International Handbook of Giftedness and Talent K. A. Heller, F. J. Mönks, R. Subotnik, Robert J. Sternberg, 2000-12-18 The first edition of this popular reference work was published in 1993 and received critical acclaim for its achievement in bringing together international perspectives on research and development in giftedness and talent Scholars welcomed it as the first

comprehensive volume in the field and it has proved to be an indispensable resource to researchers. Since the first edition the scholarly field of giftedness and talent studies has expanded and developed welcoming contributions from researchers in related disciplines. Several theoretical frameworks outlined in the first edition have now been empirically tested and a number of new trends have emerged. The Second Edition of the International Handbook of Giftedness and Talent provides an invaluable research tool to academics, researchers and students interested in the field of giftedness and talent. The contributors are renowned in the field and the broad range of topics on giftedness that have been studied in the past century right up to the late 1990s are represented in this volume. It is truly international in scope bringing together leading scholars and teachers from all around the world. This new edition has been fully updated and rewritten and includes 22 completely new chapters. It provides a comprehensive review and critical synthesis of significant theory, a unique cross-national perspective with contributions from over 100 distinguished authors covering 24 nations, significant contributions from scholars working in related fields, an increased focus on empirically supported scholarship and is arranged for quick and easy reference with comprehensive subject and author indexes.

Emotions and Leadership in Organizations and Educational Institutes Osman Titrek, Anna Stavicka, Ana Campina, Gozde Sezen-Gultekin, Carlos Francisco De Sousa Reis, 2023-11-28. Emotion management is an important source of social capital and synergy for organizations. Managers have a great role in the creation of this synergy. A manager who can cope with their emotions indirectly contributes to organizational effectiveness. This situation is especially important in human-oriented organizations providing services rather than goods such as educational institutions. Leadership is a process of social influence which maximizes the efforts of others towards the achievement of a goal. Leadership stems from social influence rather than authority or power. In terms of system approach, the input-output process and feedback of educational organizations are always related to human behaviors. Therefore, organizations must address the nature of human beings in all of their managerial processes. Although organizations in which people are at the foreground try to continue their functioning on a rational and formal basis throughout the managerial process, they sometimes have to manage emotional and informal phenomena. In this case, there is a need for managers and school leaders who can shape the rationale in line with the requirements of human nature. What is expected from this administrator is that they do not ignore human needs and

emotions while providing the management of educational institutions For this reason these managers should be leaders rather than executives who only work in a formal framework of organization management Moreover principals and teachers should also be leaders in all educational processes Emotions are the main catalyst of positive organizational culture Leaders can create an effective organizational culture with the main source of positive emotions between employers Positive emotions also motivate employees for organizational purposes If a leader wishes to create and maintain an effective organizational culture it is essential to support positive behavior and emotional climate in their institutes and schools Leaders school managers and teachers therefore need to develop emotion management abilities Educational organizations need to shape their organizational culture climate and psychology to support their leaders in efficiently managing their employees emotions Up to now this topic has been usually addressed as the main catalyst and a sub dimension of emotional intelligence Moreover current evidence classifies social and empathy skills as other sub dimensions of emotional intelligence For this reason this collection of peer reviewed articles will draw attention to the contemporary term emotional management and contribute to educational fields by means of exploring the relationship between emotions and leadership

Confronting Dogmatism in Gifted Education Don Ambrose, Robert Sternberg, Bharath Sriraman, 2013-06-17

This title looks at the dogmatism that limits the perspectives of professionals policymakers and other stakeholders in gifted education In a field where concepts and definitions surrounding high ability have been contested for many years there is increasing interest in clarifying these notions today This book offers such clarity searching outside of the predominant conceptual frameworks that dominate thinking about giftedness and talent and examining ways in which this conceptual fog stunts and warps the development of gifted minds and limits the effectiveness of curriculum development and instruction The book directly addresses the connection between dogmatism and high ability exploring ways in which otherwise bright individuals can make unintelligent decisions Each contributor in this edited collection connects educational theory with teaching

practice examining the impact of policies such as No Child Left Behind The chapters also explore the ways in which economic cultural and academic contexts affect both the gifted mind and education of the highly able in America and the rest of the world while making recommendations for positive changes that can be enacted within gifted education in the future
