**The Fractal Organization** Patrick Hoverstadt, 2011-02-23 The world of management is in crisis the old remedies no longer work and organizations are failing at an increasing rate Although many talk of joined up thinking few offer practical guidance on how to achieve this in organizations The Fractal Organization sets down the practical implications of a well tested systemic approach to building organizations that are capable of surviving and flourishing in these turbulent times An excellent read Many organizations fail at the mercy of their own ignorance The author has done an excellent job in making the science of effective organization accessible to management providing them with a new knowledge to deal with the uncertainties that the markets place upon them Stephen J Brewis Business Architect British Telecom one of the most interesting thorough and rigorous guides to management that I have ever read introduces new insights in every chapter carries a credibility which acts as a counterbalance to the sometimes difficult message which he conveys which is that a lot of

mainstream management practice is at best ineffective and at worst downright destructive I would recommend this book to anyone interested in management or systems thinking Penny Marrington Course Chair Systems Group Open University In my opinion this book manages to present sound academic theory that is relevant and helpful to the practitioner in the business I experienced several A HA moments Pauline Marsh Strategy Director CS S International BAE SYSTEMS The insights of the Viable System Model have been open only to a select few for much too long Hoverstadt has gone furthest in bringing these ideas to a wider audience Management books have too often been serious but not practical or practical but not serious This book is both brilliantly serious and practical and often entertaining too Professor Peter Kawalak Manchester Business School Integrates mainstream management ideas with the systems ideas underpinning the VSM and flows and reads well As a starting point for developing understanding of the VSM in today s world this book improves greatly on all books that have gone before I would certainly recommend it to colleagues clients and students Dr Robin Asby Course Chair Communication and Systems Open University

Resources in Education ,1986 **A Technical Comparison of Voluntary and Involuntary Sustainable Rating Systems for Building Development** Roshan Moradali Mehdizadeh,2011 ABSTRACT There are five different publications that establish guidelines for sustainable building development that are examined in this report 1 Leadership in Energy and Environmental Design LEED 2 CalGreen 3 the International Green Construction Code IGCC 4 ASHRAE Standard 189 1 Standard 189 1 and 5 The San Francisco s Green Building Ordinance SFGBO Having multiple publications can cause confusion among building developers architects engineers building consultants or various jurisdictions on what publication to follow use or reference in building development projects This thesis will provide various parties involved in building development a thorough understanding of each publication and the similarities or differences between them which will ultimately assist in identifying areas for all publications to improve Specifically this thesis demonstrates that the Material and Energy sections for all the publications must advance beyond the current requirements Also the comparison validates that CalGreen s Tier 2 is similar to LEED s local ordinances like the SFGBO This may mean two things 1 LEED will need to advance its gold or platinum certification requirements or potentially become less relevant or 2 local ordinances should reference or adopt CalGreen Tier 2 so that there is common language between local and state regulations This thesis

identifies that LEED has the most stringent guidelines under the Building Site section out of all the publications Likewise the IGCC and Standard 189.1 have provisions under Water Use that push beyond other publications Additionally similar language between LEED and Standard 189.1 was found which was unsurprising as both publications are authored by the USGBC
