Mathisen,Danuta Shanzer,2012-07-04 This volume highlights the heretofore largely neglected Battle of Vouill in 507 CE when the Frankish King Clovis defeated Alaric II the King of the Visigoths Clovis victory proved a crucial step in the expulsion of the Visigoths from Francia into Spain thereby leaving Gaul largely to the Franks It was arguably in the wake of Vouill that Gaul became Francia and that France began The editors have united an international team of experts on Late Antiquity and the Merovingian Kingdoms to reexamine the battle from multiple as well as interdisciplinary perspectives The contributions address questions of military strategy geographical location archaeological footprint political background religious propaganda consequences both in Francia and in Italy and significance There is a strong focus on the close reading of primary source material both textual and material secular and theological      The Allure of Battle Cathal J. killed in war while the technology that they used facilitated these tasks The first group of essays highlights human strengths in the fighting of medieval wars with a focus on events of the 14th and 15th centuries specifically the Anglo French wars and wars against the Turks A second group addresses the technological side of warfare in particular the advent and proliferation of early gunpowder weapons which evolved rapidly during the late Middle Ages although never replacing the role of men The articles study various facets of this evolution from the increased use and effectiveness of guns in battles sieges and naval warfare to changes in their science and metallurgy surgical treatment of wounds caused by them and governmental centralization of the technology

**Huns, Rome and the Birth of Europe** Hyun Jin Kim, 2013-04-18 The Huns have often been treated as primitive barbarians with no advanced political organisation Their place of origin was the so called backward steppe It has been argued that whatever political organisation they achieved they owed to the civilizing influence of the Germanic peoples they encountered as they moved west This book argues that the steppes of Inner Asia were far from backward and that the image of the primitive Huns is vastly misleading They already possessed a highly sophisticated political culture while still in Inner Asia and far from being passive recipients of advanced culture from the West they passed on important elements of Central Eurasian culture to early medieval Europe which they helped create Their expansion also marked the beginning of a millennium of virtual monopoly of world power by empires originating in the steppes of Inner Asia The rise of the Hunnic Empire was truly a geopolitical revolution      **Military Review** ,1984      **Professional Journal of the United States Army** ,1984      **Review of Current Military Literature** ,1984
