Public Enterprise At The Crossroads:

Public Enterprise at the Crossroads John Heath, 2013-01-11 In many parts of the world public enterprise is in crisis Privatisation programmes are being widely touted as the solution to many of the problems of inefficiency and slow rates of growth associated with public enterprise This book discusses the underlying causes of those problems and critically examines some of the solutions that have been adopted Its geographical coverage is wide and it cuts across the political spectrum The experiences of countries in four continents are analysed in an attempt to shed light on current dilemmas Recurrent patterns are found problems are frequently seen to be political as much as economic and bureaucracy and administrative confusion is often found to be at the heart of poor financial performance Yet since political aims economic environment and administrative and managerial capabilities vary so widely universal solutions remain more difficult to define than universal problems

Non-Market Controls and the Accountability of Public Enterprises in Tanzania Paschal Mihyo, 1994-06-18 Locates the inefficiencies of the traditional public enterprise model within its management and contextual factors The former include overprotection from consumer liability statutory power to commit wrongs with impunity and legal limitations on their liability for negligence *Public Enterprise*, 1994 **Public Enterprise Management** Ali

Africa Merih Celasun, 2013-01-11 In the rapid world wide spread of privatization progress in the Middle East and North Africa region has been markedly slow This volume argues that a high level of overstaffing in public enterprises and the inability of economies to create jobs fast enough is mainly responsible for this An in depth study of the facts and a well supported conclusion makes this an impressive collection of work on a very pertinent subject **Public Enterprise at the Crossroads** John B. Privatisation Bulent Seven,2002 The main aims of this thesis are as follows a To present a comprehensive analysis of the concept of privatisation its origins and limits b To identify the legal and institutional framework for privatisation in different European countries from a comparative perspective c To define and analyse particularly legal issues which arise during the privatisation transactions e g labour law competition law etc d To evaluate which features of the successful legal and organisational framework of privatisation have been successful so as to provide guidelines for those individuals and organisations participating in the privatisation exercises This work found out that there is no simple internationally applicable recipe for privatisation various legal methods and techniques can be used to privatise state owned enterprises Because each country has different circumstances it is impossible to provide a unique model for privatisation each country needs to design its own model according to its circumstances Privatisation is an essential but insufficient element for structural economic reform in the economy and society Privatisation is not a panacea it is not the solution to every economic and administrative problem selling an enterprise to the private sector does not mean an end to all problems Also privatisation is not an overnight process or a magic touch it will be a lengthy process Furthermore a decision that something can be privatised does not mean that it should be privatised In that context privatisation is not good or bad it is an economic and social instrument If it is well designed it may bring substantial benefits to the economy and society In many countries many state owned enterprises particularly the ones which are financially weak have still not been privatised This finding revealed that the privatisation process will be in the political and economic agenda for at least few more decades **Performance**
