## **Reality Dreams:**

**Dreams & Reality** Simon S. Godfrey, 2003 Dreaming is a universal phenomenon Nearly everybody dreams and is anxious to know what it means Perhaps no other human experience has aroused so much interest and curiosity as this alien visitation that forces itself upon us without warning during the dead of sleep Since antiquity thousands of books and articles have been written to shed some light on this mysterious and often unwelcome nightly visitor Despite tremendous work in this field the riddle remains unsolved Still no satisfactory answers have been provided to these basic questions Why do we dream What are dreams about Where do they come from How can we understand them This book is significantly different from those of others in this area as the answers presented are not the author's own views they are largely his dreams answers to the questions just posed Instead of speculation this author a psychologist by profession has put forward what his own dreams have consistently and persistently revealed to him over the past thirty years Since 1973 he has recorded over 100 000 dreams filling some 230 journals of 200 pages each The length of the dreams varies greatly some consist of a single word or phrase others fill a page or more This book is written to share with others what the author has gained from his journey into the dreamworld and from his long and patient analysis of this vast number of dreams Three conclusions have been drawn from this investigation 1 Dreams are not caused by repressed sexual wishes somatic sources impressions of the preceding days or other mundane instigators as claimed by Freud and his followers 2 Dreams do have a supernatural source as pronounced by many writers through the ages and 3 Through dreams this supernatural source reveals to us who we really are brings to light who He is and invites us to lead our own lives sensibly and purposefully Using his own dreams as illustrations the author addresses a wide variety of topics relating to the domain of dreams including Are dreams a source of creativity Why do some of us have frequent nightmares Can we control the content of our dreams Why are dreams so cryptic How can we decipher our dream symbols to understand their meanings Do characters in our dreams refer to persons we know of or do they stand for components of our own identity How should we understand the verbal contents of our dreams Can dreams guide us as to how we should conduct our lives Is the reality we experience during our dreams more dependable or the one we experience in waking life The main purpose of the book is to elucidate that dreams are trustworthy teachers In the realm of growth and self discovery we must regard as suspect whatever we learn from others however wise and well meaning But whatever is conveyed to us directly through dreams is credible since it emanates from within us and is free from inconsistencies and adulterations Our major challenge is to understand the symbolic language used by the wise guide we have within

**Unified Reality Theory** Steven Kaufman,2015-12-04 Unified Reality Theory demonstrates that the source of reality is a universal consciousness and that we are in no way separable from that source and so in no way truly separable from each

other or any other aspect of reality I recommend this book to anyone interested in understanding the nature of reality and their place in it Deepak Chopra Unified Reality Theory describes how all reality evolves from an absolute existence It also demonstrates that this absolute existence must have consciousness as an attribute that is intrinsic to its being Thus Unified Reality Theory shows that consciousness rather than being a product of the evolution of physical reality is itself the source of what we experience as physical reality and that physical reality is itself but one aspect of an evolving universal consciousness Unified Reality Theory shows that most fundamentally this absolute consciousness existence evolves into reality by means of a single process self relation That is consciousness existence becomes reality by forming relationships with itself analogous in a very limited way to what happens to a rubber band that is twisted upon itself i e it remains whole while differentiating into other forms Thus Unified Reality Theory demonstrates that reality is a state of existential self relation The idea that the universe consists of existence which has formed relationships with itself isn't new Taoists have understood this idea for at least a couple of thousand years What is new here is the presentation of this idea in the form of a detailed and defined structural model that correlates with the behavior of physical reality as described by science in general and physics in particular Ultimately Unified Reality Theory uses science and logic to make the case that God exists as a pervasive and absolute consciousness that transcends the realities of space and time and that we as well as everything else are that
