Berger, 2002 The thirty four journal articles book reviews and conference papers collected in this volume were written over the same period of time as the author's three clinical monographs Psychoanalytic theory and clinical relevance Analytic Press 1985 Substance abuse as symptom Analytic Press 1991 and Psychotherapy as praxis Trafford 2002 While the books provide broad critiques of clinical societal and philosophical issues in psychotherapy psychoanalysis and general psychology the papers enlarge on specific subtopics including some not addressed in the monographs The chapters in the present work are grouped into four subject areas Part I conceptual frameworks Part II psychotherapy and psychoanalysis Part III society and culture and Part IV general psychology Individual topics explored under these rubrics span a wide diverse spectrum including neonatal models personality theory psychoanalytic defense analysis the false memory syndrome physical reductionism in psychiatry ontology of language mental health policies in the work place psychological testing in forensic settings national drug policy and conflict resolution These more narrowly focused papers collectively complement and further illuminate the general critiques presented in the author's previous books Most of the separate Parts and individual Chapters are preceded by new Introductions which were written specifically for this collection **Freud, V. 2** Paul E. Stepansky, 2015-01-28 Volume 2 of the Freud Appraisals and Reappraisals series bears

out the promise of the acclaimed premier volume a volume whose essays breathe new life into the study of Freud embodying research that appears to be impeccable in every case International Review of Psychoanalysis It begins with Peter Homan's detailed reexamination of the period 1906-1914 in Freud's life Looking to Freud's relationships with Jung as the central event of the period he finds in Freud's idealization and subsequent deidealization of Jung a psychological motif that gains recurrent expression in Freud's later writings and personal relationships Richard Geha offers a provocative portrait of Freud as a fictionalist Anchoring his exegesis in Freud's famous case of the Wolf Man he argues that the yield of Freud's clinical inquiries epistemologically is a species of the fictionalism of Friedrich Nietzsche and Hans Vaihinger But pursuing the argument Geha goes on to advance little noted biographical evidence that Freud understood himself to be an artist whose clinical productions were ultimately artistic Finally Patricia Herzog organizes and interprets Freud's seemingly conflicting remarks about philosophy and philosophers en route to the claim that the long held belief that Freud was an anti philosopher is a myth In fact she claims Freud was in no doubt as to the philosophical nature of his goal In an introductory essay titled Pathways to Freud's Identity editor Paul E Stepansky brings together the essays of Homans Geha and Herzog as complementary inquiries into Freud's putative self understanding and to that extent as reconstructive historical continuations of the self analysis methodically begun by Freud in the late 1890s Each contributor writes Stepansky in his or her own way seeks to understand Freud better in the spirit in which Freud might have better understood himself Together the contributors offer vistas to an enlarged self analytic sensibility

Psychoanalysis and the Mind-Body Problem Jon Mills, 2022-04-28 Winner of the 2022 NAAP Gradiva Award for Best Edited Book In this volume internationally acclaimed psychoanalysts philosophers and scholars of humanities examine the mind body problem and provide differing analyses on the nature of mind unconscious structure mental properties qualia and the contours of consciousness Given that disciplines from the humanities and the social sciences to neuroscience cannot agree upon the nature of consciousness from what constitutes psychic reality to mental properties psychoanalysis has a unique perspective that is largely ignored by mainstream paradigms This book provides a comprehensive exploration of the mind body problem in various psychoanalytic schools of thought including philosophical and metapsychological points of view Psychoanalysis and the Mind Body Problem will be of interest to psychoanalysts philosophers neuroscientists evolutionary biologists academics and those generally interested in the humanities cognitive science and the philosophy of mind

Radical Psychoanalysis Barnaby B. Barratt, 2016-05-20 2020 American Board Academy of Psychoanalysis ABAP's book award winner Only by the method of free association could Sigmund Freud have demonstrated how human consciousness is formed by the repression of thoughts and feelings that we consider dangerous Yet today most therapists ignore this truth about our psychic life This book offers a critique of the many brands of contemporary psychoanalysis and psychotherapy that have forgotten Freud's revolutionary discovery Barnaby B Barratt offers a fresh and compelling vision of the structure and function of the human psyche building

on the pioneering work of theorists such as Andr Green and Jean Laplanche as well as contemporary deconstruction feminism and liberation philosophy He explores how drive or desire operates dynamically between our biological body and our mental representations of ourselves of others and of the world we inhabit This dynamic vision not only demonstrates how the only authentic freedom from our internal imprisonments comes through free associative praxis it also shows the extent to which other models of psychoanalysis such as ego psychology object relations self psychology and interpersonal relations tend to stray disastrously from Freud s original and revolutionary insights This is a vision that understands the central issues that imprison our psychic lives the way in which the reflections of consciousness are based on the repression of our innermost desires the way in which our erotic vitality is so often repudiated and the way in which our socialization oppressively stifles our human spirit Radical Psychoanalysis restores to the discipline of psychoanalysis the revolutionary impetus that has so often been lost It will be essential reading for psychoanalysts psychoanalytic psychotherapists mental health practitioners and students and academics with an interest in the history of psychoanalysis

The Emergence of Somatic Psychology and Bodymind Therapy

B. Barratt,2010-05-11 Somatic psychology and bodymind therapy the simultaneous study of the mind and body are challenging contemporary understandings of the psyche of what it means to be human and how to heal human suffering

Humor and Psyche James W. Barron,2013-05-13 Humor a topic that engaged Sigmund Freud both early and late in his career is richly intertwined with character with creativity and with the theory and practice of psychoanalytic therapy Yet until very recently analysts ignored Freud s lead and relegated humor to the periphery of their concerns Humor and Psyche not only remedies previous neglect of the role of humor in the psychoanalytic situation but opens to a broad and balanced consideration of the role of humor in psychological life Section I provides historical and theoretical perspectives on the concept of humor Contributors review Freudian and post Freudian theories of humor address the inseparability of humor and play adumbrate a postmodernist perspective on humor and focus on the unique cognitive and affective properties of humor In Section II contributors turn to the relationship of humor to various aspects of the therapeutic process including the relationship of humor to transference interpretation the enlivening effects of humor on the therapeutic process and the multiple meanings of humorous exchanges between therapists and patients Section III concludes the volume with three fascinating essays on the relationship of humor to character and creativity They focus respectively on the role of humor in the 25 year correspondence of Freud and S ndor Ferenczi on the interweaving of D W Winnicott s comic spirit and theoretical innovations and on the relationship between humor and creativity in the music of the American composer Charles Ives Taken together the contributors reestablish the importance of humor as a topic of psychotherapeutic relevance more than 70 years after Freud s final essay on the topic Delightfully readable from beginning to end Humor and Psyche edifies as it entertains

A Fresh Look at Psychoanalysis Arnold I. Goldberg,2013-07-04 Goldberg uses the questions posed by self psychology as point of entry to a thoughtful consideration of issues with which every clinician wrestles the scientific status analysis the

relationships among its competing theories the role of empathy in analytic method and the place of the self in the analyst's explanatory strategies Clinical chapters show how the notion of the self can provide organizing insights into little appreciated character structures

Language and the Ineffable Louis S. Berger, 2011-01-01 The prevailing conception of language is often called the received view Though ubiquitous Louis S Berger demonstrates its flaws and the difficulties it raises for other disciplines such as philosophy and physics In *Language and the Ineffable* Berger develops an unconventional model of human development ontogenesis A radical and generative feature of the model is the premise that the neonate's world is holistic boundary less unimaginable and impossible to describe in other words ineffable This study unsettles the foundations of sacrosanct beliefs about language and a host of other disciplines in the process

Freud, V.1 Paul E. Stepansky, 2015-01-28 A response to the veritable renaissance in Freud studies *Freud Appraisals and Reappraisals* presents the readers with the fruits of recent scholarship on Freud the man and scientist and the origins and development of the psychoanalytic movement spawned by his work The premier volume of this series offers three major essays embodying different tributaries of contemporary Freud research Peter Swales drawing on extensive archival research reveals the identity and explores the life and times of the woman Freud terms his first teacher but presented to his readers only as the Frau Caecilie M of the *Studies on Hysteria* Barry Silverstein brings together complementary strands of textual analysis and psychobiographical reconstruction in his provocative reconsideration of the circumstances surrounding Freud's lost papers on metapsychology Finally Edwin Wallace's integrative review of Freud's scattered remarks on ethics and morality combined with his appraisal of Freud's personal ethics yield a measured and scholarly account of Freud as ethicist Briefer essays on Freud and the oral tradition Patrick Mahony Freud's psychology of religion Paul Stepansky and recent assessments of Freud's character John Gedo round out a

volume that is destined for a place of distinction in the secondary literature on Freud Collectively these essays represent a most auspicious debut for the new series they admirably bear out Paul Stepansky's intent of presenting readers with original articles that embody high scholarship and a thought provoking and imaginative use of the fruits of this scholarship

Becoming Alive Ryan LaMothe, 2005 *Becoming Alive* draws on the Winnicottian idea of transitional objects and puts forward the argument that human beings relate to and use objects in order to generate experiences of being alive *Annals of Theoretical Psychology* Paul Van Geert, Leendert P. Mos, 2013-11-11 This is the first of a two volume work in the *Annals* series devoted to developmental psychology The project was originally conceived in 1985 when Paul van Geert who had just completed his Theory building in developmental psychology North Holland 1986 agreed to collaborate on an *Annals* volume examining foundational issues pertaining to the concept of development The project attracted considerable interest and in view of the length of the resulting manuscript a decision was made to publish it in two volumes Fortunately the contributors provided coherent perspectives on two relatively distinct developmental themes which served to facilitate our task of dividing their contributions into two volumes The first volume deals with the foundations of developmental theory and methodology the second volume to appear as Volume 8 of the *Annals* with theoretical issues in developmental psychology In this first volume the contributions by Willis Overton and Joachim Wohlwill were completed in 1988 those by Roger Dixon Richard Lerner and David Hultsch and Paul van Geert in 1989 Commentaries followed quickly and replies to commentaries were completed in 1990 Paul van Geert provides a general framework within which the foundational issues of development are discussed He is especially concerned with the nature of transition models and the structure of time in developmental theory The relationship between methods and framework or theory is the topic of Joachim Wohlwill's contribution The Castration of Oedipus Joseph C. Smith, Carla J. Ferstman, 1996-03 The intellectual movements of psychoanalysis postmodernism and feminism have redefined the ways in which we think about human experience And yet an integration of these movements has been elusive if not impossible In this landmark book J C Smith and Carla J Ferstman combine these disparate traditions to create a provocative unified and tightly woven perspective that transcends the misogyny implicit in much of Freudian psychoanalytic theory The dialectics of domination and submission are central to Smith and Ferstman's argument Men and women they insist must avoid the temptation to fetishize equality and recognize the roles of domination and submission in the human psyche or in Nietzsche's terms the Will to Power They argue that the unification of psychoanalysis postmodernism and feminism leads us to a shocking conclusion that women and men cannot move beyond the suffering which so haunts the human condition unless heterosexual men surrender the power that is causing their misery and affirm life by joyfully accepting domination by women And women conversely must reaffirm their power by rejecting Oedipal genderization and embracing a liberating matriarchal consciousness and a matriphallic sexuality A work of tremendous insight and extraordinary intellectual energy *The Castration of Oedipus* will provoke strong reactions in all readers

regardless of ideology **Damaged Life** Tod Sloan, 2016-06-10 What are the psychological problems caused by modernization How can we minimize its negative effects Modernization has brought many material benefits to us yet we are constantly told how unhappy we are crime divorce suicide depression and anxiety are rampant How can this contradiction be reconciled *Damaged Life* originally published in 1996 presents a powerful and progressive analysis of modernity's impact on the psyche Tod Sloan develops an integrated theory of the self in society by combining perspectives on personality development and socio historical processes to explore our complex response to modernization He discusses the implications of postmodern theory for psychology and proposes concrete responses to address the issue of mass emotional suffering His book should be read not only by those working within psychology and related disciplines such as sociology and social policy but also by anyone seeking enlightenment about the predicament of the self in contemporary society **Psychoanalytic Versions of the Human Condition** Paul Marcus, Alan Rosenberg, 1998-08 What is psychoanalysis Whereas there was once a time when proponents of mainstream psychoanalysis could point to the preeminence of Freud's drive theory and the version of the human condition associated with it man as seeking pleasure in an erotically tinged universe contemporary psychoanalysis is a fractured and contentious discipline in which competing theories share little more than the basic concepts of unconscious mental processes repression and transference Taking the complexities ambiguities and contradictions engendered by psychoanalysis over the past several decades as an encouraging point of departure rather than as evidence of the dissolution of the psychoanalytic tradition *Psychoanalytic Versions of the Human Condition* makes explicit how within each major theory a particular story about the nature of the world and what it means to be human decisively shapes how the clinician conceptualizes individual psychopathology and approaches treatment A chorus of voices that both challenges and reaffirms the theory and practice of psychoanalysis *Psychoanalytic Versions of the Human Condition* asks urgent questions about the politics of psychoanalytic knowledge and about how the profession is situated and operates in our contemporary culture Whether Freudian Jungian Kleinian Kohutian Lacanian or hybrid the clinician will find this book a useful guide to understanding how each theory's philosophy of life infuses clinical work *Constructivist Perspectives on Developmental Psychopathology and Atypical Development* Daniel P. Keating, Hugh Rosen, 2013-01-11 This volume is the result of a symposium titled *Constructivist Approaches to Atypical Development and Developmental Psychopathology* What emerges from the work included here is a record of innovative extensions refinements and applications of the concept of constructivism The chapters not only demonstrate the compatibility of constructivism with investigations of atypicality but also the generation of a constructivist perspective for a wide array of problems in developmental psychology
