Reality Games:

Virtual Reality Games for Rehabilitation Eva Brooks, David J. Brown, 2023-09-12 This volume focuses on games to manage and facilitate rehabilitation. It emphasizes user practice attitudes and experience and their changing place within developing rehabilitation frameworks. It looks at how users have adopted integrated and innovated with games to facilitate rehabilitation. Topics include game technology, game design and accessibility, web-based technologies vs. pervasive and mobile technologies, social and collaborative aspects and rehabilitative outcome. Games for rehabilitation are gaining interest from different communities such as medicine, psychology and rehabilitation. A distinction can be made between games specifically made for rehabilitative purposes and games made for the general public but that are used in rehabilitation as well. Games have allowed the building of new complementary forms for rehabilitation and offered new options to produce rehabilitative activities and experiences.

Augmented Reality Games II Vladimir Geroimenko, 2019-05-23 This is the second of two comprehensive volumes that provide a thorough and multi-faceted research into the emerging field of augmented reality games and consider a wide range of its major issues. These first ever research monographs on augmented reality games have been written by a team of 70 leading researchers, practitioners and artists from 20 countries. Volume II explores the most important and challenging issues that have been raised by the use of the Augmented Reality approach and technology in the gamification of education, healthcare, medicine and art. The volume deals with a systematic analysis of educational augmented reality games, their use for health promotion in old age and for improving people's well-being, the gamification of augmented reality art and immersive reading experiences among other topics. *Augmented Reality Games II* is essential reading not only for researchers, practitioners, game developers and artists but also for students, graduates and undergraduates and all those interested in the rapidly developing area of augmented reality games.
