Consciously Nathaniel Branden,1999-06-16 The practice of living consciously invites us to rethink many of our beliefs about our everyday activities about morality about life in the Information Age about God **Art-of-Living** Bernhard Schmitz,2016-09-29 This volume examines the questions of what constitutes a good life and how one can achieve happiness and well being and analyses different ways in which people can strive for a good life First it presents an overview on important concepts in psychology that are related to living a good life Then a new approach is introduced the concept of art of living as a holistic way to reach happiness Empirical studies are reported involving a questionnaire for measuring art of living and the validity of the questionnaire is demonstrated with respect to a wide range of concepts In addition the volume provides results from empirical studies showing that and how art of living and happiness can be enhanced Several intervention studies are described in detail which have been performed with different groups of subjects including pupils university students and employees Also results of interviews are summarized which were held with people who had been nominated as exemplary artists of living The volume concludes with a description of art of living in autobiographies and presents suggestions for further research with respect to art of living **The Art of Living & Dying Well** Peter Roche de Coppens,2012-03-15 To live well one must be able to die well and vice versa Life and death are two faces of the same coin but with a fundamental transformation when one moves from the spiritual dimension to the physical and back to the spiritual Actually there is but one thing Life without beginning and without ending but with two expressions one on the spiritual plane and the other on the material plane Today in the West we find a great paradox we have made enormous progress at the material technological level but not at the human and psychological level One aspect of this paradox is that we do not die

well We are afraid of death we deny it and seek to postpone it for as long as possible at an enormous human and economic cost The spiritual tradition always had very substantial cognitive and practical contributions to make to our understanding of life death and life after death The basic objective of this book is to present these contributions and help us die with more dignity and less fear In fact this work was written to help you live and die without fear anxiety guilt blame or frustration with an appreciation and gratitude for all our human experiences which include birth life and death **The Art of Living**

Alexander Nehamas,1998-09-01 For much of its history philosophy was not merely a theoretical discipline but a way of life an art of living This practical aspect of philosophy has been much less dominant in modernity than it was in ancient Greece and Rome when philosophers of all stripes kept returning to Socrates as a model for living The idea of philosophy as an art of living has survived in the works of such major modern authors as Montaigne Nietzsche and Foucault Each of these writers has used philosophical discussion as a means of establishing what a person is and how a worthwhile life is to be lived In this wide ranging brilliantly written account Alexander Nehamas provides an incisive reevaluation of Socrates place in the Western philosophical tradition and shows the importance of Socrates for Montaigne Nietzsche and Foucault Why does each of these philosophers each fundamentally concerned with his own originality return to Socrates as a model The answer lies in the irony that characterizes the Socrates we know from the Platonic dialogues Socratic irony creates a mask that prevents a view of what lies behind How Socrates led the life he did what enabled or inspired him is never made evident No tenets are proposed Socrates remains a silent and ambiguous character forcing readers to come to their own conclusions about the art of life This Nehamas shows is what allowed Montaigne Nietzsche and Foucault to return to Socrates as a model without thereby compelling them to imitate him This highly readable erudite study argues for the importance of the tradition within Western philosophy that is best described as the art of living and casts Montaigne Nietzsche and Foucault as the three major modern representatives of this tradition Full of original ideas and challenging associations this work will offer new ways of thinking about the philosophers Nehamas discusses and about the discipline of philosophy itself **The Art of Living**

Mihaela Loredana Altadonna,2023-02-09 No matter how difficult it will be and how long it will take us to spread our soul over the suffering life will always offer us blessings that must not be allowed to get lost in indifference From the moment we are born we begin to travel toward the stars creating the most beautiful arts through our steps When we die we take with us only what we have built in our hearts And if we have gone through life without learning to be spiritual architects then we will step into nothingness and our floating adrift will be the most painful experience Let us not forget that life is made of fractions of a second meant to transform us in a minute of the universe So let us travel through diversity and explore it without measuring the elapsed time Mihaela Loredana Altadonna **The Art of Living Long** Louis Cornaro,2005-02-22 Sixteenth century Venetian Ambassador and Renaissance Christian Luigi Cornaro was celebrated in his time for his stance on dietary self restraint moderate living and living to the age of 103 For these hundred of years his classic book has survived as a renowned

Morris,2004 Tom Morris s exuberant seminars and presentations to business leaders have taken the commanding heights of corporate America by storm and his books on philosophy for businesspeople have sold millions Dr Morris shows how the ideas of Stoic Philosophy which emphasizes goals like gaining command of one s passions and achieving indifference to pain and distress are completely up to date in their relevance to the practical issues people confront in the 21st century Divided into three sections Dr Morris sympathetically relates the life and intellectual achievements of the three leading Stoics the slave Epictetus the lawyer Seneca and the Roman emperor Marcus Aurelius From the bottom of society to the upwardly mobile middle and all the way to the top these thinkers saw life deeply

Education and Schmid's Art of Living Christoph Teschers,2017-07-14 Instead of simply following the current neoliberal mantra of proclaiming economic growth as the single most important factor for maintaining well being Education and Schmid s Art of Living revisits the idea of an education focused on personal development and the well being of human beings Drawing on philosophical ideas concerning the good life and recent research in positive psychology Teschers argues in favour of shifting the focus in education and schooling towards a beautiful life and an art of living for today s students Containing a thorough discussion of the ideas of contemporary German philosopher Wilhelm Schmid this book considers the possible implications of developing a more humanistic and life centred approach to educational policy research and practice showing that Schmid s concept of

Lebenskunst provides a firm philosophical basis for this endeavour Among others this book draws on analytical and continental traditions to challenge current views and assumptions in regard to education and the role of schooling for contemporary societies As a result Teschers work is sure to spark a debate about the direction of educational policy and practice in the 21st century Education and Schmid s Art of Living is essential reading for academics and students with an interest in education Given the importance of such topics as the relationship between education and society teacher education and how best to structure schools and learning environments Teschers work will appeal to academics and students in a diverse range of fields including education philosophy sociology and psychology

The Art of Living John Sellars,2013-11-20 Ancient philosophy was conceived as a way of life or an art of living but if ancient philosophers did think that philosophy should transform an individual s way of life then what conception of philosophy stands behind this claim John Sellars explores this question through a detailed account of ancient Stoic ideas about the nature and function of philosophy He considers the Socratic background to Stoic thinking about philosophy and Sceptical objections raised by Sextus Empiricus and offers readings of late Stoic texts by Epictetus and Marcus Aurelius Sellars argues that the conception of philosophy as an art of living inaugurated by Socrates and developed by the Stoics has persisted since antiquity and remains a living alternative to

modern attempts to assimilate philosophy to the natural sciences It also enables us to rethink the relationship between an individual's philosophy and their biography The book appears here in paperback for the first time with a new Preface by the author

The Art of Living Well Paul van Tongeren, 2020-05-14 In this first English translation of the prize winning Dutch title *Leven is Een Kunst* Paul van Tongeren creates a new kind of virtue ethics one that centres on how to live well in our contemporary world While virtue ethics is based on the moral philosophy of Aristotle it has had many interpretations and iterations throughout history and features prominently in the thinking of the Stoics Christian narratives and the writings of Nietzsche The Art of Living Well explores and expands upon these traditions using them as a basis to form a new interpretation one that foregrounds art and creativity as paramount to the struggle to act in an authentic and moral way Acting as both a clear introduction to virtue ethics and moral philosophy and a serious work of original philosophy this book connects philosophy with real lived experience and tackles head on the perennial philosophical question how do we live well

The Art of Living Foundation Stephen Jacobs, 2016-03-09 The Hindu derived meditation movement The Art of Living AOL founded in 1981 by Sri Sri Ravi Shankar in Bangalore has grown into a global organization which claims presence in more than 150 countries Stephen Jacobs presents the first comprehensive study of AOL as an important transnational movement and an alternative global spirituality Exploring the nature and characteristics of spirituality in the contemporary global context Jacobs considers whether alternative spiritualities are primarily concerned with individual wellbeing and can simply be regarded as another consumer product The book concludes that involvement in movements such as AOL is not necessarily narcissistic but can foster a sense of community and inspire altruistic activity

The Lost Art of Living, **Aging and the Art of Living** Jan Baars, 2012-10-01 Baars explores philosophers from Plato to Foucault as they consider the meaning of aging and wisdom in our society In this deeply considered meditation on aging in Western culture Jan Baars argues that in today's world living longer does not necessarily mean living better He contends that there has been an overall loss of respect for aging to the point that understanding and dealing with aging people has become a process focused on the decline of potential and the advance of disease rather than on the accumulation of wisdom and the creation of new skills To make his case Baars compares and contrasts the works of such modern era thinkers as Foucault Heidegger and Husserl with the thought of Plato Aristotle Sophocles Cicero and other Ancient and Stoic philosophers He shows how people in the classical period less able to control health hazards had a far better sense of the provisional nature of living which led to a philosophical and religious emphasis on cultivating the art of living and the idea of wisdom This is not to say that modern society's assessments of aging

are insignificant but they do need to balance an emphasis on the measuring of age with the concept of living in time Gerontologists philosophers and students will find Baars discussion to be a powerful perceptive conversation starter

Reforming the Art of Living Rico Vitz,2014-10-20 Descartes s concern with the proper method of belief formation is evident in the titles of his works e g *The Search after Truth* *The Rules for the Direction of the Mind* and *The Discourse on Method* of rightly conducting one s reason and seeking the truth in the sciences It is most apparent however in his famous discussions both in the *Meditations* and in the *Principles* of one particularly noteworthy source of our doxastic errors namely the misuse of one s will What is not widely recognized let alone appreciated and understood is the relationship between his concern with belief formation and his concern with virtue In fact few seem to realize that Descartes regards doxastic errors as moral errors and as sins both because such errors are intrinsically vicious and because they entail notably deleterious social consequences *Reforming the Art of Living* seeks to rectify this rather common oversight in two ways First it aims to elucidate the nature of Descartes s account of virtuous belief formation Second it aims both i to illuminate the social significance of Descartes s philosophical program as it relates to the understanding and practice not of science but of religion and ii to develop a kind of Leibnizian critique of this aspect of his program More specifically it aims to show that Descartes s project is dangerous insofar as it is subversive not only of traditional Christianity but also of other traditional forms of religion both in theory and in practice
