Current List of Medical Literature , 1947 Includes section Recent book acquisitions varies Recent United States publications formerly published separately by the U S Army Medical Library Current Catalog National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70 **Recent Advances in Diagnosis and Treatment of Brain Tumors: From Pediatrics to Adults** John Bianco, Dimitrios N. Kanakis, Cesare Zoia, Archya Dasgupta, Majaz Moonis, 2025-06-12 In the last few years an impressive development has been achieved in the arena of new diagnostic and therapeutic approaches for brain tumors both in children and adults This has in turn led to the recognition of new tumour entities as well as to better categorization of the existing ones The recent WHO classification of the CNS tumors 2021 has been entirely revised and the term integrated diagnosis has been since then applied which refers to a combination of the classical histopathological diagnosis with the accompanying molecular results of some of the most common tumors In addition a lot of progress has been made in the field of imaging with the invention of more accurate methods and the improvement of previously established diagnostic modalities As a result of the aforementioned achievements in the diagnosis of brain tumors new treatment options have been introduced which respond more successfully to the handling of the several tumor entities Due to the immense progress not only in the field of diagnosis but also in the treatment of brain tumors it is of utmost importance to present the newly identified biomarkers and innovative techniques which allow on the one hand a more accurate diagnosis and on the other hand a more precise therapeutic intervention Since a lot of research is conducted at present with this regard the result of these investigations should be shared with the broader research community in order to improve thereafter both the available diagnostic methods in the fields of histopathology and imaging and the therapeutic techniques in the areas of neurosurgery and chemo radiotherapy Undoubtfully this will contribute substantially in the accomplishment of the target of personalized medicine in the public The current Research Topic aims to bring together new discoveries in the diagnosis and therapy of pediatric and adult brain tumors In this context there is an open invitation to all the researchers and clinicians who are involved in this area to participate actively by contributing their valuable results and

experiences with research focused on primary brain tumors Moving towards our actual goal as medical society which is not other than the implementation of personalized medicine our actual topic could be of particular value in the accomplishment of some of its fundamentals namely i precise diagnosis ii personalized intervention iii patient s participation iv prediction and prevention of the disease and v supportive care neurorehabilitation Manuscripts that are primarily in silico bioinformatics based including prognostic algorithms using large databases and do not have sufficient validation in an independent cohort of patients from one or more institutions rather than using another database and or functional validation in at least two acceptable tumor cell lines in vitro in vivo will not be considered

Recent Advances on the Modular Organization of the Cortex Manuel F. Casanova, Ioan Opris, 2015-06-22 The way you perceive the world plan make decisions and communicate your thoughts and feelings depends on the function and hierarchical arrangement of cortical modules The ability to both provide adaptive responses to our ever changing environment and to pursue a useful role in society is the most important problem faced by present day neuroscientists In essence the workings of cortical modules define the nature of our soul making each of us who we are This book provides a breath taking view of different perspectives by world renowned authorities as to the workings of these cortical modules both in the normal state and in mental disorders

Recent Advances in Immunology to Target Cancer, Inflammation and Infections Jagat Kanwar, 2012-05-09 Immunology is the branch of biomedical sciences to study of the immune system physiology both in healthy and diseased states Some aspects of autoimmunity draws our attention to the fact that it is not always associated with pathology For instance autoimmune

reactions are highly useful in clearing off the excess unwanted or aged tissues from the body Also generation of autoimmunity occurs after the exposure to the non self antigen that is structurally similar to the self aided by the stimulatory molecules like the cytokines Thus a narrow margin differentiates immunity from auto immunity as already discussed Hence finding answers for how the physiologic immunity turns to pathologic autoimmunity always remains a question of intense interest However this margin could be cut down only if the physiology of the immune system is better understood The individual chapters included in this book will cover all the possible aspects of immunology and pathologies associated with it The authors have taken strenuous effort in elaborating the concepts that are lucid and will be of reader s interest *List of Journals Indexed in Index Medicus* National Library of Medicine (U.S.),1979 Issues for 1977 1979 include also Special List journals being indexed in cooperation with other institutions Citations from these journals appear in other MEDLARS bibliographies and in MEDLING but not in Index medicus **Recent Advances in Ophthalmology - 10** HV Nema, Nitin

Nema, **Neuroanatomical Basis of Clinical Neurology** Orhan E. Arslan,2014-08-07 Bridging the gap between the peripheral and central nervous systems the second edition of Neuroanatomical Basis of Clinical Neurology enriches understanding of neurological conditions through a conceptual approach to neuronal circuitry The book retains the basic outline of contents from the first edition integrating structural organization with Recent Advances in Humanities and Social Sciences Ahmet GÖKÇE,Betül Şeyma ALKAN,Emrullah TÖREN , Erkan SEZGİN,İbrahim YILDIZ,Oğuzhan DÜLGAROĞLU,Salih DİNÇEL,Yunus Emre KARAMANOĞLU , Rukiye DAĞALP, Yılmaz AKDİ,Seçil GÜRÜN KARATEPE,Tuba KALÇIK ÜSTÜNDAĞ,Emrullah KALKAN,Olkan SENEMOĞLU ,Şeyda BÜKRÜCÜ KAZKONDU,Yavuz Selim BALCIOĞLU, Bülent SEZEN,2023-03-25 Recent Advances in Humanities and Social Sciences **Recent Advances in Tryptophan**

Research Graziella Allegri,Carlo V.L. Costa,Antonella Bertazzo,2012-12-06 Wide and fascinating is the field of research on tryptophan a most versatile amino acid transformed as it is in our organism into many biologically active substances This volume contains the proceedings of the Eighth International Meeting on Tryptophan Research held at the University of Padova Padova Italy from June 25 to 29 1995 under the auspices of the University of Padova National Research Council Italian Chemical Society Division of Pharmaceutical Sciences Region ofthe Veneto and City of Padova The meeting was held in Padova to commemorate Prof Luigi Musajo twenty years after his death and the editors dedicate this book to him in recognition of his pioneering work in tryptophan metabolism Prof Osamu Hayaishi delivered the Musajo Memorial Award Lecture Tryptophan oxygenase and sleep Figure I shows the ISTRY President Prof Simon N Young presenting the Musajo Memorial Medal to Prof Hayaishi during the Opening Ceremony Two hundred scientists from twenty two countries participated in the meeting These proceedings contain 121 papers encompassing a variety of topics and disciplines

Recent Advances in Nervous System Toxicology Corrado L. Galli,Luigi Manzo,Peter S. Spencer,2012-12-06 This volume addresses some facets of the adverse actions of chemical agents on the central and peripheral nervous systems in developing

and mature states Some of the effects of these chemicals are short lasting and rapidly reversible others especially those that cause structural damage to the nervous system may result in permanent damage to the organism The nervous system has several levels of vulnerability to toxic substances Some substances perturb ion channels or synaptic mechanisms required for the orderly transfer of electrochemical information within the nervous system Others disrupt sites required for the maintenance of cellular integrity and these variably result in degenerative responses of neurons and myelinating cells Further sites of vulnerability include the delicate neural vasculature and neurohumeral mechanisms responsible for physiological homeostasis The science of neurotoxicology inevitably is a multidisciplinary endeavor with contributions from biochemistry physiology morphology and behavior to name a few The challenge is to apply appropriate techniques to investigate neurotoxic phenomena The first logical step in this analysis is to determine from the point of view of the nervous system the nature of the exposure Is the chemical a single or multiple entity is it metabolized how does it gain access to neural tissue Once these factors are understood changes induced by the exposure can be described at various levels from the biochemical to the behavioral
