book provides insights in the theoretical foundations of the transformation of an economic system as well as a critical assessment of first experiences in Poland As the authors develop theoretical approaches as well as study the empirical situation the book offers valuable insights both to the reader who is rather theoretically interested and to a pragmatically orientated audience One of the main features of the book is the broad variety of the subjects chosen for analysis and of the respective approaches taken by the authors who mostly specialize in the fields they worked on for this book Poland ,1990 *Economic Reforms in New Democracies* Luiz Carlos Bresser Pereira, José María Maravall, Adam Przeworski, 1993-04-30 This assessment of the experiences of political transition in Southern Europe Latin America and Eastern Europe implies that the most successful reforms have been those resolved through democratic negotiation as opposed to the big bang approach **Stabilization and Privatization in Poland** K. Poznanski, 2012-12-06 Stabilization and Privatization An Economic Evaluation of the Shock Therapy Program is the first comprehensive account of Poland's economic transition since mid 1989 Monetary stabilization trade liberalization including convertibility and privatization of state capital assets are discussed Sources of economic recession which have accompanied the post 1989 transition are analyzed The role of demand side factors i.e. monetary contraction is weighed against that of supply side factors i.e. credit availability The prevailing view is that the recession has been supply type rather than demand type Economic performance has been impacted by the lack of a proper institutional framework e.g. a segmented banking sector diluted property rights Arguments in favor of evolutionary reforms and market enhancing measures are presented Stabilization and Privatization examines the main components of Poland's shock therapy program implemented in 1990 Post shock recession lasting at least through 1992 is examined to establish whether a sharp decline in output was caused by excessive demand contraction or lack of accommodating credit policies The merits of an evolutionary approach and a more proactive state are debated **Economic Aspects of German Unification** Paul J.J. Welfens, 2012-12-06 Paul J.J. Welfens The editor is pleased to present a second edition of Economic Aspects of German Unification which includes new chapters and several postscripts Almost five years after unification output in the ex GDR is back to its 1989 level Due to a massive intra German resource transfer consumption per capita in eastern Germany has not fallen as much as output and employment which reduced by one fifth within three years Given high West German transfers which represented about 5% of West German GDP and more than 50% of East German GDP the fall of industrial output could have been much stronger than had politically been feasible Hence structural change necessary for productivity growth was dramatic in the ex GDR where the goods producing sector manufacturing mining energy and construction strongly changed

its proportions within four years construction almost doubled and the share of investment goods production reduced by 10 percentage points between 1990 and 1994 and is now down to 21.1 %. Mining lost two thirds of its share in the producing sector which itself was reduced relative to GDP. The share of the services industry increased by 5 percentage points between 1991 and 1994 but with a share of 27.7% in East Germany's GDP it was still about 9 percentage points lower than in western Germany. By contrast government accounted for 20.9% of GDP in eastern Germany but for only 13.2% in western Germany.

Market-oriented Systemic Transformations in Eastern Europe Paul J.J. Welfens, 2012-12-06 Socialist economies in Eastern Europe have collapsed and embarked upon market oriented reforms. The causes of the demise of centrally planned economies are analyzed and the basic challenges of systemic transformation discussed. Negative income and wealth effects as well as distribution issues make adjustment extremely difficult. The fundamental roles of privatization and foreign investment are addressed. Foreign economic liberalization is considered to be of central importance for a growth oriented adjustment path in a stage of conflict prone policy and options. Political economic aspects of the new European developments in addition to North-South issues are analyzed. Difficult choices await decision makers in economic policy and the business community in Eastern Europe and in leading market economies.

Comparative Public Administration Eric E. Otenyo, Nancy S. Lind, Lawrence R. Jones, 2006-07-24 Public administration scholars and practitioners are increasingly concerned with the need to broaden the field's scope beyond particularistic accounts of administration in given countries. This title brings together seminal readings in comparative development public administration and contemporary public management scholarship.

Managing the Transition Eric Rice, 1991 The consensus of dozens of Bank and outside experts on issues and measures essential to government reform in six Eastern European economies changing to a market economy and on how external agencies can best aid the reform process.

The East European Economy in Context David Turnock, 2003-09-02 Since 1989 the former communist countries of Eastern Europe have witnessed a profound and dramatic upheaval. The economic coherence of this region formerly maintained through the adoption of the Soviet system of government has fractured. In *The East European Economy in Context: Communism and Transition* David Turnock examines the transition from communist to free market economies both within and between the states of Eastern Europe. As well as containing an informative survey of the impact of communism, *The East European Economy in Context* provides political profiles of individual countries. A clear study of the contrasts between northern and Balkan groups. Summaries of regional variations in the transition process. An exploration of the new state structures and resources. Discussion of political stability, inter-ethnic tensions and progress in economic change.

How the Market Transition Affected Export Performance in the Central European Economies Bart?omiej Kami?ski, **German Unification and the International Economy** Bernhard

Heitger, Leonard Waverman, 2005-06-23 First published in 1993 Routledge is an imprint of Taylor Francis, an information company.

The Transition in Eastern Europe, Volume 2 Olivier Jean Blanchard, Kenneth A. Froot, Jeffrey D.

Sachs,2007-12-01 When communism fell in 1989 the question for most Eastern European countries was not whether to go to a market economy but how to get there Several years later the difficult process of privatization and restructuring continues to concern the countries of the region The Transition in Eastern Europe Volumes 1 and 2 is an analysis of the experiences of various countries making the transition to market economies and examines the most important challenges still in store Volume 1 Country Studies gives an in depth country by country analysis of various reform experiences including historical backgrounds and discussions of policies and results to date The countries analyzed are Poland Czechoslovakia Hungary eastern Germany Slovenia and Russia Written by leading economists some of whom helped shape local and national reforms this volume identifies common progress common difficulties and tentative solutions to the problems of economic transition Volume 2 Restructuring focuses on specific issues of transition including how to design labor market institutions privatization new fiscal structures and bankruptcy laws how to reorganize foreign trade and how to promote foreign direct investment The articles written by experts in the field will be of direct help to those involved in the transition process These volumes provide a standard reference on economic transition in the region for policymakers in Eastern Europe and in western countries for international agencies concerned with the transition process and for anyone interested in learning about the dramatic changes that have recently occurred in Eastern Europe

The Economy of Poland Mark E. Schaffer,1992 Trade Liberalization and the Transition to a Market Economy Oleh Havrylyshyn,David G. Tarr,1991 Trade liberalization is more important to Eastern and Central European economies than to reforming nonsocialist economies and will also benefit the reforming socialist economies more But it must be accompanied or quickly followed by rapid privatization

Historical Dictionary of the World Bank Sarah Tenney,Anne C. Salda,2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute This second edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years Meanwhile the list of acronyms reminds us just who the main players are And the bibliography directs readers to useful internal documentation and outside studies

Framing Democracy John K. Glenn,2003-08-01 In 1989 newly formed civic movements replaced long standing Leninist regimes in Eastern Europe with democratic governments This book addresses such questions as how similar were the Leninist regimes before their dissolution how similar were their demises and ultimate outcome How

did the way communism fell affect the founding of democracies in Eastern Europe notably in Poland and Czechoslovakia

When Does Rent-Seeking Augment the Benefits of Price and Trade Reform on Rationed Commodities? Estimates for Automobiles and Color Televisions in Poland David G. Tarr, 1991 Price controls result in rents and in rent seeking Where the rent seeking dissipates the rents the costs of the price controls are magnified enormously above the traditional resource misallocation costs But there are cases where rent seeking does not dissipate the rents *Aid in Place of Migration?* W. R. Böhning, International Labour Office, 1994 This book contains a selection of case studies prepared for an ILO UNHCR meeting on international aid as a means to reduce the need for emigration It considers international assistance to and migration from Eastern Europe the Horn of Africa Central America the Philippines Tunisia and Turkey as well as looking more generally at refugee policy in the post Cold War world and at reducing emigration pressure through foreign aid *Double Shift* Bertram Silverman, Robert Vogt, Murray Yanowitch, 2016-09-16 Taken from a series of conferences this collection of papers by leading labour experts from the United States and the former Soviet Union examines the profound changes in industrial systems and work organisation currently affecting both societies The authors focus on the emergence of new labour market institutions the evolution of managerial philosophy changes in workers values and attitudes toward economic security economic inequality and the legitimacy of worker participation in management and ownership Comparison reveals both striking differences and similarities in the transformation of the two systems in the post industrial age and helps demystify some simplistic notions about the workings of market systems
