Leatherwood Creek Theodore N. Bailey Ph.D., 2024-07-30 This book is one man's reflection on his observations of the ecology of a small creek near his childhood home in southeast Ohio. As a wildlife biologist, Theodore N. Bailey had extensive knowledge of the flora and fauna that flourished at Leatherwood Creek. His meticulous research into the biological, cultural, and historical aspects of this area provides a wealth of information. At the beginning of each chapter, the author offers personal reflections of the creek from his memories growing up in southeastern Ohio in the 1940s, 1950s, and 1960s. At the end of each chapter, he explores how the region has changed over the years. Backed with scientific evidence, the author's thoughtful insights will inspire Ohio residents and others throughout the world to cultivate a deeper appreciation for the great diversity of life that is all around us and a greater desire to take the time to observe and protect our natural world.

Wetland and Riparian Areas of the Intermountain West Mark C. McKinstry, Wayne A. Hubert, Stanley H. Anderson, 2004-07-01 Wetlands and riparian areas between the Rocky Mountains and the Sierra Nevada are incredibly diverse and valuable habitats. More than 80 percent of the wildlife species in this intermountain region depend on these wetlands, which account for less than 2 percent of the land area for their survival. At the same time, the wetlands also serve the water needs of ranchers and farmers, recreationists, vacation communities, and cities. It is no exaggeration to call water the liquid gold of the West, and the burgeoning human demands on this scarce resource make it imperative to understand and properly manage the wetlands and riverine areas of the Intermountain West. This book offers land managers, biologists, and research scientists a state-of-the-art survey of the ecology and management practices of wetland and riparian areas in the Intermountain West. Twelve articles examine such diverse issues as laws and regulations affecting these habitats, the unique physiographic features of the region, the importance of wetlands and riparian areas to fish, wildlife, and livestock, the ecological function of these areas, their value to humans, and the methods to evaluate these habitats. The authors also address the human impacts on the land from urban and suburban development, mining, grazing, energy extraction, recreation, water diversions, and timber harvesting and suggest ways to mitigate such impacts. In addition to the editors, the contributors to this volume are Paul Adamus, Oregon State University, Corvallis; Michael A. Bozek, University of Wisconsin, Stevens Point; Robert C. Ehrhart, Oregon State University, Bend; James H. Gammonley, Colorado Division of Wildlife, Fort Collins; Paul L. Hansen, Bitterroot Restoration, Corvallis, Montana; E.
