Meredith Hoy

Seurat In Perspective:

Seurat in Perspective Norma Broude, 1978 This book examines the controversial art of Georges Seurat Writings by the artist and such contemporary critics as Felix Feneon as well as studies by recent scholars including J Carson Weber and William Innes Homer explode the myths and resolve the misconceptions that stubbornly cling to this artist and to his infamous technique of painting with small dots of pure color Such noted writers and critics as Roger Fry Robert Rey and Daniel Catton Rich evaluate Seurat's art in formalist terms as the product of a classical sensibility Other scholars including Meyer Shapiro Robert Herbert and Norma Broude discuss Seurat's prophetically positive response to modern technology suggesting the crucial ways in which Seurat influenced the development of twentieth century art [From Point to Pixel](#) Meredith Hoy, 2017-01-03 In this fiercely ambitious study Meredith Anne Hoy seeks to reestablish the very definitions of digital art and aesthetics in art history She begins by problematizing the notion of digital aesthetics tracing the nineteenth and twentieth century movements that sought to break art down into its constituent elements which in many ways predicted and paved the way for our acceptance of digital art Through a series of case studies Hoy questions the separation between analog and digital art and finds that while there may be sensual and experiential differences they fall within the same technological categories She also discusses computational art in which the sole act of creation is the building of a self generating algorithm The medium isn't the message what really matters is the degree to which the viewer can sense a creative hand in the art

The Graph Music of Morton Feldman David Cline, 2016-05-26 Morton Feldman is widely regarded as one of America's greatest composers His music is famously idiosyncratic but in many cases the way he presented it is also unusual because in the 1950s and 1960s he often composed in non standard musical notations including a groundbreaking variety on graph paper that facilitated deliberately imprecise specifications of pitch and at times other musical parameters Feldman used this notation intermittently over seventeen years producing numerous graph works that invite analysis as an evolving series Taking this approach David Cline marshals a wide range of source materials many previously unpublished in clarifying the ideology organisation and generative history of these graphs and their formative role in the chronicle of post war music This assists in pinpointing connections with Feldman's compositions in other formats works by other composers notably John Cage and contemporary currents in painting Performance practice is examined through analysis of Feldman's non notated preferences and David Tudor's celebrated interpretations [The First Moderns](#) William R. Everdell, 1998-07-15 This history of modernism is filled with portraits of genius and intellectual breakthroughs that evoke the fin de siecle atmosphere of Paris Vienna St Louis and St Petersburg This book offers readers a look at the unfolding of an age

Theorizing Modernism Johanna Drucker, 1994 The final section explores concepts of the artist as a producing subject and of the viewer as a produced subject with respect to such artists as Pablo Picasso Marcel Duchamp Andy Warhol and Sherrie Levine

Moak,2016-09-06 This guide contains a new approach to looking at and appreciating art One not found elsewhere It makes you aware of abilities you already have to see things in various ways The key to these abilities is what I call the visual ego the place between your eyes from which you see the world The guide then describes a series of particular ways of seeing and making works of art Finally it applies these ways which I call perspectives to works of art painting sculpture architecture and the decorative arts covering a period of some seventy thousand years The results I find to be amazing including new understandings and appreciation of many works of art and artists and their place in the history of art **James McNeill Whistler and France** Suzanne Singletary,2016-11-18 In this first full length study to position James McNeill Whistler within the trajectory of French modernism his dialogues with Courbet Manet Degas Monet and Seurat are examined in depth Inserting Whistler into the dynamics of the French avant garde reveals the depth and pervasiveness of his presence and the revolutionary nature of his role in shaping modernism **The Brain-Eye** Eric Alliez,2015-12-11 A detailed and inventive study of the thinking at work in modern painting drawing on a formidable body of scholarly evidence to challenge modernist and phenomenological readings of art history The Brain Eye presents a series of interlinked case studies in which philosophical thought encounters the hallucinatory sensations unleashed by painter researchers Rather than outlining a new philosophy of art The Brain Eye details the singular problems pursued by each of its protagonists Striking readings of the oeuvres of Delacroix Seurat Manet Gauguin and C zanne recount the plural histories of artists who worked to free the differential forces of colour discovered by Goethe in his Colour Theory in the name of a true hallucination and of a logic proper to the Visual A rigorous renewal of the philosophical thinking of visual art The Brain Eye explores the complex relations between concept and sensation theory and practice the discursive and the visual and draws out the political and philosophical stakes of the aesthetic revolution in modern painting **A Theory of the Tache in Nineteenth-Century Painting** ?stein Sj?ad,2017-07-05 Without question the tache blot patch stain is a central and recurring motif in nineteenth century modernist painting Manet s and the Impressionists rejection of academic finish produced a surface where the strokes of paint were presented directly as patches or blots then indirectly as legible signs C nne Seurat and Signac painted exclusively with patches or dots Through a series of close readings this book looks at the tache as one of the most important features in nineteenth century modernism The tache is a potential meeting point between text and image and a pure trace of the artist s body Even though each manifestation of tacheism generates its own specific cultural effects this book represents

the first time a scholar has looked at tacheism as a hidden continuum within modern art With a methodological framework drawn from the semiotics of text and image the author introduces a much needed fine tuning to the classic terms index symbol and icon The concept of the tache as a crossing of sign types enables finer distinctions and observations than have been available thus far within the Peircean tradition The sign crossing theory opens onto the whole terrain of interaction between visual art art criticism literature philosophy and psychology Impressionism: A Feminist Reading Norma Broude,2019-08-16 An original interpretation of Impressionism and nineteenth century art and culture by a noted feminist art historian This book is a pioneering reading of Impressionism from a feminist perspective by a noted art historian Norma Broude analyzes the philosophical underpinnings of landscape painting in the late nineteenth century discussing the crit

The Artistic Perspective Emile Benoit,2012-11 The writings of Emile Benoit are primarily works of moral cultural and religious criticism which attempt to find meaning in a world that seems completely devoid of it and in a manner which relies on revelatory aphorisms rather than narrative deduction to make its argument We all have been searching for meaning in our lives for as long as we have been alive Yet philosophy religion art and politics have failed to provide us with answers to our many questions about our own personal existence They ve become instead institutions for profit dogmatism entertainment or petty equivocation Benoit addresses the issues that used to be of utmost importance to scholars and laymen alike The answer to the question of how we should best live our lives In this particular book he reflects upon the various perspectives with which we engage the world and suggests reasons as to why we should adopt a more artistic perspective Painting outside the Lines David W. Galenson,2009-06-30 In a work that brings new insights and new dimensions to the history of modern art David Galenson examines the careers of more than 100 modern painters to disclose a fascinating relationship between age and artistic creativity *Piero's Light* Larry Witham,2021-11-15 In the tradition of *The Swerve* and *Galileo's Daughter* Piero's Light reveals how art religion and science came together at the dawn of the modern world in the paintings of one remarkable artist An innovative painter in the early generation of Renaissance artists Piero dell Francesca was also an expert on religious topics and a mathematician who wanted to use perspective and geometry to make painting a true science Although only sixteen of Piero's works survive few art historians doubt his importance in the Renaissance A 1992 conference of international experts meeting at the National Gallery of Art deemed Piero One of the most highly regarded painters of the early Renaissance and one of the most respected artists of all time In recent years the quest for Piero has continued among intrepid scholars and Piero's Light uncovers the life of this remarkable artistic revolutionary and enduring legacy of the Italian Renaissance Navigating Faith and Science Joseph Vukov,2022-09-15 Religious belief is often perceived as being in conflict with science but does it have to be Not usually says Joseph Vukov In this short accessible guide Vukov advances three models for Christians to utilize when navigating the relationship between science and faith conflict independence and dialogue He argues that dialogue is the ideal model to follow most of the time but not necessarily all the time Through a

philosophical approach grounded in compelling real world examples Vukov shows how no single model can be universally adequate and how Christians must proceed with discernment according to the nature of the matter at hand Considering a wide variety of illustrative issues including cosmology evolutionary biology extraterrestrial life miracles brain death and theoretical physics Vukov introduces and describes each of the three models of interaction between faith and science surveys their applications and evaluates the effectiveness of each Throughout he encourages Christians to embrace a spirit of intellectual humility and remember that at their best faith and science converge in their relentless human pursuit of truth
