

LECTURE 4

ENTHONOMETHODOLOGY

By the end of this lecture, you should be able to:

1. State the basic tenets of Ethnomethodology
2. Discuss how the tenets can be used to analyze genres of oral literature
3. Use the principles of Ethnomethodology theory to analyze genres of literature

Ethnomethodology interest is in the study of everyday methods people use for the production of social order (Garfinkel, 2002). Its goal is to document the methods and practices through which society's

members make sense of their lives and methods people use for understanding and producing the social order in which they live. It provides methods which have been used in ethnographic studies to produce account of people's methods for negotiation everyday situations.

-It studies how people use social interaction to maintain an ongoing sense of reality in a situation to gather data. Ethnomethodologist rely on conversation analysis and a set of techniques for systematically observing and recording what happens when people interact in natural setting (Francis, 2002: 123)

-Ethnomethodology produced a society that was focused on the examination of the everyday ways and the reality of their everyday ways and methods of sense-making to people as they produced the reality of their everyday existence (Hester and Francis, 1997)

-Ethno -methodologist's oppose view of the social world that reduce people to judgmental dopes (Garfinkel, 1967) or actors in a social world view (Macbeth, 2003)

The term ethnomethodology can be broken down into its three constituent parts: Ethno-method-ology.

Sociology, Ethnomethodology and Experience Mary F. Rogers, 1983-11-25 In this volume first published in 1983 Professor Rogers examines the usefulness of a phenomenological approach to sociology Her broad purpose is to demonstrate the theoretical and methodological advantages phenomenological sociology holds Thus she offers a selective introductory exposition of phenomenology highlighting its relevance for social scientists and undercutting the notion of phenomenology as a non scientific subjective or esoteric method of study

Ethnomethodology's Program Harold Garfinkel, 2002 Since the 1967 publication of *Studies in Ethnomethodology* Harold Garfinkel has indelibly influenced the social sciences and humanities worldwide This new book the long awaited sequel to *Studies* comprises Garfinkel's work over three decades to further elaborate the study of ethnomethodology Working out Durkheim's Aphorism the title used for this new book emphasizes Garfinkel's insistence that his position focuses on fundamental sociological issues and that interpretations of his position as indifferent to sociology have been misunderstandings Durkheim's aphorism states that the concreteness of social facts is sociology's most fundamental phenomenon Garfinkel argues that sociologists have for a century or more ignored this aphorism and treated social facts as theoretical or conceptual constructions Garfinkel in this new book shows how and why sociology must restore Durkheim's aphorism through an insistence on the concreteness of social facts that are produced by complex social practices enacted by participants in the social order Garfinkel's new book like *Studies* will likely stand as another landmark in sociological theory yet it is clearer and more concrete in revealing human social practices

The Totalitarian Paradigm after the End of Communism, 2022-06-08 Concepts of totalitarianism have undergone an academic revival in recent years particularly since the breakdown of communist systems in Europe in 1989-91 the totalitarian paradigm so it seems to many scholars today had been discarded prematurely in the heat of the Cold War The demise of communism as a social system is however not only an important cause of the recurring attractiveness of the totalitarian paradigm but provides at the same time new evidence and correspondingly new problems of explanation for all approaches in communist studies and totalitarianism theory in particular This book contains articles by

philosophers social scientists and historians who reassess the validity of the totalitarian approach in the light of the recent historical developments in Eastern Europe A first group of authors focus on the analytical usefulness and explanatory power of classic concepts of totalitarianism after having observed the failed reforms of the Gorbachev era and the collapse of Europe's communist systems in 1989-91 In these contributions the totalitarian paradigm is contrasted with other approaches with respect to cognitive power as well as normative implications In the second group of contributions the focus is on the reassessment of methodological and theoretical problems of the classic concepts of totalitarianism The authors attempt to reinterpret the classic concepts so as to meet the objections which have been put forward against those concepts during the last decades The study thereby traces some of the intellectual roots of the totalitarian paradigm that precede the outbreak of the Cold War such as the work of Sigmund Neumann and Franz Borkenau It also focuses on the most famous authors in the field Hannah Arendt and Carl Joachim Friedrich In addition it discusses theorists of totalitarianism like Juan Linz whose contributions to totalitarianism theory have too often been overlooked

Ethnomethodology and the Human Sciences Graham Button, 1991-08-30 Through its empirical inquiries into the ordered properties of social action this text demonstrates how ethnomethodology provides a radical respecification of the foundations of the human sciences an achievement that has often been misunderstood

Contemporary Sociological Theory Jonathan H. Turner, 2012-09-20 Written by award winning scholar Jonathan Turner Contemporary Sociological Theory covers the range of diversity of theory in nine theoretical traditions and variants of theoretical approaches in these traditions The result is a comprehensive review of present day theorizing in sociology covering functional evolutionary ecological conflict interactionist exchange structuralist cultural and critical theories and the major proponents of these theories Moreover for each theoretical tradition its origins are examined in a separate chapter with an eye to how classical theorists influenced the work of key contemporary scholars This book will serve as a valuable resource for those readers seeking in depth and comprehensive coverage of contemporary traditions in their historical contexts Unlike many texts coverage is comprehensive and deep The theories and their origins are examined in detail so that readers can fully understand the origins and present profile of theories in present day sociology Unlike many texts that skim over theories on the surface this book seeks to unlock for the reader their underlying structure of each theory The book is written in a modular format so that theories and traditions can be examined in any order and in many diverse combinations If desired only the contemporary theories can be read without attention to their historical contexts or the reverse is true if readers want to understand the historical origins of a particular theoretical tradition Since Jonathan Turner is an active theorist in his own right he brings to the book an appreciation of how theories are created as an insider rather than as only a commentator on theory As such he is able to bring out the underlying assumptions structure and form of a theory in new and interesting ways for casual readers and scholars alike

The Reflexive Thesis Malcolm Ashmore, 1989-08-02 This unusually innovative book treats reflexivity not as a philosophical conundrum but as a practical

issue that arises in the course of scholarly research and argument In order to demonstrate the concrete and consequential nature of reflexivity Malcolm Ashmore concentrates on an area in which reflexive problems are acute the sociology of scientific knowledge At the forefront of recent radical changes in our understanding of science this increasingly influential mode of analysis specializes in rigorous deconstructions of the research practices and textual products of the scientific enterprise Through a series of detailed examinations of the practices and products of the sociology of scientific knowledge Ashmore turns its own claims and findings back onto itself and opens up a whole new era of exploration beyond the common fear of reflexive self destruction

The Production of Reality Jodi O'Brien, 2010-10-28 Featuring a new emphasis on how to be awake in the world and how to better see the patterns we use to make sense of our own lives this fifth edition of Jodi O'Brien's popular book introduces the major theories concepts and perspectives of contemporary social psychology in a uniquely engaging manner Compelling original essays that introduce relevant concepts are followed by a wide ranging eclectic enjoyable set of readings By grounding social psychology in student experiences and explaining theories through stories and narratives this one of a kind book is a fascinating read that helps students understand the forces that shape their feelings thoughts and actions

Turner, 2012-10-11 Written by award winning scholar Jonathan Turner Theoretical Sociology 1830 to the Present covers new and emerging aspects of sociological theory and examines the significant contributions of both modern and founding theorists Nine sections present detailed analyses of key theories and paradigms including functionalism evolutionary theory conflict theory critical theory exchange theory interactionist theory and structuralism Despite the in depth discussions of theorists and their contributions to the field the text is concise and focused a perfect resource for readers seeking to develop a deeper understanding of contemporary and classical sociological theory

Entrepreneurship as Experience Michael H. Morris, Christopher G. Pryor, Minet Schindehutte, 2012 Do entrepreneurs create ventures or do venture experiences create entrepreneurs The authors of *Entrepreneurship as Experience* propose that the answer is both This important volume examines how individuals experience the creation of a venture as it happens and how that experience determines the types of entrepreneur and venture that ultimately emerge In essence entrepreneurship is an experience consisting of large numbers of key events such as a first sale hiring a first employee losing a big account events that are processed and made sense of by the entrepreneur They produce cognitive emotional and physiological responses which impact decision making and behavior The result is an experience that is purposive diverse uncertain ambiguous and transformative and unique to each individual Here the authors argue that as experience unfolds both entrepreneur and venture are being constructed and emerge in unique forms This experiential view introduces an entirely new lens through which entrepreneurship can be examined *Entrepreneurship as Experience* comprises chapters dedicated to sociological anthropological and psychological research related to human

experiencing the volume presents a new frame for understanding the role of emotions and feelings in venture creation and lays out a conceptual framework for understanding how real time experiencing informs the entrepreneurial process New insights are provided regarding how the entrepreneurial mindset and an entrepreneurial identity are formed and why entrepreneurs take on certain traits and develop certain competencies Further the authors put forth new approaches to conducting research on the entrepreneurial experience Students advanced as well as undergraduate and scholars of entrepreneurship innovation strategy and management will find themselves turning often to the ideas and research presented here

Social Action Gottfried Seebaß, R. Tuomela, 2012-12-06 The papers contained in this volume are based on the contributions to an international interdisciplinary Symposium entitled Analytical and Sociological Action Theories which took place in Berlin West on September 13 1982 Each part comprises a main paper followed by two in Part IV three papers commenting on it On the whole there is an equal division into philosophical and sociological papers In particular each main paper receives both inter and interdisciplinary comments The Berlin Symposium was supported by the Deutsche Forschungsgemeinschaft Bonn and to a smaller extent by the Freie Universität Berlin both grants are acknowledged gratefully Berlin and Helsinki May 1984 GOTTFRIED SEEBASS RAIMO TUOMELA vii GOTTFRIED SEEBASS

INTRODUCTION I It is a striking fact that the extended efforts of both sociologists and analytical philosophers to work out what is termed a theory of action have taken little if any account of each other Yet of the various reasons for this that come to mind none appears to be such as to foil any hopes for fruitful interdisciplinary exchange Being concerned apparently with the same set of phenomena viz individual and social actions the two theories can reasonably be expected to be partially overlapping as well as competitive and complementary Accordingly each can eventually be shown by the other to need completion or revision Whether or to what extent this is the case is subject to inquiry and discussion *The SAGE Handbook of Sociolinguistics* Ruth Wodak, Barbara Johnstone, Paul E Kerswill, 2011 This Handbook answers a long standing need for an up to date comprehensive international in depth critical survey of the history trajectory data results and key figures involved in sociolinguistics The result is a work of unprecedented coverage and insight It is all here from the foundational contributions to the field to the impact of new media new technologies of communication globalization trans border fluidities and agendas of research

path breaking Encyclopedia of Feminist Theories is an accessible multidisciplinary insight into the complex field of feminist thought The Encyclopedia contains over 500 authoritative entries commissioned from an international team of contributors and includes clear concise and provocative explanations of key themes and ideas Each entry contains cross references and a bibliographic guide to further reading over 50 biographical entries provide readers with a sense of how the theories they encounter have developed out of the lives and situations of their authors *From Small Talk to Microaggression* Michael Lempert, 2024-12-06 A provocative and eye opening history of how we have studied and theorized social interaction In this ambitious wide ranging book anthropologist Michael Lempert offers a conceptual history that explores how why and with what effects we have come to think of interactions as scaled Focusing on the sciences of interaction in midcentury America Lempert traces how they harnessed diverse tools and media technologies from dictation machines to 16mm film to study communication microscopically In looking closely many hoped to transform interaction to improve efficiency grow democracy curb racism and much else Yet their descent into a microworld created troubles with some critics charging that these scientists couldn't see the proverbial forest for the trees Exploring talk therapy and group dynamics studies social psychology and management science conversation analysis micropolitics and more Lempert shows how scale became a defining problem across the behavioral sciences Ultimately he argues if we learn how our objects of study have been scaled in advance we can better understand how we think and interact with them and with each other across disciplinary and ideological divides Even as once fierce debates over micro and macro have largely subsided Lempert shows how scale lives on and continues to affect the ethics and politics of language and communication today
