The Study of Religion in an Age of Global Dialogue Leonard J. Swidler, Paul Mojzes, 2000 Religion is the most fundamental comprehensive of all human activities it tries to make sense out of not simply one or another aspect of human life but of all aspects of human experience At the core of every civilization lies its religion which both reflects and shapes it Thus if we wish to understand human life in general and our specific culture and history we need to understand religion What is religion Religion is an explanation of the ultimate meaning of life and how to live accordingly based on a notion of the Transcendent Normally it contains the four C s Creed Code Cult Community structure CREED refers To The cognitive aspect of a religion it is everything that goes into the explanation of the ultimate meaning of life CODE OF BEHAVIOR or ethics includes all the rules and customs of action that somehow follow from one aspect or another of the Creed CULT means all the ritual activities that relate the follower to one aspect or another of the Transcendent either directly or indirectly prayer being an example of the former and certain formal behavior toward representatives of the Transcendent such as priests of the latter COMMUNITY STRUCTURE refers To The relationships among the followers this can vary widely from a very egalitarian relationship As among Quakers through a republican structure as Presbyterians have To a monarchical one As with some Hasidic Jews have with their Rebbe THE TRANSCENDENT As the roots of the word indicate means that which goes beyond the everyday The ordinary The surface experience of reality it can mean spirits gods a Personal God An Impersonal God Emptiness etc This volume looks at the ways we humans have developed to study religion However a new age in human consciousness is now dawning The Age of Global Dialogue a radically new consciousness which fundamentally shifts the ways we understand everything in life including religion This global dialogical way of understanding life does not lead to one global religion but it does lead toward a consciously acknowledged common set of ethical principles a Global Ethic The book looks at these two movements the Age of Global Dialogue and inchoative Global Ethic in order to help readers understand what is going on around them So they might make informed intelligent decisions about the meaning of life and how to live it Author note Leonard Swidler is Professor of Religion at Temple University Paul Mojzes is Academic Dean and Professor of Religious Studies at Rosemount College

*A Guide to the Phenomenology of Religion* James L. Cox, 2006-06-15 The phenomenological method in the study of religions has provided the linchpin supporting the argument that Religious Studies constitutes an academic discipline in its own right and thus that it is irreducible either to theology or to the social sciences. This book examines the figures whom the author regards as having been most influential in creating a phenomenology of religion. Background factors drawn from philosophy, theology, and the social sciences are traced before examining the thinking of scholars within the Dutch, British, and North American schools of religious phenomenology.

**The Geography of Religion** Roger W. Stump, 2008-04-04 The only book of its kind, this balanced and accessibly written text explores the geographical study of religion. Roger W. Stump presents a clear and meticulous examination of the intersection of religious belief and practice with the concepts of place and space. He begins by analyzing the factors that have shaped the spatial distributions of religious groups, including the seminal events that have fostered the organization of religions in diverse hearths and the subsequent processes of migration and conversion that have spread religious beliefs. The author then assesses how major religions have diversified as they have become established in disparate places, producing a variety of religious systems from a common tradition. Stump explores the efforts of religious groups to control secular space at various scales, relating their own uses of particular spaces and the meanings they attribute to space beyond the boundaries of their own communities. Examining sacred space as a diverse but recurring theme in religious belief, the book considers its role in religious forms of spatial behavior and as a source of conflict within and between religious groups. Refreshingly jargon-free and impartial, this text provides a broad comparative view of religion as a focus of geographical inquiry.

*Evolving Brains, Emerging Gods* E. Fuller Torrey, 2017-09-05 Religions and mythologies from around the world teach that God or gods created humans Atheist humanist and materialist critics meanwhile have attempted to turn theology on its head claiming that religion is a human invention In this book E Fuller Torrey draws on cutting edge neuroscience research to propose a startling answer to the ultimate question *Evolving Brains Emerging Gods* locates the origin of gods within the human brain arguing that religious belief is a by product of evolution Based on an idea originally proposed by Charles Darwin Torrey marshals evidence that the emergence of gods was an incidental consequence of several evolutionary factors Using data ranging from ancient skulls and artifacts to brain imaging primatology and child development studies this book traces how new cognitive abilities gave rise to new behaviors For instance autobiographical memory the ability to project ourselves backward and forward in time gave Homo sapiens a competitive advantage However it also led to comprehension of mortality spurring belief in an alternative to death Torrey details the neurobiological sequence that explains why the gods appeared when they did connecting archaeological findings including clothing art farming and urbanization to cognitive developments This book does not dismiss belief but rather presents religious belief as an inevitable outcome of brain evolution Providing clear and accessible explanations of evolutionary neuroscience *Evolving Brains Emerging Gods* will shed new light on the mechanics of our deepest mysteries

**The Cosmic Spirit** Roland Faber, 2021-03-04 Are we more than stardust Is the appearance of the fragile Earth in the vast universe more than an accident Are we not children of a Spirit that pervades the dust rejuvenates life and embraces the ever evolving universe Is there a cosmic Spirit that wants us to awaken to a consciousness of universal meaning sacred purpose and mutual friendship with all beings This book answers these questions with a spirituality of the numinous in our

relation to the elements of the Earth in the matrix of the multiverse by taking you on a journey through nine paths and nineteen meditations of awakening Not bound by any religion but in deep appreciation of the religious and spiritual heritage of human encounters with the divine depth of existence in our selves and in nature they invite you to become sojourners by engaging the most profound embodiments of the intangible Spirit by which it facilitates its own materialization in the cosmos and our spiritualization of the cosmos Use says this Spirit the stardust that you are to become a spirit faring species in an eternal journey of the cosmos to realize its ultimate motive of existence the attraction of love     *The Transformative Power of Faith* Erin Dufault-Hunter,2012-04-26 The Transformative Power of Faith examines how and why some people particularly those coming out of highly self destructive violent and antisocial backgrounds who appear beyond repair experience profound personal transformation through conversion to strong faith Illustrated by stories of converts who came out of serious drug addiction gangs and poverty through adherence to a demanding faith Erin Dufault Hunter argues for a narrative approach to conversion This holistic theoretical perspective offers an alternative epistemological stance to reductionistic models sometimes perpetuated among social scientists and religious ethicists alike In this study the narrative lens gives vision of the religious Other a depth and complexity too often lacking Such an approach allows a deeper understanding of the dynamics of personal transformation in ways that make sense of psychological and social factors without ignoring so called spiritual ones     **Religion and Politics** John W. Storey,Glenn H. Utter,2002-02-01 Focusing on religions such as Islam and Buddhism this volume shows how religion influences politics and vice versa Delving into such subjects as the separation of church and state in the United States the domination of the state by religion in Iran and the control of religion by the state in China this survey illuminates cultural differences This book gives a revealing look at the numerous relationships between religion and politics In the Church of England for example the 26 most senior Anglican bishops have seats in the House of Lords Religion and Politics also includes biographical sketches of thinkers and doers whose careers intersected religion and politics in significant ways from the Berrigan brothers to Osama bin Laden Also included are data and quotes a directory of politically active religious groups and a 150 page annotated bibliography     **How Religion Works** Ilkka Pyysiäinen,2021-10-11 Recent findings in cognitive science and evolutionary psychology provide important insights to the processes which make religious beliefs and behaviors such efficient attractors in and across various cultural settings The specific salience of religious ideas is based on the fact that they are counter intuitive they contradict our intuitive expectations of how entities normally behave Counter intuitive ideas are only produced by a mind capable of crossing the boundaries that separate such ontological domains as persons living things and solid objects The evolution of such a mind has only taken place in the human species How certain kinds of counter intuitive ideas are selected for a religious use is discussed from varying angles Cognitive considerations are thus related to the traditions of comparative religion This publication has also been published in paperback please click here for details     [Biblical Studies, Theology, Religion and](#)

Religion and Politics in International Relations Timothy Fitzgerald, 2011-10-27 Scholars in International Relations concerned with religion and its relations to world politics are rhetorically constructing a powerful modern myth A component of this myth is that religion is inherently violent and irrational unless controlled by the secular state which is inherently rational and only reluctantly violent Timothy Fitzgerald discusses how in this modern myth religion appears as a force of nature which either assists or threatens the sacred secular order of things and how religion is portrayed as a kind of universal essence which takes many forms its recent most dangerous manifestation being Islamic terrorism This book illustrates that the essential distinction between irrational religion and rational secular politics appears as an unquestioned preconception on the basis of which policy is conducted countries invaded and wars fought Arguing that this rhetorical construction of religion provides the foundation for faith in the rationality of modern liberal capitalism Fitzgerald demonstrates how a historically contingent discourse has been transformed into a powerful set of global assumptions
