Severe Burns:

Modern Treatment of Severe Burns Zhi-yang Fang, Zhi-yong Sheng, Ngao Li, Sheng-de Ge, 2012-12-06 This volume represents a comprehensive introduction to current practices in the management of severe burns in the People's Republic of China. Thus although based largely on clinical work and experimental research performed in China it also takes account of work done elsewhere. The 18 chapters deal with such topics as the history and development of burn surgery in China, the assessment of the severity of burns, first aid, early fluid resuscitation, measures for the treatment of inhalation injury, wound management, the surgical treatment of deep burns, wound coverage and epithelial culture, measures to cope with local and systemic infection, immunology, the management of multiple organ failure, metabolism and nutrition, and rehabilitation. The application of techniques from traditional Chinese medicine to the management of burn injuries is also described. Severe Burns Andrew M. Munster, 1993-10-01 The care of severe burn victims over 100 000 people are hospitalized each year has improved dramatically over the past fifty years. But a serious burn remains a painful, frightening and traumatic experience. The psychological stress of injury may be increased by the formidable array of medical equipment used in early stages of care and by the number of doctors, nurses and specialists that burn patients and their families encounter. Once out of intensive care the burn survivor often faces a long and difficult recovery. This book is meant to relieve some of the confusion and anxiety that comes with any serious burn injury. Written by the staff of the Baltimore Regional Burn Center, it includes comprehensive medical information from leading experts and first person accounts of the experiences of burn survivors. The book describes the different types of burns, the various stages of treatment and recovery, the roles of all the people on the burn team, the physical and emotional challenges of rehabilitation, and the resources available to patients and families. It also explains how to prevent injuries in the future and how to administer first aid to someone who has been burned. Organized to be useful to family members and friends immediately after the injury and to burn survivors themselves during recovery and rehabilitation, the book is comprehensive in its coverage of topics of concern to everyone affected by a burn injury. Types of burns and inhalation injuries. Survival complications and the future. The Burn Team and what they do. Tubes, monitors and machines. Types of dressings. Pain management. Physical rehabilitation. Emotional and social recovery. Special care for children. Returning to school or work. Support groups, counseling, camps. Plastic surgery, scarring and corrective cosmetics. Prevention and safety. Organizations and resources. Being a burn survivor means so much more than simply being alive. Being a burn survivor also means being a take charge of your life person whose strength of spirit is inspirational to others. Burn survivors have to learn to accept that life as they knew it before the injury is lost. With this acceptance comes profound grief, of course, but many burn survivors grow to a level of personal awareness and acceptance of self that most people never experience from the Preface. For all those whose lives have been touched by burn injuries, this book explains medical procedures and the recovery process in a clear and comprehensive way. It will help burn survivors understand their injuries.
