Setting The Record Straight Responses To Misconceptions About Public Education In The United States:

Setting the Record Straight Gerald Watkins Bracey, 2004 The author goes toe to toe with the opponents of quality public education

Why America's Public Schools Are the Best Place for Kids Dave F. Brown, 2012 Despite measured success of American public schools the media politicians and big business attack public schools and their teachers with inaccuracies that threaten the equal opportunities provided by public education Research indicates that No Child Left Behind charter schools and vouchers do not improve students learning or help educators teach better The book provide reasons to support American public schools and educators Provided by publisher

Japanese Higher Education as Myth Brian J. McVeigh, 2015-03-04 In this dismantling of the myth of Japanese quality education McVeigh investigates the consequences of what happens when statistical and corporatist forces monopolize the purpose of schooling and the boundary between education and employment is blurred

Cohen, Fritz Mosher, 2020-11-25 The State of Education Policy Research is a comprehensive insightful evaluation of the strengths and weaknesses of education policy research in the U S today Editors Susan Fuhrman David Cohen and Fritz Mosher examine key issues facing policymakers and researchers including race education equity teacher quality early education privatization and the politics of education policy Collectively the chapters present a complex mosaic of education policy research that integrates the views of policy experts from education economics and related disciplines Important topics discussed in this influential new text include Politics of education Covers research on key political groups including teachers unions business roundtables parent and or religious advocates as well as state and federal lawmakers Race Discusses race as an issue as well as a non issue and includes a discussion of the testing gap State policies Provides an overview of state policies directed at improving teacher quality and discusses the reality of a teacher shortage National Trends Analyzes current trends toward centralization and standardization and the growing influence of federal and state mandates This book is appropriate for advanced courses in education administration politics and policy It will also appeal to policy researchers in education economics and political science to policy makers at the federal state and local levels and to the academic libraries serving them

Knowledge and Power in the Global Economy David Gabbard, 2017-07-05 Advancing a three fold political agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly

used terms within the rhetoric of educational reform since the early 1980s and before Part II links today's economized worldview to curricular and instructional issues. These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion: math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas. Given that language constrains as well as advances human thought, the twin tasks of de-economizing education and decolonizing society will require a vocabulary that transcends the familiar terminologies addressed in Parts I and II. The entries in Part III cultivate the beginnings of such a vocabulary as the authors elucidate innovative concepts which they view as central to the creation of truly alternative educational visions and practices.

Social Context Reform Paul Thomas, Brad J. Porfilio, Julie Gorlewski, Paul R. Carr, 2014-06-20. Currently both the status quo of public education and the No Excuses Reform policies are identical. The reform offers a popular and compelling narrative based on the meritocracy and rugged individualism myths that are supposed to define American idealism. This volume will refute this ideology by proposing Social Context Reform, a term coined by Paul Thomas which argues for educational change within a larger plan to reform social inequity such as access to health care, food, higher employment, better wages, and job security. Since the accountability era in the early 1980s, policy, public discourse, media coverage, and scholarly works have focused primarily on reforming schools themselves. Here the evidence that school-only reform does not work is combined with a bold argument to expand the discourse and policy surrounding education reform to include how social, school, and classroom reform must work in unison to achieve goals of democracy, equity, and opportunity both in and through public education. This volume will include a wide variety of essays from leading critical scholars addressing the complex elements of social context reform, all of which address the need to reconceptualize accountability and to seek equity and opportunity in social and education reform.

World Yearbook of Education 2011 Lyn Yates, Madeleine Grumet, 2011-02-01. How do curriculum conceptions of knowledge and the schooling experiences of young people engage the great issues of this tumultuous time? Curriculum is always influenced by the events that shape our world, but when testing and benchmarking preoccupy us, we can forget the world that is both the foundation and the object of curriculum. This edited volume brings together international contributors to analyze and reflect on the way the events of the last decade have influenced the curriculum in their countries. As they address nationalism in the face of economic globalisation, the international financial crisis, immigration, and the culture of diaspora, they ask how national loyalties are balanced with international relationships and interests. They ask how the rights of women and of ethnic and racial groups are represented. They ask what has changed about history and civics post 9/11 and they ask how countries that have experienced profound political and economic changes have addressed them in curriculum. These interactions and changes are a subject of particular interest for an international yearbook in that they are almost always permeated by global movements and influenced by multinational bodies and practices. And as these essays show in curriculum, global and

international issues are explicitly or implicitly also about local and national interests and about how citizens engage their rights and responsibilities This volume brings together a new approach to perspectives on curriculum today and a new collection of insights into the changes from different parts of the world which discuss How is the world represented in curriculum How do responses to world events shape the stories we tell students about who they are and can be This book will be of great benefit to educational researchers and policy makers as well as undergraduate and postgraduate students

Examining Comprehensive School Reform Daniel K. Aladjem, Kathryn M. Borman, 2006 Urban school reformers for decades have tried to improve educational outcomes for underserved and disadvantaged students with the assistance of constantly evolving federal and state policies In recent years education policies have shifted from targeting individual students to developing universal standards for teaching and learning and comprehensive school reform CSR has emerged as an effective key model The federal CSR program seeks to support the implementation of comprehensive school reform especially in high poverty schools and to improve efforts to help all children meet challenging academic standards Schools that receive federal CSR funds must adopt approaches that comply with the No Child Left Behind Act NCLB This book provides a series of studies and reflections on CSR by leading experts in the field What Works in Schools Robert J. Marzano, 2003 Schools can and do affect student achievement and this book recommends specific and attainable action steps to implement successful strategies culled from the wealth of research data The Phenomenon of Obama and the Agenda for Education Brad J. Porfilio, Paul R. Carr, 2011-05-01 Who should read this book Anyone who is touched by public education teachers administrators teacher educators students parents politicians pundits and citizens ought to read this book It will speak to educators policymakers and citizens who are concerned about the future of education and its relation to a robust participatory democracy The perspectives offered by a wonderfully diverse collection of contributors provide a glimpse into the complex multilayered factors that shape and are shaped by institutions of schooling today The analyses presented in this text are critical of how globalization and neoliberalism exert increasing levels of control over the public institutions meant to support the common good Readers of this book will be well prepared to participate in the dialogue that will influence the future of public education in this nation a dialogue that must seek the kind of change that represents hope for all students As for the question contained in the title of the book Can hope audaciously trump neoliberalism Carr and Porfilio develop a framework that integrates the work of the contributors including Christine Sleeter and Dennis Carlson who wrote the forward and afterword respectively that problematizes how the Obama administration has presented an extremely constrained conservative notion of change in and through education The rhetoric has not been matched by meaningful tangible transformative proposals policies and programs aimed at transformative change There are many reasons for this and according to the contributors to this book it is clear that neoliberalism is a major obstacle to stimulating the hope that so many have been hoping for Addressing systemic inequities embedded within neoliberalism Carr and Porfilio argue is key to

achieving the hope so brilliantly presented by Obama during the campaign that brought him to the presidency News Media and the Neoliberal Privatization of Education Zane C. Wubbena, Derek R. Ford, Brad J. Porfilio, 2016-03-01 This edited volume contributes to a burgeoning field of critical scholarship on the news media and education This scholarship is based on an understanding that the news media has increasingly applied a neoliberal template that mediates knowledge and action about education This book calls into question what the public knows about education how the public is informed and whose interests are represented and ultimately served through the production and distribution of information by the news media about education The chapters comprising this volume serve to enlighten and call to action parents students educators academics and scholars activists and policymakers for social political and economic transformation Moreover as the neoliberal agenda in North America intensifies the chapters in this book help to deepen our understanding of the logics and processes of the neoliberal privatization of education and the accompanying social discourses that facilitate the reduction of social relations to a transaction in the marketplace The chapters examine the news media and the reproduction of neoliberal educational reforms A Nation at Risk Teach For America charter schools think tanks and PISA and resistance to neoliberal educational reforms online activism and radical Black press while also broadening our conceptual understanding of the marketization and mediatization of educational discourses Overall the book provides an in depth understanding of the neoliberal privatization of education by extending critical examinations to this underrepresented field of cultural production the news media coverage of education The contribution of this edited volume therefore helps to build an understanding of the contemporary dynamics of capital accumulation to inform public resistance for social transformation *The Struggle for Public Education* Donald Parkerson, Jo Ann Parkerson, 2017-11-09 The great pendulum of educational reform recently has begun its inexorable swing toward a new understanding of education The thirty year dominance of the authoritarian approach complete with standardized assessments distended bureaucracies and school consolidation based on the business model appears to be over Capped by the recent departure of the No Child Left behind Act and replaced with a new congressional authorization the Every Child Achieves Act we are witnessing a distinct move toward a more democratic model of education This book places the tension between these two broadly defined archetypes in the context of the central themes of American education These include the structure and organization of American schools the struggle for diversity curriculum and instruction classroom discipline moral education testing and assessment and the rights and responsibilities of teachers and students By organizing these themes into a more understandable and relevant thematic context readers will be able to appreciate the changes in the field of education over the years as well as the cacophonous bickering over education policy today and yesterday *Understanding Education Indicators* Mike Planty, Deven Carlson, 2015-04-24 In the push to bring data to bear on all of the important education issues of the day one essential fact is often overlooked Not all indicators are created equal This book provides a comprehensive approach for understanding how statistical measures of achievement are

developed evaluated and interpreted Given the extent to which accountability measures determine outcomes for schools and students this practical introduction is essential reading for a wide audience that includes school administrators teachers policymakers and the media The authors strive to increase statistical literacy by engaging readers in the process of becoming thoughtful and critical users of data With the practitioner in mind this hands on primer Outlines a viable approach to interpreting the vast array of available data about education in the United States Uses clear jargon free language with real examples from local national and international indicator systems Offers a website www.educationindicator.com with additional resources examples and a forum for up to the minute policy discussions Mike Planty is a statistician at the U S Department of Justice Washington DC Deven Carlson is a Ph D candidate in political science and a graduate research fellow at the Wisconsin Center for Education Research at the University of Wisconsin Madison Mike Planty and Deven Carlson have taken pity on nonexpert readers of the glut of information about schools and in this incisive and clearly written book show how to figure it all out Jay Mathews Washington Post education columnist In a data driven world where competing experts will cite conflicting stats and figures to make their case Planty and Carlson have penned a volume that will prove invaluable to parents practitioners and policymakers trying to separate fact from fiction If you want to know what's really going on in education today read this book Frederick M Hess Director of Education Policy Studies at the American Enterprise Institute Education researchers policy analysts and journalists interested in understanding what really is going on behind the simple data that drive the education policy debate need this book Jack Buckley New York University and former Deputy Commissioner of the National Center for Education Statistics

The Mismeasure of Education Jim Horn, Denise Wilburn, 2013-07-01 With new student assessments and teacher evaluation schemes in the planning or early implementation phases this book takes a step back to examine the ideological and historical grounding potential benefits scholarly evidence and ethical basis for the new generation of test based accountability measures After providing the political and cultural contexts for the rise of the testing accountability movement in the 1960s that culminated almost forty years later in No Child Left Behind and Race to the Top this book then moves on to provide a policy history and social policy analysis of value added testing in Tennessee that is framed around questions of power relations winners and losers In examining the issues and exercise of power that are sustained in the long standing policy of standardized testing in schools this work provides a big picture perspective on assessment practices over time in the U S by examining the rise of value added assessment in Tennessee a fine grained and contemporary case is provided within that larger context The last half of the book provides a detailed survey of the research based critiques of value added methodology while detailing an aggressive marketing campaign to make value added modeling VAM a central component of reform strategies following NCLB The last chapter and epilogue place the continuation of test based accountability practices within the context of an emerging pushback against privatization high stakes testing and other education reforms This book will be useful to a wide audience including teachers

parents school leaders policymakers researchers and students of educational history policy and politics **Standards**

Primer Raymond A. Horn, 2004 The lives of America's students educators and parents are being significantly touched by the current standards and accountability reform The Standards Primer explores the historical development of this reform and compares two different views of educational standards and accountability technical standards and standards of complexity How each view impacts curriculum instruction and assessment is discussed and implications of these views for teachers administrators school boards parents community and students are presented along with a discussion of related issues involving equity and ethics on this topic The Standards Primer provides critical information including an extensive reference section containing print and nonprint resources that will lead to informed decision making concerning this national educational reform

Teaching By Numbers Peter Maas Taubman, 2010-07-01 Over the last decade the transformation in the field of education that is occurring under the twin banners of standards and accountability has materially affected every aspect of schooling teaching and teacher education in the United States Teaching By Numbers offers interdisciplinary ways to understand the educational reforms underway in urban education teaching and teacher education and their impact on what it means to teach Peter Taubman maps the totality of the transformation and takes into account the constellation of forces shaping it Going further he proposes an alternative vision of teacher education and argues why such a program would better address the concerns of well intentioned educators who have surrendered to various reforms efforts Illuminating and timely this volume is essential reading for researchers students and professionals across the fields of urban education curriculum theory social foundations educational policy and teacher education *Policy and Politics in Teacher Education*

John Furlong, Marilyn Cochran-Smith, Marie Brennan, 2013-09-13 During the last 20 years governments around the world have paid increasing attention to the recruitment preparation and retention of teachers Teacher supply and teacher quality have become significant policy issues taken up by policy makers at the highest levels This is because teachers are now seen by many governments as the lynch pin of educational economic and social reform This volume grew out of a recognition by the Editors of the growing significance of teacher education policy and a curiosity about international trends and differences The book brings together nine papers from leading academics around the world from the UK England and Scotland the USA Australia Singapore and Belgium plus a joint paper comparing Namibia and the USA Taken together the papers reveal the complexities and contradictions of international trends On the one hand they demonstrate that there is indeed a common direction of travel along the lines encouraged by international bodies such as the OECD At the same time however the papers also reveal important differences among countries in terms of how they are addressing common aspirations as well as some apparent contradictions within the policies of individual nations This book was based on the special issue of Teachers and Teaching
