the east Revealing how the shadow of war affects the lives of Buddhist and Muslim communities in Ladakh Beyond Lines of Control is an impassioned call for the inclusion of the region s cultural history and politics in discussions about the status of Kashmir Aggarwal brings the insights of performance studies and the growing field of the anthropology of international borders to bear on her extensive fieldwork in Ladakh She examines how social and religious boundaries are created on the Ladakhi frontier how they are influenced by directives of the nation state and how they are shaped into political struggles for regional control that are legitimized through discourses of religious purity patriotism and development She demonstrates in lively detail the ways that these struggles are enacted in particular cultural performances such as national holidays festivals rites of passage ceremonies films and archery games By placing cultural performances and political movements in Ladakh center stage Aggarwal rewrites the standard plot of nation and border along the Line of Control

Fire and Ice: Soot, Solidarity, and Survival on the Roof of the World Jonathan Mingle,2015-03-24 A thousand years ago in a Himalayan valley the village of Kumik was founded For generations Kumik villagers survived by learning to cultivate their mountain terrain drawing from the waters of the glacier and snows above the village But now the glacier is almost gone and Kumik is dying Why As Fire and Ice reveals the culprit is black carbon the most dangerous pollutant in the world and the least understood Black carbon absorbs more heat per unit of mass in the atmosphere than greenhouse gases and contributes as much to melting the glaciers of the Himalaya as carbon dioxide It s also a major component of the household air pollution that causes 4 3 million deaths each year from respiratory and cardiovascular illnesses and 3 million more from outdoor pollutants such as industrial exhaust Black carbon threatens to overwhelm Kumik unless the village can change the way it cooks heats farms and lives In Fire and Ice Jonathan Mingle weaves a dramatic narrative of one village s inspiring efforts to adapt to a rapidly changing environment and a scientific detective tale about the impact of fire on every nation Ranging from the Tibetan Plateau to New York and Washington D C from Delhi and Kathmandu and China to northern California Fire and Ice is a

Fire and Ice Jonathan Mingle, 2025-06-25 High in the Himalayan valley of Zaskar in northwest India sits a village as isolated as the legendary Shangri La Long fed by runoff from glaciers and lofty snowfields Kumik a settlement of thirty nine mud brick homes has survived and thrived in one of the world's most challenging settings for a thousand years But now its people confront an existential threat chronic crippling drought which leaves the village canal dry and threatens to end their ancient culture of farming and animal husbandry Fire and Ice weaves together the story of Kumik's inspiring response to this calamity with the story of black carbon Black carbon from inefficient fires the particulate residue that makes soot dark is the second largest contributor to global warming after carbon dioxide It is also a key ingredient of the air pollution that public health experts regard as humanity's greatest environmental health risk worldwide soot laden smoke from household hearth fires and outdoor sources combine to kill over seven million people around the world every year Jonathan Mingle describes the joys and struggles of daily life in the Zaskar Valley where villagers are buffeted by powerful environmental and economic forces while also tracing black carbon's dark fingerprints outward from Kumik and around the world Mingle investigates its impacts on snow ice and water from Mt Everest to California and the silent health epidemic it fuels from New York to New Delhi Combining cultural history detailed reportage climate and energy science and dramatic storytelling Fire and Ice is a profound examination of the global challenges of averting climate chaos and lifting billions out of energy poverty and water scarcity Can Kumik's people come together to reinvent fire harness what remains of their life sustaining ice and reinvigorate their traditions of solidarity in time to save themselves Can the rest of us rise to the same challenge Fire and Ice connects these questions with the work of enterprising scientists engineers entrepreneurs and activists around the world in a narrative that combines mythology reason humor persistence and hope in a race against a global clock
