Reason And Dignity:

The Mysteries of Paris Eugène Sue,1844 *The Mysteries of Paris; from the French, by J. D. Smith ... with ... Engravings ... Designed and Executed by T. Onwhyn* Marie Joseph Eugène SUE,1844 **Inhuman Conditions** Pheng Cheah,2006
Through an examination of debates about cosmopolitanism and human rights *Inhuman Conditions* questions key ideas about what it means to be human that underwrite our understanding of globalisation *Summae theologiae partis I quaestiones* 75-77 Saint Thomas (Aquinas),1921 *The Works of Orestes A. Brownson: Explanations and index* Orestes Augustus Brownson,1887 **Critique of Practical Reason** Immanuel Kant,1909 With this volume Werner Pluhar completes his work on Kant's three Critiques an accomplishment unique among English language translators of Kant At once accurate fluent and accessible Pluhar's rendition of the Critique of Practical Reason meets the standards set in his widely respected translations of the Critique of Judgment 1987 and the Critique of Pure Reason 1996 Stephen Engstrom's Introduction discusses the place of the second Critique in Kant's critical philosophy its relation to Kant's ethics and its practical purpose and provides an illuminating outline of Kant's argument *Religion and Human Rights* Wilhelm Gräb,Lars Charbonnier,2015-05-19 Current processes of globalization are challenging Human Rights and the attempts to institutionalize them in many ways The question of the connection between religion and human rights is a crucial point here The genealogy of the Human Rights is still a point of controversies in the academic discussion Nevertheless there is consensus that the Christian tradition especially the doctrine that each human being is an image of God played an important role within the emergence of the codification of the Human Rights in the period of enlightenment It is also obvious that the struggle against the politics of apartheid in South Africa was strongly supported by initiatives of churchy and other religious groups referring to the Human Rights Christian churches and other religious groups do still play an important role in the post apartheid South Africa They have a public voice concerning all the challenges with which the multiethnic and economically still deeply divided South African society is faced with The reflections on these questions in the collected lectures and essays of this volume derive from an academic discourse between German and South African scholars that took place within the German South African Year of Science 2012

Why Law Matters Alon Harel, 2014-02-14 Contemporary political and legal theory typically justifies the value of political and legal institutions on the grounds that such institutions bring about desirable outcomes such as justice security and prosperity In the popular

imagination however many people seem to value public institutions for their own sake The idea that political and legal institutions might be intrinsically valuable has received little philosophical attention Why Law Matters presents the argument that legal institutions and legal procedures are valuable and matter as such irrespective of their instrumental value Harel advances the argument in several ways Firstly he examines the value of rights Traditionally it is believed that rights are valuable because they promote the realisation of values such as autonomy Instead Harel argues that the values underlying some rights are partially constructed by entrenching rights Secondly he argues that the value of public institutions are not grounded ONLY in the contingent fact that such institutions are particularly accountable to the public Instead some goods are intrinsically public their value hinges on their public provision Thirdly he shows that constitutional directives are not mere contingent instruments to promote justice In the absence of constitutional entrenchment of rights citizens live at the mercy of their legislatures even if legislatures protect justice adequately Lastly Harel defends judicial review on the grounds that it is an embodiment of the right to a hearing The book shows that instrumental justifications fail to identify what is really valuable about public institutions and fail to account for their enduring appeal More specifically legal theorists fail to be attentive to the sentiments of politicians citizens and activists and to theorise public concerns in a way that is responsive to these sentiments
