Recent Developments in Alcoholism Marc Galanter, 1984 Recent Developments in Alcoholism Marc Galanter, 1992 **Recent Developments in Alcoholism** Marc Galanter, 2013-11-27 From the President of the Research Society on Alcoholism In the last decade research concerning the causes and consequences of alcohol abuse and alcoholism has come of age We have witnessed a plethora of scientific findings that have shed light on some of the actions of alcohol at the molecular level Interesting new data have been forthcoming on the complexities of the development of tolerance to alcohol It is becoming increasingly appropriate to consider that tolerance to alcohol involves biological as well as psychological factors New scientific insights have been gained concerning the treatment of withdrawal as well as the presence of persistent withdrawal signs that may possibly be involved with relapse More recently new and compelling data indicating that alcoholism is a common familial disorder have appeared Clinical studies indicate that alcoholism is a heterogeneous disorder with multifactorial clinical symptomatology and genetic heterogeneity The heterogeneity of the clinical features and the heritability of the predisposing factors of alcoholism are currently under vigorous scientific investigation In the past several years sophisticated psychosocial studies have provided fundamental information on subjects at high risk for alcoholism Psychosocial and biological studies of families including alcoholics and subjects at high risk are likely to bring new insights to our understanding of etiological factors Moreover as a result of these studies we stand to develop better prevention initiatives and treatment approaches

Recent Developments in Alcoholism Marc Galanter, 2013-03-09 The purpose of this series is to provide an overview of recent research developments in the field of alcoholism so that interested professionals and researchers may keep abreast of this complex multidisciplinary work These annual volumes will present a scholarly review and analysis of selected research topics prepared by leading figures in the field Where appropriate the attempt is made to present contrasting perspectives and views particularly on issues where there is ongoing controversy The American Medical Society on Alcoholism and the Research Society on Alcoholism have undertaken this collaborative venture because of the perceived need for such a comprehensive resource These groups are both component organizations of the National Council on Alcoholism a broad based coalition which supports alcoholism treatment training and research on a national and international level This professional network has enabled us to draw on a panel of Associate Editors and on authors of international prominence The series should reflect a sophistication that will allow it to serve as a standard reference for the field

Martin,2008 Colin Martin has brought together an excellent set of contributors to produce a truly comprehensive text that will ensure all interested professionals can not only update their knowledge but also better understand each other's roles and how best to help patients and clients through shared working to achieve a common goal of better health This book is not just for people who see themselves as having a primary role in the field but also for those teachers the police and family members who live daily with its effects Professor Dame Betty Kershaw University of Sheffield UK Alcohol dependency represents an enduring problem for both the individual and wider society

Alcohol Problem Intervention in the Workplace Paul M. Roman,1990-07-24 Since the 1950s social scientists have devoted serious attention to the relationship between alcohol and the workplace In recent years awareness of the tremendous costs both human and financial associated with alcoholism has led to a dramatic increase in both scholarly and practical interest in the field Although researchers working in this area are relatively few they have sustained a lively interest in the alcohol work nexus and have attracted others to the field through conferences where ideas and research strategies are exchanged The larger part of Alcohol Problem Intervention in the Workplace provides an up to date thorough examination of the problem the research and the possible solutions This volume is directed toward both practitioners and researchers providing a wide range of new data and new ideas that bear upon coping with alcohol problems in the workplace Part I addresses issues regarding the distribution and correlates of alcohol problems and alcohol use among employees Part II is centered on issues associated with Employee Assistance Programs And Part III is a general conclusion and overview offering suggestions and implications for the practitioner in the workplace Because this collection supplies the most current thinking and information on controlling alcohol problems in the workplace it will be of particular interest to human resource management and to employee assistance specialists who are now required to pass a certification examination
