McMaster, Chris Rizos, 2010-03-05 Following in the tradition of its popular predecessor the Manual of Geospatial Science and Technology Second Edition continues to be the authoritative volume that covers all aspects of the field both basic and applied and includes a focus on initiating planning and managing GIS projects This comprehensive resource which contains contributio

GIS and Evidence-Based Policy Making Stephen Wise, Max Craglia, 2007-12-28 Although much has been written on evidence based policy making this is the first volume to address the potential of GIS in this arena GIS and Evidence Based Policy Making covers the development of new methodological approaches emphasizing the identification of spatial patterns in social phenomena It examines organizational issues including the Socio-Economic Applications of Geographic Information Science David Kidner, Gary Higgs, Sean White, 2002-12-05 To date no one volume in the Innovations in GIS series has been given over to solely highlighting the use of up to date GIS based techniques in a range of socio economic applications This monograph redresses this gap The book begins with a short introductory chapter on the fundamental principles of GIS followed by an examination of recent *Multimedia Cartography* William Cartwright, Michael P

Peterson, Georg Gartner, 2007-02-13 Multimedia Cartography provides a contemporary overview of the issues related to multimedia cartography and the design and production elements that are unique to this area of mapping. The book has been written for professional cartographers interested in moving into multimedia mapping for cartographers already involved in producing multimedia titles who wish to discover the approaches that other practitioners in multimedia cartography have taken and for students and academics in the mapping sciences and related geographical fields wishing to update their knowledge about current issues related to cartographic design and production. It provides a new approach to cartography one based on the exploitation of the many rich media components and avant garde approach that multimedia offers. Net Locality Eric Gordon, Adriana de Souza e Silva, 2011-03-21 The first book to provide an introduction to the new theory of Net Locality and the profound effect on individuals and societies when everything is located or locatable. Describes net locality as an emerging form of location awareness central to all aspects of digital media from mobile phones to Google Maps to location based social networks and games such as Foursquare and Facebook. Warns of the threats these technologies such as data surveillance present to our sense of privacy while also outlining the opportunities for pro social developments. Provides a theory of the web in the context of the history of emerging technologies from GeoCities to GPS Wi Fi Wiki Me and Google Android.

Little notice was taken of the first web map but the development of Internet cartography since has been nothing but remarkable. The new medium of communication changed maps from static entities on paper to dynamic products of interaction. Millions of maps are now created by servers every hour and transmitted through the Internet. When we need to find a place or find out about a place we turn immediately to these servers through the Internet. In a few short years the World Wide Web has transformed the Internet into the primary medium for the dissemination of spatial information in the form of maps.

Maps and the Internet M.P. Peterson, International Cartographic Association, 2005-12-17 This book examines a new trend affecting cartography and geographic information science. Presenting the work of over 30 authors from 16 different countries the book provides an overview of current research in the new area of Internet Cartography. Chapters deal with the growth of this form of map distribution uses in education privacy issues and technical aspects from the point of view of the map provider including Internet protocols such as XML and SVG. Many see the Internet as a revolution for cartography. Previously tied to the medium

of paper and expensive large format color print technology maps had a limited distribution and use The Internet made it possible to not only distribute maps to a much larger audience but also to incorporate interaction and animation in the display Maps have also become timelier with some maps of traffic and weather being updated every few minutes In addition it is now possible to access maps from servers throughout the world Finally the Internet has made historic maps available for viewing to the public that were previously only available in map libraries with limited access Provides comprehensive coverage of maps and the internet Delivers a global perspective Combines theoretical and practical aspects **Information**
