The Satapatha-brāhmaṇa according to the text of the Mādhyandina school Julius Eggeling, 1882 *The Self in the Cell* Sean C. Grass, 2014-01-27 Michel Foucault's writing about the Panopticon in *Discipline and Punish* has dominated discussions of the prison and the novel and recent literary criticism draws heavily from Foucauldian ideas about surveillance to analyze metaphorical forms of confinement policing detection and public scrutiny and censure But real Victorian prisons and the novels that portray them have few similarities to the Panopticon Sean Grass provides a necessary alternative to Foucault by tracing the cultural history of the Victorian prison and pointing to the tangible relations between Victorian confinement and the narrative production of the self *The Self in the Cell* examines the ways in which separate confinement prisons with their demand for autobiographical production helped to provide an impetus and a model that guided novelists explorations of the private self in Victorian fiction **A Tale of Two Cities** Charles Dickens, 1874 *The Chap-book* Herbert Stuart Stone, 1897 **Reincarnation in America** Lee Irwin, 2017-07-31 *Reincarnation in America* An Esoteric History surveys the complex history of reincarnation theories across multiple fields of discourse in a pre American context ranging from early Greek traditions to Medieval Christian theories Renaissance esotericism and European Kabbalah all of which had adherents that brought those theories to America Rebirth theories are shown in all these groups to be highly complex and often disjunctive with mainstream religions even though members of conventional religions frequently affirm the possibility of rebirth As a history of an idea reincarnation theory is a current vital belief pattern that cuts across a wide spectrum of social cultural and scientific domains in a long complex history not reducible to any specific religious or theoretical explanation This book is cross disciplinary and multicultural linking religious studies perspectives with science based research it draws upon many distinct disciplines and avoids reduction of reincarnation to any specific theory The underlying thesis is to demonstrate the complexity of reincarnation theories what is unique is the historical overview and the gradual shift away from religious theories of rebirth to new theories that are therapeutic and trans traditional The Kindertransport Jennifer Craig-Norton, 2019-06-25 A timely study of the effects of family separation on child refugees using newly discovered archival sources from the WWII era Highly recommended Choice *The Kindertransport* an organized effort to extract children living under the threat of Nazism lives in the popular memory as well as in literature as a straightforward act of rescue and salvation but these celebratory accounts leave little room for a deeper more complex analysis This volume reveals that in fact many children experienced difficulties with settlement they were treated inconsistently by refugee agencies their parents had complicated reasons for giving them up and their caregivers had a variety of motives for taking

them in Against the grain of many other narratives Jennifer Craig Norton emphasizes the use of newly discovered archival sources which include the correspondence of refugee agencies carers Kinder and their parents and juxtaposes this material with testimonial accounts to show readers a more nuanced and complete picture of the Kindertransport In an era in which the family separation of refugees has commanded considerable attention this book is a timely exploration of the effects of family separation as it was experienced by child refugees in the age of fascism *Psychological Review* James Mark
