The Seventh Enemy Ronald Higgins,1978 **Energy Abstracts for Policy Analysis** ,1979-07 *Air University Review* ,1981-09 **Thinking the Unthinkable: A new imperative for leadership in the digital age** Chris Langdon,Nik Gowing,2018-06-08 Executive leadership faces new vulnerabilities Many leaders privately concede them but few are willing to talk publicly about them Unthinkable events since 2014 have revealed a new leadership fragility at the highest levels And the pace of change in 2017 shows that the uncertainties are greater than ever Is this the new normal Thinking The Unthinkable is an investigation into why leaders have appeared more unable or unwilling than ever to anticipate the biggest issues of our time In an era of wicked problems why are current leadership behaviours and culture apparently not fit for purpose What are the causes of so many failures in policy and strategic forecasting Are they human frailties Or are they systemic failures to embrace smartly new realities Through hundreds of interviews and conversations Nik Gowing and Chris Langdon have analysed the deep new challenges to the human capacity of leaders at the highest keels to accept understand embrace then handle the extraordinary processes of change and disruption This essential book draws on the candid responses The findings are scary and disconcerting *Karl Popper, Science and Enlightenment* Nicholas Maxwell,2017-09-26 Here is an idea that just might save the world It is that science properly understood provides us with the methodological key to the salvation of humanity A version of this idea can be found in the works of Karl Popper Famously Popper argued that science cannot verify theories but can only refute them and this is how science makes progress Scientists are forced to think up something better and it is this according to Popper that drives science forward But Nicholas Maxwell finds a flaw in this line of argument Physicists only ever accept theories that are unified theories that depict the same laws applying to the range of phenomena to which the theory applies even though many other empirically more successful disunified theories are always available This means that science makes a questionable assumption about the universe namely that all disunified theories are false Without some such presupposition as this the whole empirical method of science breaks down By proposing a new conception of scientific methodology which can be applied to all worthwhile human endeavours with problematic aims Maxwell argues for a revolution in academic inquiry to help humanity make progress towards a better more civilized and enlightened world **Irregular War** Paul Rogers,2016-06-16 If the rise of Islamic State can overthrow powerful states in a matter of weeks what kind of a secure future can the world expect After more than a decade of the war on terror security specialists thought that Islamist paramilitary movements were in decline the threat from ISIS in Syria and Iraq Boko Haram in Nigeria al Qaida in Yemen the chaos in Libya and the return of the Taliban in Afghanistan have all shown that to be wishful thinking Once again the West is at war in the Middle East John Stott on Creation Care R.J. (Sam) Berry,Laura Yoder,2021-10-21 Discover John Stott s writings on creation care brought together for the first time in this definitive collection for the global church Compiled by R J Sam Berry and Laura Yoder this brilliant anthology demonstrates

both Stott's passion for the environment and its place in Christian discipleship Showcasing his unique way of explaining the Bible simply and clearly John Stott on Creation Care traces Stott's own process of coming to embrace creation care as a vital part of the Christian life and in turn shows us how creation care must have an integral place in our own discipleship Commentary by noted scientist R J Sam Berry connects Stott's writings together and illuminates how his wisdom still speaks to us today Alongside reflections from others that Stott inspired and discipled John Stott on Creation Care is the perfect resource for every Christian looking to understand biblical teaching on the environment and how creation care should form part of their discipleship It is also an ideal biblical and theological resource for those involved in creation care ministry Published as part of the John Stott Centenary celebrations proceeds from John Stott on Creation Care will go to A Rocha International a charity that carries community based conservation projects in response to biodiversity loss around the world John Stott viewed creation care as an inevitable implication of the biblical message and as a grounding for Christian engagement in environmental commitments This collection will give you a deeper more thorough understanding of his writings and how his views developed and will leave you motivated and inspired to look again at your discipleship and how you approach creation care

Theology Matters Gary Holloway, Randall J. Harris, Mark Cothran Black, Randy Harris, 1998 When you hear the word theology you may automatically think of something irrelevant and unpractical Yet here is a book that demonstrates the significance theology has to the life of the Believer In this collection of writings by a variety of gifted authors issues of faith and Christian Living are explored Topics such as God salvation the church and worship are dealt with in a highly readable interesting way

[Losing Control](#) Paul Rogers, 2010-03-03 When *Losing Control* was first published a decade ago it was years ahead of its time Its argument was simple the real causes of global insecurity were the widening socio economic divide global marginalisation and environmental limitations especially climate change and conflict over energy resources Paul Rogers one of the most original thinkers on international security pointed to a world in which irregular warfare from the margins would prevent powerful states from maintaining their position He even predicted accurately how the United States would respond to a catastrophic attack The new edition brings the whole analysis right up to date arguing persuasively that the world's elite cannot maintain control and that a far more emancipatory and sustainable approach to global security has to be developed

[Beyond Deterrence](#) Hugh Miall, Oliver Ramsbotham, 2016-07-27 The collapse of communism in Eastern Europe the unification of Germany the withdrawal of Soviet troops the possible disintegration of the Soviet Union disengagement of the United States and creation of a federal Europe all this has changed the security context in Europe and stimulated a Europe wide debate about the future Deep questions about the nature of security itself have been raised This book will add fuel to the debate

Suez Keith Kyle, 2011-01-30 This title includes a new Foreword by WM Roger Louis On 26 July 1956 the British Empire received a blow from which it would never recover On this day Egypt's President Gamal Abdul Nasser nationalized the Suez Canal Company one of the gems of Britain's imperial portfolio It was to be a fateful day for Britain as a world power Britain France and Israel subsequently colluded in attacking Egypt ostensibly in the case of Britain and France to protect the Suez Canal but in reality in an attempt to depose Nasser The US opposition to this scheme forced an ignominious withdrawal leaving Nasser triumphant and marking a decisive end to Britain's imperial era In this the seminal work on the Suez Crisis Keith Kyle draws on a wealth of documentary evidence to tell this fascinating political military and diplomatic story Including new introductory material this revised edition of a classic work will be essential reading for anyone interested in the history of the twentieth century military history and the end of empire

The Transformation of Violent Intercommunal Conflict Stephen Ryan, 2016-02-24 In recent years there has been a remarkable growth of interest in the concept of conflict transformation and the closely related strategy of grass roots peace building Yet there exists no general critical analysis of the concept of conflict transformation in the context of violent inter communal conflict and the different approaches that can be included in response to this category

of dispute This study offers a comprehensive survey and critical overview of this emerging area Examining the reasons for the growing interest in the concept of conflict transformation in situations of ethnic conflict the book explores the different dimensions of transformation It draws on examples of strategies from a number of situations of ethnic conflict including Northern Ireland Israel Palestine Bosnia Kosovo Cyprus Spain Sri Lanka and the former Soviet Union to identify and assess key issues and problems that have emerged and ultimately to propose a stronger emphasis on the promotion of intersubjective understanding

Requiem For Modern Politics William Ophuls, 2019-05-20 This long promised sequel to Ophuls's influential and controversial classic *Ecology and the Politics of Scarcity* is an equally provocative critique of the liberal philosophy of government Ophuls contends that the modern political paradigm that is the body of political concepts and beliefs bequeathed to us by the Enlightenment is no longer intellectually tenable or practically viable Our attempt to live individually hedonistically and rationally has failed utterly causing a comprehensive crisis that is at once political military economic ecological ethical psychological and spiritual Liberal politics has abandoned virtue rejected community and flouted nature thereby becoming the author of its own demise By exposing the intrinsically contradictory and self-destructive character of Hobbesian political systems Ophuls subverts our conventional wisdom at every turn Indeed his impassioned text reads more like a Greek tragedy than a conventional political argument He critiques feminism multiculturalism the welfare state and a host of other liberal shibboleths but Ophuls is not yet another neoconservative The aim of his thesis is far more radical and progressive offering a political vision that entirely transcends the categories of liberal thought His is a Thoreauvian vision of a politics of consciousness rooted in ecology as the moral and intellectual basis for governance in the twenty-first century Ophuls holds that a polity based on a renewed erotic connection with nature offers a genuine solution to this crisis of contemporary civilization and that only within such a polity will it be possible to fulfill the worthy liberal goal of individual self-development Ophuls's work will interest and challenge a wide spectrum of readers though it will not necessarily be well liked or easily accepted No one will put down this book with his or her settled convictions about American culture intact nor will readers ever again take modern civilization and its survival for granted
