Seven Universal Principles and the Seventh Sense Nader Butto,2015-04-24 One of the main goals of modern physics is to realize a single theory that will be able to unify the various theories and describe the universe with all its known and unknown facets In order to find a unifying theory we must observe the universe and try to understand the universal laws that regulate all its parts It becomes obvious that chemistry and physics are not enough to solve the riddle or explain the full complexity of the physiology of the human body It is only when we add the energetic dimension to chemistry and physics that we understand the full expression of human life in every dimension In this book the author present a new theory based on seven laws that embrace the universe and unify the forces of physics biology physiology religion and spirituality A new paradigm that links different cultures and different disciplines science with philosophy physics with spirituality and arts with mathematics He compare the quantum realm and spirituality and gives a practical method to develop the seventh sense by which we can have access to the spiritual world and quantum realm in order to obtain information directly from the patient without using our five senses which are limited in space and time A new definition of the basic concepts in medicine such as homeostasis well being malaise and disease and give the basis for a new model of diagnosis and treatment that increases the awareness of the psychological physical connection enhance each persons capacity for self knowledge and self care and promote the development of higher states of harmony and wholeness in the complex mind energy body connection in order to feel fulfill and achieve happiness Faith Your Seventh-Sense HUMPHREY O. The Three Brains Of Mr. Right , *Quest for Divinity* Mohamed A. Mahmoud,2015-02-01 A highly influential Sudanese reformist thinker Mahmud Muhammad Taha is regarded as a product of a dual legacy rooted in mystical Islam on the one hand and in the tradition of modernity on the other Publicly executed in 1985 following his conviction of apostasy Taha offered distinctly original interpretations of the Qur'an and a radical theory of Islamic prayer In *Quest for Divinity* Mohamed Mahmoud presents an in depth and balanced treatment of Taha's controversial yet significant thought The author's ability to provide access to relevant literature in both Arabic and English offers readers a rare view of the considerable nuance in Taha's thought With rich detail Mahmoud explores Taha's theories of human freedom and his social message referred to as the second message of Islam with its emphasis on political economic and social equality Taha's embrace of modernity is further assessed relative to his position on science law and art areas that have always attracted Muslim modernists *Quest for Divinity* will attract attention to Taha's compelling but little known intellectual contribution as a seminal modern reformer of Islam Such recognition is long overdue and will enrich the current debates on Islam and modernity **Mysticism in**

Something is really wrong with our reality It appears that our minds are being manipulated Synchronicities and the collective unconscious are clues about the mind manipulation mechanism This mechanism is the God effect according to the author The God effect implies that there is an intelligent entity controlling our minds Who is this intelligent entity manipulating our minds A God must be responsible for the God effect How exactly is this God manipulating our minds in this reality that is based on the principles of materialism that we know so well through our sciences We are unable to account for the God effect within the paradigm of materialism Are we in a reality based on idealism where consciousness is fundamental and an intelligent God exists in this context Or are we living inside a computer simulation What is the nature of our minds In order to account for God we have to question our understanding of our reality and we have to ask if we are truly in control of our minds thoughts and actions This is a gist of the God mind and reality problem that the author tries to discuss in this book In his first book the author wondered if a simulation accounts for the God effect In this book he wonders if idealism with consciousness first principles and an intelligent God solves the problem
