Libraries Build Community: Libraries and Popular Culture **Reconstructing the Common Good** Gary J. Dorrien, 2008-05-01. This landmark study in the history and theory of modern Christian socialism examines the work of such major figures as Rauschenbusch, Tillich, Moltmann, Gutierrez, and Miguez Bonino. Dorrien argues that these theologians provide a singular context for addressing questions of freedom and totalitarianism, sacralization and democratization, individual autonomy, and the common good. He focuses on the differing conceptions of the common good that these major theorists have propounded and explicates as well their theological arguments on the relationship between the Kingdom of God and projects of historical praxis. With a new Preface addressing the tumultuous events in Eastern Europe, *Reconstructing the Common Good* develops and sustains a forceful argument for the continuing relevance of a decentralized, pluralistic, democratic form of socialism.

The Servant Economy Jeff Faux, 2012-05-17. Renowned economist Jeff Faux explains why neither party's leaders have a plan to remedy America's unemployment, inequality, or long economic slide. America's political and economic elite spent so long making such terrible decisions that they caused the collapse of 2008. So how can they continue down the same road? The simple answer: that no in-charge one wants to publicly acknowledge because things are still pretty great for the people who run America. It was an accident of history, Jeff Faux explains, that after World War II the U.S. could afford a prosperous middle class, a dominant military, and a booming economic elite at the same time. For the past three decades, all three have been competing with the middle class, always losing. Soon the military will decline as well. The most plausible projections Faux explores foresee a future economy nearly devoid of production and exports, with the most profitable industries existing solely to serve the wealthiest 1%. The author's last book, *The Global Class War*, sold over 20,000 copies by correctly predicting the permanent decline of our debt-burdened middle class at the hands of our offshoring executives, out-of-control financiers, and their friends in Washington. Since his last book, Faux is repeatedly asked what either party will do to face these mounting crises. After looking over actual policies, proposed plans, non-partisan reports, and think tank papers, his astonishing conclusion is more of the same.

Eclipse of Justice George E. McCarthy, Royal W. Rhodes, 2008-12-21. A sociologist and a church historian provide a probing scholarly critique of Economic Justice for All. The American bishops' pastoral letter on Catholicism and the U.S. economy. McCarthy and Rhodes examine the letter's focus on poverty, inequality, and powerlessness in American society. They review classical concepts of social ethics and economic justice as applied by the bishops to analyze the social, political, and economic institutions of America. By examining reactions

to the letter from both the political left and right *Eclipse of Justice* opens up the full range of debate about the nature of social ethics The first part of *Eclipse of Justice* presents the moral dilemma created by the bishops critique of liberalism they pronounced it a social and moral scandal and explores the antecedents papal episcopal and lay that provided the ideas and vocabulary for the bishops letter The second part analyzes the pastoral letter and locates it within the larger context of debates about economic structures in modern liberalism The third part examines attempts of the bishops to relate Christian social doctrine to international political and economic issues and probes the contributions of liberation theology and dependency theory

Conservative Capitalism in Britain and the United States (RLE Social Theory) Raymond Plant, Kenneth Hoover, 2014-08-21 The shock waves of conservative advances have reached into every corner of American and British politics Parties of the right have prospered while parties of the left have stumbled retreated and are now regrouping The agenda for both right and left is set by the terms of the free market doctrines that have displaced the post war consensus politics of liberal capitalism This volume describes and challenges the ideological basis of the free market right Though critiques of the policies of the Reagan and Thatcher governments are hardly in short supply this major new study offers the most thorough and up to date analysis available No other book considers in such depth conservative ideas and policies on both sides of the Atlantic It provides the first clear account of the distinction between conservative and other forms of capitalism It also examines the fault lines dividing opposing camps within conservative

capitalism and their consequences for domestic policy in Britain and the US Linking political theory and public policy it is one of the few critical appraisals of the New Right based on a clear understanding of what the arguments for the free market really are Finally the authors demonstrate what the left needs to learn from its failures how to remould its understanding of the relationship between politics and the market and how to recapture the lost initiative **The Business of**

Beyond Capitalism Gar Alperovitz, 2011 America Beyond Capitalism is a book whose time has come Gar Alperovitz s expert diagnosis of the long term structural crisis of the American economic and political system is accompanied by detailed practical answers to the problems we face as a society Unlike many books that reserve a few pages of a concluding chapter to offer generalized tentative solutions Alperovitz marshals years of research into emerging new economy strategies to present a comprehensive picture of practical bottom up efforts currently underway in thousands of communities across the United States All democratize wealth and empower communities not corporations worker ownership cooperatives community land trusts social enterprises along with many supporting municipal state and longer term federal strategies as well America Beyond Capitalism is a call to arms an eminently practical roadmap for laying foundations to change a faltering system that increasingly fails to sustain the great American values of equality liberty and meaningful democracy *Building Cities that Work* Edmund P. Fowler, 1993 Since 1945 North Americans have spent hundreds of billions of dollars on urban development literally transforming the landscape of the continent This development has been disastrous Edmund Fowler maintains because it is inordinately expensive destructive of the environment and disruptive of healthy social life and authentic politics

Revealing the connections between our basic cultural beliefs and why we build the way we do he stresses that to build cities that work we must become aware of how our personal choices contribute to the form of the built environment The Paradox of Democratic Capitalism David F. Prindle, 2006-08-25 A truly interdisciplinary enterprise The Paradox of Democratic Capitalism examines the interplay of ideas about politics economics and law in American society from the pre revolutionary era to the eve of the September 11 attacks David F Prindle argues that while the United States was founded on liberalism there is constant tension between two ideals of the liberal tradition capitalism and democracy Tracing the rise of natural law doctrine from neoclassical economics Prindle examines the influence of economic development in late medieval society on the emergence of classical liberalism in early America and likens that influence to the impact of orthodox economics on contemporary American society Prindle also evaluates political economic and legal ideas through the lens of his own beliefs He warns against the emerging extremes of liberal ideology in contemporary American politics where the right s definition of capitalism excludes interference from democratic publics and the left s definition of democracy excludes a market based economy
