Riley,Ontario Geological Survey,Ontario. Ministry of Northern Development and Mines,1994 Peatland

resources of southeastern Ontario were investigated as part of the Peatland Inventory Project conducted from 1982-85. Data from Peterborough, Kingston, Belleville, Pembroke, Ottawa, Brockville, and Parry Sound are presented and integrated to provide a regional overview of the resource. The methods used for the peatland inventory ranged from on-site detailed mapping and sampling to regional satellite image interpretation. Laboratory analyses of the physical and chemical properties of the peat were also undertaken for 483 samples. Of the 759 peatlands/wetlands larger than 100 ha that were identified in the region, 143 were surveyed.

Transitions To Alternative Energy Systems Thomas Baumgartner, 2019-03-22

The industrial world was built to run on cheap oil and now the cheap oil has run out. For a while longer the West will depend for its energy upon expensive oil, much of it obtained from sources that are geographically remote or politically unstable, so in the near future the world must shift from oil to other sources of energy. **TRANSITIONS TO ALTERNATIVE ENERGY SYSTEMS** explores how such change can best be encouraged. The governments of the world then do not have the option of piously washing their hands of the energy crisis. They must be involved; they must pursue wise policies and they must prove far more effective in the future than they have in the past. Through its careful analysis of past programs to promote renewable resource development, Tom Baumgartner's new book provides the public sector with precisely the kind of guidance it needs.
