Setting Sail for the Universe Donald Fernie, 2002 Eclipses, Transits, and Comets of the Nineteenth Century Stella Cottam, Wayne Orchiston, 2014-09-16 Winner of the AAS 2019 Donald E Osterbrock Book Prize for Historical Astronomy Grabbing the attention of poets politicians and the general public alike a series of spectacular astronomical events in the late 1800s galvanized Americans to take a greater interest in astronomy than ever before At a time when the sciences were not yet as well established in the United States as they were in Europe this public interest and support provided the growing scientific community in the United States with the platform they needed to advance the field of astronomy in the United States Earlier in the 19th century comets meteors and the discovery of the planet Neptune were all sources of inspiration to the general public The specific events to be considered here are the total solar eclipses of 1868 1869 and 1878 and the transits of Venus of 1874 and 1882 The available media responded to public interest as well as generating more interest These events laid the groundwork that led to today's thriving network of American amateur astronomers and provide a fascinating look at earlier conceptions of the stars The Observatory , 2003 A review of astronomy varies **Journal de la Société Royale D'astronomie Du Canada** Royal Astronomical Society of Canada, 2004 Library catalogue in 1911 31 p appended to v 4 **Transactions of the International Astronomical Union** International Astronomical Union, 2003
