Psychological Effects of Motherhood Myra Leifer, 1980-04-01 **Psychological Effects of Motherhood** Myra Leifer, 1980 **Research Perspectives on Work and the Transition to Motherhood** Christiane Spitzmueller, Russell A. Matthews, 2016-08-19 This book examines the intricate challenges faced by women and families during the transition to motherhood. It presents unique theoretical and methodological approaches to studying women's transition from being employees to working mothers. Its focus is on the impact of work on the transition to motherhood and the impact of motherhood on women's working arrangements, work attitudes, work experiences, and perspectives. Special attention is given to intervention research that can enhance the health and well-being of mothers and employers as they reconcile demands of the family-work interface. Integrating theoretical framework, development, and methodological considerations, this book provides an in-depth introduction to the topic. It brings together researchers and experts on the work-family interface, on workplace discrimination during pregnancy and early motherhood, and on well-being. **Psychosocial Adaptation to Pregnancy** Regina Lederman, Karen Weis, 2009-09-16 presented in the Introduction Chapter 1. The focus of Chapter 1 is twofold: 1 to present the research foundations for the psychophysiological correlates of prenatal psychosocial adaptation and the seven prenatal personality dimensions with progress in labor and birth outcomes, and particularly 2 to present the theory underlying the seven dimensions of prenatal psychosocial adaptation, which are further analyzed in the following seven chapters. Chapters 2-8 present a content analysis of the interview responses to the seven significant prenatal personality dimensions that are predictive of pregnancy adaptation, progress in labor, birth outcomes, and postpartum maternal psychosocial adaptation, and they include: 1 Acceptance of Pregnancy, 2 Identification with a Motherhood Role, 3 Relationship with Mother, 4 Relationship with Husband, 5 Preparation for Labor, 6 Prenatal Fear of Pain, Helplessness, and Loss of Control in Labor, and 7 Prenatal Fear of Loss of Self-Esteem in Labor. There is no other comparable comprehensive in-depth prenatal personality research or empirical and content analysis of pregnancy-specific dimensions of maternal psychosocial adaptation to pregnancy. *Annual Review of Nursing Research, Volume 2, 1984* Joyce J. Handbook of Parenting: Being and becoming a parent Marc H. shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny

The New Don't Blame Mother Paula Caplan, 2002-06-01 In 1990 Paula Caplan a nationally recognized expert on the psychology of women wrote the groundbreaking Don't Blame Mother Now almost ten years later she finds that we are still blaming mothers Fully revised updated with a new introduction this second edition proposes new ways of mending the mother daughter relationship The New Don't Blame Mother Mending the Mother Daughter Relationship shows us that dangerous myths about mothers pervade our culture and have created or aggravated many of the problems between mothers and daughters Myths of the Perfect Mother give rise to impossible expectations and set mothers up for failure good mothers don't get angry good mothers are endlessly giving and myths of the Bad Mother exaggerate mothers' failings and create a monster figure in her image mothers are too needy mothers can't let go Caplan shows that if women can identify these myths then they can take concrete steps to build a strong and loving relationship with their mothers The New Don't Blame Mother shows how the anger and agony of the mother daughter relationship can be replaced with a new bond based

on understanding and respect The New Don't Blame Mother is a must read for all mothers and daughters Caplan drawing on over twenty five years of research clinical practice and the experience of workshop participants will show you how to stop blaming mother and instead start loving her Death And Trauma Charles R. Figley, Brian E. Bride, Nicholas Mazza, 2022-09-16 First published in 1997 Although the fields of thanatology and traumatology have received robust attention during their parallel development little effort has been made to address their overlapping territory This volume is the first attempt to do so Specifically the purpose of this book is fourfold First is to provide a theoretical bridge between the two fields by providing conceptual terminology such as defining normal versus dysfunctional bereavement and the meaning and range of death related PTSD The second confirms and illustrates the identical patterns of reactions between those who survive the death of a loved one and those who survive other traumatic events Next the book applies the most useful theoretical models to the bereavement experience and in turn acknowledges the utility of generalizing bereavement models to other traumatic experiences in doing so the two fields can enrich each other Similarly the volume's final purpose is to identify and apply the most useful and effective approaches in traumatology literature to the study diagnosis and treatment of traumatic stressors other than death *Sourcebook of Social Support and Personality* Gregory R. Pierce, Brian Lakey, I.G. Sarason, 2013-11-11 The work of 47 contributors from the U S Canada and Israel the Sourcebook gives special attention to the complexity of the social support construct expanding the field's theoretical base by seriously reappraising social support research in the context of findings from other fields of psychology and related disciplines Personality processes are specified to account for observed associations between social support and physical well being Several new studies are included which illustrate empirical approaches to exploring these processes And key contributions highlight the great strides made in understanding the links among personal dispositions situational contexts and potentially supportive transactions *Gender, Class and Education (Routledge Revivals)* Stephen Walker, Len Barton, 2013-11-05 First published in 1983 Gender Class and Education is a collection of papers that formed presentations at the Westhill Sociology of Education Conference in January 1982 and is the fifth such collection to emerge from the annual conference The conference theme Race Class and Gender was not only chosen because of its topicality but also to provide a framework for debate between educational researchers and teachers The papers focus on the reproduction of gender relations through education and provide important insights into how this process works how it is resisted in schools and colleges and the possibilities for radical intervention This volume includes three teaching bibliographies on gender and education which were not presented at the conference but were compiled specially for the book *Infant Previewing* Paul V. Trad, 2012-12-06 Infant Previewing Predicting and Sharing Interpersonal Outcome examines the developmental processes of the first two years of life from an innovative perspective that may dramatically alter the way health care professionals view and predict their perceptions of developmental phenomena The volume introduces the concept of previewing a developmental principle that organizes our understanding of

how infants and caregivers share experience during the first few years of life Previewing is manifested by virtually all caregivers and is designed to provide the caregiver infant dyad with insight into imminent maturational trends and with the motivation for continuing on the development journey with a sense of mastery and control The book not only launches the theory underlying the concept of previewing but it also offers guidelines for using previewing to enhance the relationship between infant and caregiver Various applications of previewing as a means of fostering the infant's predictive abilities as a catalyst for differentiating and coordinating developmental functions and as a principle for motivating interpersonal communication are analyzed
