The Ceramic Art Jennie J. Young,2018-04-19 IN writing the present volume the author s object has been to answer as tersely and lucidly as possible the more important questions in connection with the history and manufacture of pottery and porcelain and to bring the results of recent research to bear upon some of the unsolved problems of the science of ceramics The literature of the subject is formidable in dimensions Authors have divided the field into sections and have in many cases presented learned and exhaustive special treatises Notwithstanding the solid learning and critical acumen reflected in their pages their form and voluminous character however detracted from their value as books for familiar and speedy reference and left the acquirement of a general knowledge of the ceramic art a matter for wide research and prolonged study on the part of every reader and collector The attempt has here been made to condense the leading points of the subject to arrange them after a simple and easily intelligible method and thus to present in one volume a comprehensive history No hesitation has been shown in drawing upon foreign authors Many of the later developments of the art have also been touched upon and the results of the more recent efforts of artists and manufacturers have been illustrated and described In treating of America the author has endeavored to convey some idea of its wealth in materials and of the present condition and tendencies of the industry and to do justice to those who have laid the foundation of its claim to recognition in the world of art *Ceramic art of the Near East* ,1931 **Ceramic, Art, and Civilisation**

Paul Greenhalgh,2021-02-25 In his major new history Paul Greenhalgh tells the story of ceramics as a story of human civilisation from the Ancient Greeks to the present day As a core craft technology pottery has underpinned domesticity business religion recreation architecture and art for millenia Indeed the history of ceramics parallels the development of human society This fascinating and very human history traces the story of ceramic art and industry from the Ancient Greeks to the Romans and the medieval world Islamic ceramic cultures and their influence on the Italian Renaissance Chinese and European porcelain production modernity and Art Nouveau the rise of the studio potter Art Deco International Style and Mid Century Modern and finally the contemporary explosion of ceramic making and the postmodern potter Interwoven in this journey through time and place is the story of the pots themselves the culture of the ceramics and their character and meaning Ceramics have had a presence in virtually every country and historical period and have worked as a commodity servicing every social class They are omnipresent a ubiquitous art Ceramic culture is a clear unique definable thing and has

an internal logic that holds it together through millennia Hence ceramics is the most peculiar and extraordinary of all the arts At once cheap expensive elite plebian high tech low tech exotic eccentric comic tragic spiritual and secular it has revealed itself to be as fluid as the mud it is made from Ceramics are the very stuff of how civilized life was and is led This then is the story of human society s most surprising core causes and effects
