Foreign Direct Investment and Human Development Olivier de Schutter, Johan F. M. Swinnen, Jan Wouters, 2013

This book presents original research that examines the growth of international investment agreements as a means to attract foreign direct investment FDI and considers how this affects the ability of capital importing countries to pursue their development goals. The hope of countries signing such treaties is that foreign capital will accelerate transfers of technologies, create employment and benefit the local economy through various types of linkages. But do international investment agreements in fact succeed in attracting foreign direct investment? And if so, are the sovereignty costs involved worth paying? In particular, are these costs such that they risk undermining the very purpose of attracting investors, which is to promote human development in the host country? This book uses both economic and legal analysis to answer these questions that have become central to discussions on the impact of economic globalization on human rights and human development. It explains the dangers of developing countries being tempted to signal their willingness to attract investors by providing far-reaching protections to investors' rights that would annul or at least seriously diminish the benefits they have a right to expect from the arrival of FDI. It examines a variety of tools that could be used by capital exporting countries and by capital importing countries alike to ensure that FDI works for development and that international investment agreements contribute to that end. This uniquely interdisciplinary study, located at the intersection of development economics, international investment law and international human rights, is written in an accessible language and should attract the attention of anyone who cares about the role of private investment in supporting the efforts of poor countries to climb up the development ladder.

Foreign Direct Investment Bijit Bora, 2002-06 Foreign Direct Investment examines the different approaches to explaining the growth and distribution of FDI in the world. Pulling together contributions from an array of international experts, this study combines theoretical with empirical work on issues such as computable general equilibrium modelling, trade, intellectual property, environment, labour, services and development. By analysing different aspects of the growth and impact of FDI, this book is able to balance areas where research is well advanced with areas such as the role of FDI in development where many questions remain. This insightful and important text will be useful to students of development economics as well as policy makers and researchers.

Handbook of Globalisation and Development Kenneth A. Reinert, 2017-03-31 Characterised by conceptual diversity, the Handbook of Globalisation and Development presents contributions from prominent international researchers on all aspects of globalisation and carefully considers their role across a whole host of development processes. The Handbook is structured around seven key areas: international trade, international production, international finance, migration, foreign aid, a broader view and challenges. Adopting a multi-disciplinary approach, the section on a broader view delves into dimensions of globalisation and development that go beyond the mere economic, such as culture, technology, health and poverty. Carefully crafted, the chapters herein offer a rigorous and comprehensive assessment of the available research to date and provide an assessment of policy options across all areas.

considered *Foreign Direct Investment and Regional Development in East Central Europe and the Former Soviet Union* David Turnock, 2017-11-28 With the achievement of further EU and NATO enlargement a critical political and economic lens is now focused on East Central Europe and to a lesser extent the other former communist states Economic growth in each transition state and more broadly the region pivots around the prospects for foreign direct investment FDI with decisions on where foreign investors will locate their projects now vitally important This book the first one devoted to a geographical survey concentrating specifically on FDI in the region brings together a wide range of prominent authors from the US and Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of uneven distribution of FDI across the region and its constituent countries Divided into two parts the book first deals with general overarching themes and issues before applying these to more specific country case studies The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries USITC Publication ,1985
