Reasoning and Unification over Conceptual Graphs Dan Corbett, 2012-12-06 Reasoning and Unification over Conceptual Graphs is an exploration of automated reasoning and resolution in the expanding field of Conceptual Structures Designed not only for computing scientists researching Conceptual Graphs but also for anyone interested in exploring the design of knowledge bases the book explores what are proving to be the fundamental methods for representing semantic relations in knowledge bases While it provides the first comprehensive treatment of Conceptual Graph unification and reasoning the book also addresses fundamental issues of graph matching automated reasoning knowledge bases constraints ontology and design With a large number of examples illustrations and both formal and informal definitions and discussions this book is excellent as a tutorial for the reader new to Conceptual Graphs or as a reference book for a senior researcher in Artificial Intelligence Knowledge Representation or Automated Reasoning Conceptual Structures: Knowledge Architectures for Smart Applications Uta Priss, Simon Polovina, Richard Hill, 2007-07-09 Researchers and professionals in the relevant fields will find this book a must read as it defines the leading edge of current research into conceptual structures It constitutes the refereed proceedings of the 15th International Conference on Conceptual Structures held in Sheffield UK in July 2007 With almost 50 papers contained in its 500 pages it includes a special focus on the application of conceptual structures in business and technological settings and is organized into topical sections for ease of reference Conceptual Structures at Work Karl Erich Wolff, 2004-07-05 This book constitutes the refereed proceedings of the 12th International Conference on Conceptual Structures ICCS 2004 held in Huntsville AL USA in July 2004 The 21 revised full papers presented together with 5 invited papers were carefully reviewed and selected for inclusion in the book The papers are organized in topical sections on data and conceptual structures concept lattices and concept graphs conceptual frameworks for applications and reasoning with conceptual structures *Foundations of Intelligent Systems* Ning Zhong, Zbigniew W Ras, Shusaku Tsumoto, Einoshin Suzuki, 2003-10-10 This volume contains the papers selected for presentation at the 14th International Symposium on Methodologies for Intelligent Systems ISMIS 2003 held in Maebashi City Japan 28 31 October 2003 The symposium was organized by the Maebashi Institute of Technology in co operation with the Japanese Society for Artificial Intelligence It was sponsored by the Maebashi Institute of Technology Maebashi Convention Bureau Maebashi City Government Gunma Prefecture Government US AFOSR AOARD the Web Intelligence Consortium Japan Gunma Information Service Industry Association and Ryomo Systems Co Ltd ISMIS is a conference series that was started in 1986 in Knoxville Tennessee Since then it has been held in Charlotte North Carolina Knoxville Tennessee Turin Italy Trondheim Norway Warsaw Poland Zakopane Poland and Lyon France The program committee selected the following major areas for ISMIS 2003 active media human computer interaction autonomic and evolutionary computation intelligent agent technology intelligent information retrieval intelligent information systems knowledge representation and integration knowledge discovery and data mining

Computational Intelligence: A Compendium John Fulcher, 2008-05-28 Computational Intelligence A Compendium presents a well structured overview about this rapidly growing field with contributions from leading experts in Computational Intelligence The main focus of the compendium is on applied methods tried and proven as being effective to realworld problems which is especially useful for practitioners researchers students and also newcomers to the field This state of handbook style book has contributions by leading experts Conceptual Structures for Knowledge Creation and

Communication Aldo de Moor, Wilfried Lex, Bernhard Ganter, 2003-09-09 This volume contains the proceedings of ICCS 2003 the 11th International Conference on Conceptual Structures This conference series continues to be the main forum for the presentation and discussion of state of the art research on conceptual structures The theories methodologies and techniques presented here have grown considerably in scope in recent years On the other hand solid bridges spanning the boundaries between such diverse fields as Conceptual Graphs Formal Concept Analysis and others are increasingly being built in our community The theme of this year's conference was Conceptual Structures for Knowledge Creation and Communication In our increasingly interconnected world the potential support of information technology for the creation and communication of quality knowledge is almost boundless However in reality many conceptual barriers prevent the use of this potential The main problem is no longer in the technological infrastructure but in how to navigate use and manage the wealth of available data resources Thus the question is how to create and communicate from data the information and ultimately the knowledge

required by an ever more complex and dynamic society Conceptual structures research focuses on what is behind and between the data glut and the information overload that need to be overcome in answering this question In this way our field contributes important ideas on how to actually realize some of the many still ambitious visions All regular papers were reviewed in a thorough and open process by at least two reviewers and one editor

Conceptual Structures: Standards and Practices William M. Tepfenhart, Walling Cyre, 2007-07-23 With all of the news about the Internet and the Y2K problem it is easy to forget that other areas of computer science still exist Reading the newspaper or watching the television conveys a very warped view of what is happening in computer science This conference illustrates how a maturing subdiscipline of computer science can continue to grow and integrate within it both old and new approaches despite or perhaps due to a lack of public awareness The conceptual graph community has basically existed since the 1984 publication of John Sowa's book *Conceptual Structures Information Processing In Mind and Machine* In this book John Sowa laid the foundations for a knowledge representation model called conceptual graphs based on semantic networks and the existential graphs of C S Peirce Conceptual graphs constitute a very powerful and expressive knowledge representation scheme inheriting the benefits of logic and the mathematics of graphs The expressiveness and formal underpinnings of conceptual graph theory have attracted a large international community of researchers and scholars The International Conferences on Conceptual Structures and this is the seventh in the series is the primary forum for these researchers to report their progress and activities As in the past the doors were open to admit alternate representation models and approaches

Conceptual Graphs for Knowledge Representation Guy W. Mineau, Bernard Moulin, 1993-07-14 Artificial Intelligence and cognitive science are the two fields devoted to the study and development of knowledge based systems KBS Over the past 25 years researchers have proposed several approaches for modeling knowledge in KBS including several kinds of formalism such as semantic networks frames and logics In the early 1980s J F Sowa introduced the conceptual graph CG theory which provides a knowledge representation framework consisting of a form of logic with a graph

notation and integrating several features from semantic net and frame representations Since that time several research teams over the world have been working on the application and extension of CG theory in various domains ranging from natural language processing to database modeling and machine learning This volume contains selected papers from the international conference on Conceptual Structures held in the city of Quebec Canada August 4-7 1993 The volume opens with invited papers by J F Sowa B R Gaines and J Barwise Conceptual Graphs and Fuzzy Logic Tru Hoang Cao, 2010-07-17 In this volume first we formulate a framework of fuzzy types to represent both partial truth and uncertainty about concept and relation types in conceptual graphs Like fuzzy attribute values fuzzy types also form a lattice laying a common ground for lattice based computation of fuzzy granules Second for automated reasoning with fuzzy conceptual graphs we develop foundations of order sorted fuzzy set logic programming extending the theory of annotated logic programs of Kifer and Subrahmanian 1992 Third we show some recent applications of fuzzy conceptual graphs to modelling and computing with generally quantified statements approximate knowledge retrieval and natural language query understanding

Representation and Management of Narrative Information Gian Piero Zarri, 2009-06-29 A big amount of important economically relevant information is buried within the huge mass of multimedia documents that correspond to some form of narrative description Due to the ubiquity of these narrative resources being able to represent in a general accurate and effective way their semantic content i e their key meaning is then both conceptually relevant and economically important In this book we present the main properties of NKRL Narrative Knowledge Representation Language a language expressly designed for representing in a standardised way the meaning of complex multimedia narrative documents NKRL is a fully implemented language environment The software exists in two versions an ORACLE supported version and a file oriented one Written from a multidisciplinary perspective this exhaustive description of NKRL and of the associated knowledge representation principles will be an invaluable source of reference for practitioners researchers and graduates
