Managing High-Tech Services Using a CRM Strategy Donald F. Blumberg, 2002-12-23 As high tech service industries grow more competitive the need to develop customer focused business strategies becomes imperative Managing High Tech Services Using a CRM Strategy explores how to manage and direct any service organization utilizing a high tech strategy supported by the Customer Relationship Management CRM infrastructure enablin **The SAGE Encyclopedia of Quality and the Service Economy** Su Mi Dahlgaard-Park, 2015-05-29 Society globally has entered into what might be called the service economy Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries Services permeate all aspects of peoples lives and are becoming inseparable from most aspects of economic activity Quality management has been a dominating managerial practice since World War II With quality management initially associated with manufacturing industries one might assume the relevance of quality management might decrease with the emergence of the service economy To the contrary the emergence of the service economy strengthened the importance of quality issues which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors as well Today we talk not only about product or service quality but have even expanded the framework of quality to quality of life and quality of environment Thus quality and services have emerged in parallel as closely interrelated fields The Encyclopedia of Quality and the Service Economy explores such relevant questions as What are the characteristics nature and definitions of quality and services How do we define quality of

products quality of services or quality of life How are services distinguished from goods How do we measure various aspects of quality and services How can products and service quality be managed most effectively and efficiently What is the role of customers in creation of values These questions and more are explored within the pages of this two volume A to Z reference work

Moving Broadband Mobile Communications Forward Abdelfatteh Haidine, 2021-08-18 The deployment of 4G LTE Long Term Evolution mobile networks has solved the major challenge of high capacities to build a real broadband mobile internet This was possible mainly through a very strong physical layer and flexible network architecture However bandwidth hungry services such as virtual reality VR and augmented reality AR have been developed in an unprecedented way Furthermore mobile networks are facing other new services with extreme demand for greater reliability and almost zero latency performance like vehicle communications and the Internet of Vehicles IoV Therefore industries and researchers are investigating new physical layers and softwarization techniques and including more intelligence in 5G and beyond 5G B5G 6G This book discusses some of these softwarization techniques such as fog computing cloud computing and artificial intelligence AI and machine learning ML It also presents use cases showing practical aspects from 5G deployment scenarios where other communications technologies will co habit to build the landscape of next generation mobile networks NGMNs
